I. A Letter to Shareholders

Dear Shareholders,

2022 was a year of many challenges and opportunities. The semiconductor industry underwent a capacity crunch in the first half of the year, then met a sudden downturn in demand in the second half of the year, resulting in a rapid turnaround of overall market momentum. However, with our strong corporate resilience, grasp of market insights and solid customer relationships, ASPEED Technology has achieved new operating milestones and set a new record of 18 consecutive years of growth since its inception. We are pleased to share with our shareholders that ASPEED once again achieved record revenue and profitability last year, with revenue of NT\$5,210,128 thousand and net income of NT\$2,105,614 thousand for 2022, an increase of 43.23% and 60.38% compared to NT\$3,637,632 thousand and NT\$1,312,925 thousand in 2021, respectively, with an EPS of NT\$55.72. ASPEED Technology's gross margin and operating margin were 65.09% and 47%, respectively, for 2022. In response to post-pandemic trends and global market developments, we will continue to strengthen our corporate resilience, invest in R&D and innovation, respond quickly and flexibly to industry and market changes and strive to contribute to society by maximizing the interests of our shareholders.

As a provider of innovative SoC solutions, ASPEED is focused on the chip R&D niche market. In response to future trends and demands from AI computing, high-performance computing and diversified immersive applications, the Company is gradually moving toward deepening our core technologies and fostering platform synergies. We have integrated our product planning into two major product lines: Cloud and Enterprise Solutions and Smart AV Solutions. The scope of our Cloud and Enterprise solutions include Baseboard Management Controller (BMC) SoC, Bridge IC (BIC) and Platform Firmware Resilience (PFR) SoC as our main products. In terms of product applications, we have expanded from the original cloud server applications to AI computing, switch devices, storage devices and various diversified applications, combining product depth and customer breadth to tap into unlimited potential and possibilities. Smart AV Solutions combine ASPEED's exclusive image processor family and software to create synergies and focus on smart AV application platforms. ASPEED's product lineup includes AVoIP extension SoC, Cupola360 spherical image processor and Cupola360* related software. In addition to the existing video conferencing applications and AVoIP 1G related AV extension market applications, the optimized combination of Cupola360 spherical image processor, AVoIP SoC and software development empowers customers to easily realize immersive and diversified applications, such as unmanned inspection of smart factories, virtual cities, virtual education, virtual entertainment and even digital twins. In the future, ASPEED will continue to invest in R&D resources to expand core technologies, develop new applications and extend application fields, so as to develop new product lines, gain new customers and deepen customer relationships, which allows the Company to grasp the latest insights and development trends of the markets.

Investing in a Sustainable Future

ASPEED is committed to strengthening corporate ESG. We believe that we must be responsible for sound corporate governance and green operations, enhance corporate resilience, and be accountable to investors and the public in terms of profitability and operations, making ASPEED a contributor and creator of a "sustainable high-tech civilization." Since the release of our 2020 report and the establishment of our ESG Committee, we have regularly reviewed ASPEED's ESG strategy and short and medium-term plans, and are ready to make agile adjustments in response to actual circumstances. ASPEED's sustainable development strategy and goals are to: strengthen green energy research and development through our core technologies, while focusing on cultivating ESG technology talents in Taiwan. With sound and stable corporate governance, we envisage a company that is socially inclusive and shares benefits with the society. Furthermore, we aim to strengthen the

resilience of ASPEED's business to move to the next stage of sustainable growth. ESG is developing towards sound corporate governance, strengthening corporate resilience, core technology focus on green energy and cultivating ESG talent in Taiwan, including improving sustainability governance structure and system establishment and strengthening risk management strategies. In 2022, ASPEED voluntarily adopted the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) and disclosed the Company's its first climate related financial disclosure. We expect to disclose the results in the 2022 ASPED Technology ESG Report. We continue to contribute to the development of the low-carbon semiconductor industry with our key strengths in design and we continue to hone the power-saving performance of our main chip products from both hardware and software aspects. At the same time, the development of new product applications will also be directed toward reducing power consumption and related environmental impacts. In terms of social aspects, ASPEED strives to share the fruits of our business success with our employees, improve their salary and benefits, retain and nurture talents and continue to focus on workplace diversity and social inclusion.

Looking ahead, we will focus on leadership and governance improvement, optimize the organizational management and ensure that ASPEED remains a company with integrity and excellence. We will increase resources invested in core technology development and focus on green R&D to facilitate product competitiveness. Furthermore, we shall continue to promote digital transformation, realize digitalized operations, strengthen supply chain digital management and data analytics to maximize value for ASPEED and our customers. We will also focus on cultivating outstanding semiconductor talents and to ensure a diverse and equal workplace. Last but not least, we hereby express our sincerest gratitude for your trust and we will continue to work hard to repay you in kind for your long-standing support. As we move forward, we will strive to enhance shareholders' equity and corporate value, so that our shareholders, customers and employees can share the fruitful results of our business success.

Chairman: Chris Lin

President: Chris Lin

II. Company Profile

1. Date of Incorporation:
11/15/2004
2. A brief history of the Company

Year	Milestones
2004/11	Founded with NT\$45,000 thousand capital and NT\$1,000 thousand paid-up capital.
2004/12	Cash capital increased by issuing new shares of NT\$11,000 thousand with NT\$12,000 thousand paid-up capital after increase in total.
2005/03	Cash capital increased by issuing new shares of NT\$14,000 thousand with NT\$26,000 thousand paid-up capital after increase in total.
2005/11	Allied with QCI as a software partner.
2005/11	Launched the first generation BMC – AST2000/1000.
2005/11	Allied with AMI as a software partner.
2005/12	Allied with ATEN Technology as a software partner.
2006/03	Cash capital increased by issuing new shares of NT\$10,000 thousand with NT\$36,000 thousand paid-up capital after increase in total.
2006/06	Allied with Avocent as a software partner.
2006/09	Cash capital increased by issuing new shares of NT\$14,000 thousand with NT\$50,000 thousand paid-up capital after increase in total.
2007/01	Be certified to ISO 9001-2000.
2007/06	Launched the second generation BMC – AST2100/2050/1100.
2008/08	Employee bonus and surplus capital increased by issuing new shares of NT\$29,000 thousand with NT\$79,000 thousand paid-up capital after increase in total.
2008/10	Ranked no.37 in revenue growth “Deloitte Technology Fast 500 Asia Pacific 2008” by Deloitte & Touche.
2008/12	Launched the third generation BMC – AST2200/AST2150.
2009/06	AST1500 received the “Best Choice of COMPUTEX TAIPEI 2009 Award”.
2009/06	Launched the new product AST1500 PC-Over-LAN Extension Processor.
2009/09	Employee bonus and surplus capital increased by issuing new shares of NT\$21,230 thousand with NT\$100,230 thousand paid-up capital after increase in total.
2009/11	Employee exercised stock warrants increased of NT\$1,750 thousand with NT\$101,980 thousand paid-up capital after increase in total.
2010/01	Launched the new product AST1600 PC-Over-GAT5 Extension Processor.
2010/02	Launched virtual desktop processors – AST1150/AST1160/AST1170/AST1180.
2010/07	Launched the fourth generation BMC – AST2300/AST1300.
2010/09	Employee bonus and surplus capital increased by issuing new shares of NT\$27,885 thousand with NT\$129,865 thousand paid-up capital after increase in total.
2010/10	Cash capital increased by issuing new shares of NT\$20,000 thousand with NT\$149,865 thousand paid-up capital after increase in total.
2011/01	Employee exercised stock warrants increased of NT\$1,275 thousand with NT\$151,140 thousand paid-up capital after increase in total.
2011/07	Employee bonus and surplus capital increased by issuing new shares of NT\$35,091 thousand with NT\$186,231 thousand paid-up capital after increase in total.

Year	Milestones
2011/09	Cash capital increased by issuing new shares of NT\$12,000 thousand with NT\$198,231 thousand paid-up capital after increase in total.
2011/11	Employee exercised stock warrants increased of NT\$2,550 thousand with NT\$200,781 thousand paid-up capital after increase in total.
2012/01	Corporation went public.
2012/05	Listed for trading in emerging markets.
2012/09	Employee bonus and capital surplus increased by issuing new shares of NT\$10,588 thousand with NT\$211,368 thousand paid-up capital after increase in total.
2012/11	Employee exercised stock warrants increased of NT\$1,612 thousand with NT\$212,980 thousand paid-up capital after increase in total.
2013/04	Listed on Taipei Exchange.
2013/05	Cash capital increased by issuing new shares of NT\$20,360 thousand with NT\$233,340 thousand paid-up capital after increase in total.
2013/09	Capital surplus increased by issuing new shares of NT\$4,667 thousand with NT\$238,007 thousand paid-up capital after increase in total.
2013/10	Issued new restricted employee shares increased of NT\$610,000 thousand with NT\$238,617 thousand paid-up capital after increase in total.
2013/12	Ranked no. 428 in revenue growth "Deloitte Technology Fast 500 Asia Pacific 2013" by Deloitte & Touche.
2014/05	Issued new employee restricted shares increased of NT\$450 thousand with NT\$239,067 thousand paid-up capital after increase in total.
2014/07	Retired restricted stock awards shares decreased of NT\$100 thousand with NT\$238,967 thousand paid-up capital after decrease in total.
2014/08	Capital surplus increased by issuing new shares of NT\$23,907 thousand with NT\$262,874 thousand paid-up capital after increase in total.
2014/11	Rated by Forbes "Asia's 200 Best Under A Billion in 2014".
2014/12	Issued new employee restricted shares increased of NT\$220 thousand with NT\$263,094 thousand paid-up capital after increase in total.
2014/12	Retired restricted stock awards shares decreased of NT\$135,000 thousand with NT\$262,959 thousand paid-up capital after decrease in total.
2014/12	Ranked no. 451 in revenue growth "Deloitte Technology Fast 500 Asia Pacific 2014" by Deloitte & Touche.
2015/08	Employee bonus and surplus capital increased by issuing new shares of NT\$53,762 thousand with NT\$316,720 thousand paid-up capital after increase in total.
2016/05	Acquired the BMC Pilot™ product line from Emulex Corporation, a subsidiary of Broadcom.
2016/06	Established the offshore investment company ASPEED Technology (Samoa) Inc.
2016/07	Established the subsidiary ASPEED Technology (U.S.A.) Inc.
2016/08	Employee bonus increased by issuing new shares of NT\$1,160 thousand with NT\$317,881 thousand paid-up capital after increase in total.
2016/10	Established the subsidiary ASPEED Technology India Private Limited.
2016/12	Issued new employee restricted shares increased of NT\$300 thousand with NT\$318,181 thousand paid-up capital after increase in total.
2016/12	Acquired the BMC Pilot™ product line from Emulex Corporation.
2017/01	Issued private placement increased by issuing new shares of NT\$20,220 thousand with NT\$338,401 thousand paid-up capital after increase in total.

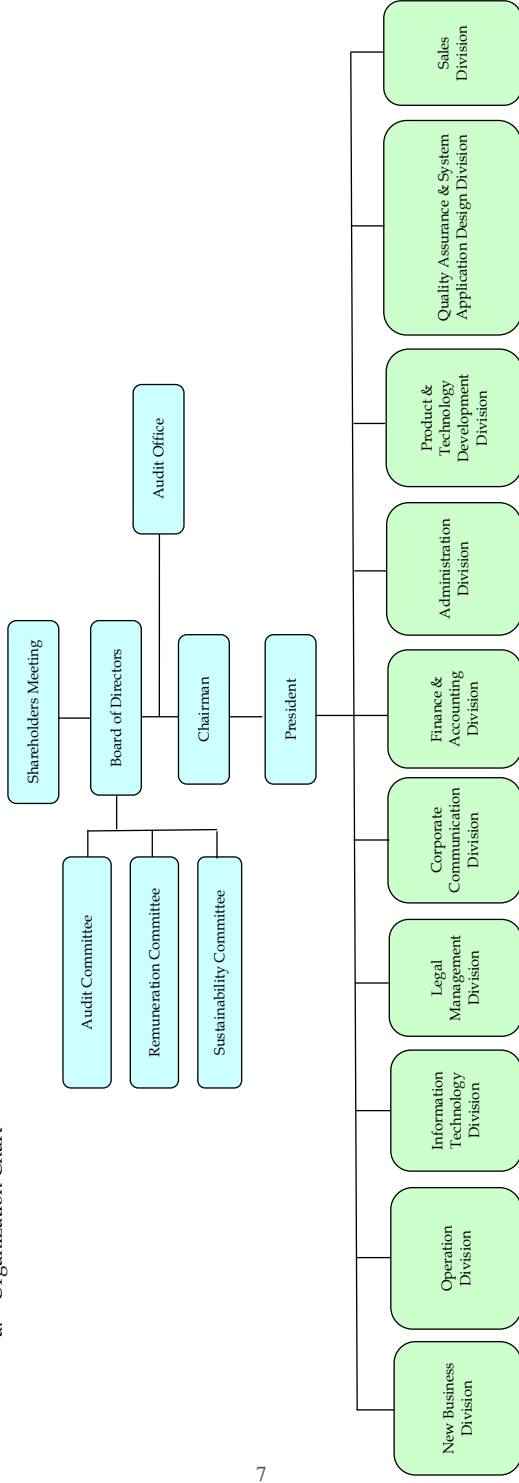

Year	Milestones
2017/06	Retired restricted stock awards shares decreased of NT\$40 thousand with NT\$338,361 thousand paid-up capital after decrease in total.
2017/06	Employee bonus increased by issuing new shares of NT\$1,057 thousand with NT\$339,418 thousand paid-up capital after increase in total.
2017/11	Retired restricted stock awards shares decreased of NT\$40 thousand with NT\$339,378 thousand paid-up capital after decrease in total.
2017/12	Ranked no.486 in revenue growth “Deloitte Technology Fast 500 Asia Pacific 2017” by Deloitte & Touche.
2018/02	Established the subsidiary Cupola Co., Ltd.
2018/02	Issued new employee restricted shares increased of NT\$360 thousand with NT\$339,738 thousand paid-up capital after increase in total.
2018/05	Debuted All Eyes on Cupola360 the World’s First 360-Degree Spherical Image Processor.
2018/08	Ranked no.21 in business performance “2018 TOP 5000” by CRIF TAIWAN.
2018/08	Employee bonus increased by issuing new shares of NT\$707 thousand with NT\$340,446 thousand paid-up capital after increase in total.
2018/11	Issued new employee restricted shares increased of NT\$210 thousand with NT\$340,656 thousand paid-up capital after increase in total.
2019/03	Ranked no. 470 in revenue growth “Deloitte Technology Fast 500 Asia Pacific 2018” by Deloitte & Touche.
2019/03	Retired restricted stock awards shares decreased of NT\$72 thousand with NT\$340,584 thousand paid-up capital after decrease in total.
2019/08	Employee bonus increased by issuing new shares of NT\$1,034 thousand with NT\$341,618 thousand paid-up capital after increase in total.
2019/08	Retired restricted stock awards shares decreased of NT\$50 thousand with NT\$341,568 thousand paid-up capital after decrease in total.
2019/09	Issued new employee restricted shares increased of NT\$280 thousand with NT\$341,848 thousand paid-up capital after increase in total.
2019/11	The head office moved to 4F, No. 1, Sec. 3, Gongdao 5th Rd., East Dist., Hsinchu City 30069, Taiwan.
2020/02	Issued new employee restricted shares increased of NT\$310 thousand with NT\$342,158 thousand paid-up capital after increase in total.
2020/03	Issued new employee restricted shares increased of NT\$90 thousand with NT\$342,248 thousand paid-up capital after increase in total.
2020/08	Retired restricted stock awards shares decreased of NT\$24 thousand with NT\$342,224 thousand paid-up capital after decrease in total.
2020/08	Employee bonus increased by issuing new shares of NT\$976 thousand with NT\$343,200 thousand paid-up capital after increase in total.
2021/03	Retired restricted stock awards shares decreased of NT\$45 thousand with NT\$343,155 thousand paid-up capital after decrease in total.
2021/09	Retired restricted stock awards shares decreased of NT\$27 thousand with NT\$343,128 thousand paid-up capital after decrease in total.
2021/09	Employee bonus increased by issuing new shares of NT\$602 thousand with NT\$343,730 thousand paid-up capital after increase in total.
2021/11	Retired restricted stock awards shares decreased of NT\$36 thousand with NT\$343,694 thousand paid-up capital after decrease in total.
2022/03	Retired restricted stock awards shares decreased of NT\$143 thousand with NT\$343,551 thousand paid-up capital after decrease in total.

Year	Milestones
2022/07	Capital surplus increased by issuing new shares of NT\$34,355 thousand with NT\$377,906 thousand paid-up capital after increase in total.

d. Board Diversity and Independence

The members of ASPEED Board of Directors are nominated via rigorous selection processes. It not only considers background diversity, professional competence and experience, but also attaches great importance to his personal reputation on ethics and leadership.

The number of independent directors of ASPEED is 4. Presently, the nine members of the Board of Directors represent diversified perspectives, including a complementary mix of skills, experiences, and backgrounds such as that from the industry, academia, and in law and there is no marital or is within the second degree of kinship relationship between or among the Directors. As such, the Board of Directors carries independence. The following table demonstrates the implementation of the diversity policy for Board members:

Implementation of the Diversity	Name and Title	Nationality	Gender	Employed by ASPEED	Age				Independent Director Period-Year				Accounting and financial analysis skills	Management ability	Crisis management procedures	Industry knowledge	International market view	Leadership	Decision-making capacity

1. Please describe the policy, system, standards and structure for the remuneration of independent directors, and the correlation with the amount of remuneration paid based on the responsibilities, risks, time commitment, etc.: The remuneration paid by the Company to its directors consists of directors' salaries, carriage fees and directors' remuneration. Directors' salaries include compensation for serving as directors and functional committees under the Board of Directors, which is paid monthly with reference to the level of industry and the level of operational participation; horse and carriage expenses are paid with reference to the level of industry and are based on the attendance of the Board of Directors at Board meetings; directors' compensation is based on the annual operating performance of the Company and is determined in accordance with the Company's Articles of Incorporation; any profit contribution of no more than 3% is the directors' remuneration, which is approved by the Board of Directors and reported to the shareholders' meeting. The compensation of directors and employees includes salaries, bonuses and employee compensation, which are determined based on the position held, the responsibilities assumed and the profitability of the Company, with reference to the standard of the same position in the industry.																			
2. Except as disclosed in the above table, the remuneration received by the directors of the Company for services rendered to all companies included in the financial statements for the most recent year, such as acting as consultants to non-employees.: None.																			

Note: The proposed amount of directors' remuneration and employee bonuses to be distributed in 2022 is calculated based on the ratio of the actual amount distributed in 2021.

c. Employees' Profit-Sharing bonus paid to Officers

Unit: NT\$ 1,000

	Title	Name	Stock Bonus	Cash Bonus	Total	Ratio of total amount to net after-tax profit of entity financial statement (%)
Managerial Officers	President	Chris Lin	3,000	—	3,000	0.14%
	COO	CJ Hsieh				
	Vice President	Luke Chen				
	Assistant Vice President	Paul Huang				
	Assistant Vice President	Charles Kuan				
	Assistant Vice President	Craig Kuo				
	Finance and Accounting Manager	Tina Chiu				

Note: The proposed amount of employee bonuses to be distributed in 2022 is calculated based on the ratio of the actual amount distributed in 2021.

- (4) Analysis of the ratios of the total remuneration of the Company's directors, president and vice president paid over the past two years to the net after-tax profit, explanation of the Company's remuneration policy, standard and combination, establishment of the remuneration procedure, and the correlation with operating performance and future risk:

a. Ratios of total remuneration to the net after-tax profit

Year Items	Ratio of Total Remuneration to the net after-tax profit			
	2021		2022	
	The Company	All Consolidated Entities	The Company	All Consolidated Entities
Directors	1.76%	1.76%	1.68%	1.68%
Presidents and Vice Presidents	3.03%	3.03%	1.92%	1.92%

- b. The remuneration policy, standard and combination, establishment of the remuneration procedure and correlation with operating performance and future risk:

The 2022 annual remuneration of directors and compensation of employees was decided in accordance with the Company's articles of incorporation. If gained profits within a fiscal year, the Company shall allocate no more than 3% of the profits as directors' remuneration, and allocate no less than 8% of the profits as employees' compensation. The decision for directors' remuneration was based on the board performance evaluation results of such aspects as the participation in the operation, the quality of the board of directors' decision-making alignment of the goals and missions of the Company, awareness of the duties of a director, management of internal relationship and communication, the director's professionalism and continuing education, internal control, etc. The decision for officers' compensation was based on the performance appraisal indicators such as the length of service and position, performance, contribution to the Company's operation, industry benchmark, the Company's profitability, etc.

The directors' remuneration and officers' compensation were proposed to the board of directors after the resolution based on the performance evaluation results, the company's operational performance, and future risk exposure approved by the remuneration committee, and processed after the approval of the board of directors. The directors' remuneration and employees' compensation will also be reported at the shareholders' meeting. The Company's remuneration committee and the board of directors will review the remuneration policies of directors and officers in a timely manner based on the actual operating conditions and relevant laws and regulations, in order to balance the company's sustainable operation and risk control.

3. Corporate Governance Report

(1) Operation of the Board :

A total of 6 meetings of the Board of Directors were held in 2022. The attendance of the directors is as follows:

Title	Name	Attend Attendance	By Proxy	Percentage of Actual Attendance
Chairman	Chris Lin	6	0	100%
Director	Arnold Yu, Corporate Representative of Xian Hua Investment Co., Ltd.	6	0	100%
Director	Luke Chen, Corporate Representative of Linvest Wealth Corp.	6	0	100%
Director	Ted Tsai	6	0	100%
Director	Hung-Ju Huang, Corporate Representative of Linvest Fortune Corp.	6	0	100%
Independent Director	Chyan Yang	6	0	100%
Independent Director	Dyi-Chung Hu	6	0	100%
Independent Director	Sheng-Lin Chou	5	0	83%
Independent Director	John C. Lin	6	0	100%

Other Required Notes for the Board Meetings:

1. If any of the following circumstances occur, the dates of the meetings, sessions, contents of motion, all independent directors' opinions and the company's response should be specified:

(1) Matters referred to Article 14-3 of the Securities and Exchange Act. :

Date of meeting	Meeting	Content of motion	Independent director's opinion	Handles the opinions of independent directors
Mar-07 2022	7th-term 5th	(1) Approval of 2021 issuance of new outstanding shares for employee bonuses	Proposal was approved as proposed	None
		(2) Approval of cancellation of 2018,2019 new restricted employees shares		
		(3)Approved to proposal for a New Share Issue Through Capitalization Of Capital Reserve.		
		(4)) Approval of cancellation of 2022 new restricted employees shares		
		(5)Approval Amendment to "Procedures Governing the Acquisitions or Disposition of Assets"		
		(6) Approval of the statement of declaration of internal control		

Date of meeting	Meeting	Content of motion	Independent director's opinion	Handles the opinions of independent directors
May- 09 2022	7th-term 6th	Approval of 2022 manager's salary allocation	Proposal was approved as proposed	None
Aug-08 2022	7th-term 8th	(1)Approval of 2022 manager's salary allocation new restricted employees shares		
		(2)Approval of 2022 employee bonus to directors and managers		
Nov-07 2022	7th-term 9th	(1) Approval of cancellation of 2019 new restricted employees shares		
		(2) Approval of 2022 Share Buyback Plan		
		(3)Approval of 2021 compensation of CPAs		
		(4) Approval of the independence and competency assessment of the company's CPAs		
Dec-16 2022	7th-term 10th	(1) Approval of cancellation Cancellation of treasury shares in 2022		

(2) Other matters involving objections or expressed reservations by independent directors that were recorded r stated in writing that require a resolution by the board of directors.: None.

2. If there are directors' avoidance of motions in conflict of interest, the directors' names, contents of motion, causes for avoidance and voting should be specified:

Date of Board of directors	Content of motion	Name of Director	Causes for Avoidance	Voting or Not
May- 09 2022	Approval of 2022 managers' salary allocation	Chris Lin	Manager's salary	Note 1
		Luke Chen	Manager's salary	
		Hung-Ju Huang	Manager's salary	
Aug-08 2022	(1) Approval 2022 managers' new restricted employees shares allocation (2)Approval of 2022 employee bonus to directors and managers	Chris Lin	Manager's bonus	Note 2
		Luke Chen	Manager's bonus	
		Hung-Ju Huang	Manager's bonus	

Note 1: All motions were approved by all attending directors as proposed, except for the motion regarding 2022 managers' salary allocation on May 09, 2022, where director Chris Lin and Luke Chen and Hung-Ju Huang recused themselves to avoid conflicts of interest in accordance with the law.

Lin, Luke Chen and Hung-Ju Huang recused themselves to avoid conflicts of interest in accordance with the law.

3. Listed companies should disclose information on the board of directors' self (or peer) assessment cycle and period, the scope, manner and content of the assessment:

Assessment Cycle	Assessment Period	Assessment Scope	Assessment Method	Assessment Content
Annually	2022/1/1~2022/12/31	Performance assessment of the board of directors, functional committees and their individual members	Internal self-assessment made by the board of directors, functional committees and their individual members	<p>1. The company's items for measuring the performance assessment of the board of directors include the following aspects:</p> <p>(1) Degree of participation in company operations</p> <p>(2) Improve the quality of decision-making of the board of directors</p> <p>(3) Composition and structure of the board of directors</p> <p>(4) Selection and appointment of directors and continuous education</p> <p>(5) Internal control</p> <p>2. The company's items for measuring the performance assessment of the functional committees include the following aspects:</p> <p>(1) Degree of participation in company operations</p> <p>(2) The awareness of duties of the functional committees</p> <p>(3) Improve the quality of decision-making of the functional committees</p> <p>(4) Selection and appointment of the functional committees</p> <p>(5) Internal control</p> <p>3. The company's items for measuring the performance assessment of directors include the following aspects:</p> <p>(1) Understanding of company goals and missions</p> <p>(2) The awareness of their duties and responsibilities</p> <p>(3) Degree of participation in company operations</p> <p>(4) Internal relation maintenance and communications</p> <p>(5) Election of directors and continued knowledge development</p> <p>(6) Internal control</p>

4. Goals of the current and the recent years to improve the functions of board of directors (such as establishing audit committee, improving the information disclosure) and assessment of the implementation:
- (1) Establishment of the Remuneration Committee and Audit Committee: ASPEED established a Compensation Committee on June 12, 2011 and an Audit Committee on June 11, 2018 to enhance the Board's operation.
 - (2) In order to improve the function of the board of directors and establish performance goals to strengthen the operation efficiency of the board of directors, the board of directors of ASPEED approved the "Director's Performance Evaluation Method" on May 5, 2020. The internal performance evaluation is implemented at least once a year and finished in the first quarter of the next year. The report to the board of directors is submitted beforehand, and the results of performance evaluation are not only the basis for review and improvement, but also serve as a reference for the selection and nomination of directors.
 - (3) Corporate governance operations enhancement: ASPEED's Board approved "Ethical Corporate Management Best Practice Principles", "Corporate Governance Best Practice Principles" and "Corporate Social Responsibility Best Practice Principles".
 - (4) Information transparency improvement: ASPEED's Board previously approved "Procedures for Internal Material Information".

(2) Operation of Audit Committee

Audit Committee held 4 sessions in 2022.

The attendance of the Independent Directors is shown in the following table.

Title	Name	Attend Attendance	By Proxy	Percentage of Actual Attendance (%)	Remark
Independent Director	Chyan Yang	4	0	100%	None
Independent Director	Dyi-Chung Hu	4	0	100%	None
Independent Director	Sheng-Lin Chou	4	0	100%	None
Independent Director	John C. Lin	4	0	100%	None

Other Required Notes for the Audit Committee Meeting :

1. The operation of the Audit Committee shall state the date and period of the Board meeting, the content of the motion, the result of the Audit Committee's resolution and the Company's handling of the Audit Committee's opinion, if any of the following circumstances apply:

(1) Matters referred to Article 14-5 of the Securities and Exchange Act.:

Date of meeting	Meeting		Content of motion	Any Independent Director had a Dissenting Opinion or Qualified Opinions

V		<p>(1) Employee rights and employee care Employees are the most valuable resource of ASPEED. We have a high-quality labor force that we provide with comprehensive employee welfare benefits. We care for our employees and their households while supporting their lifestyles. By conscientiously heeding employee opinions, we use communication as a bridge for connecting employees' work with the Company vision. Employees build trust with one another, which encourages joint hard work and continued growth. ASPEED's organizational framework has a linear design that supports internal free flow of opinions and open communications channels. Employees share their opinions at the end of each year in Company satisfaction surveys as well as labor management meetings, digital mailboxes, and through the Employee Welfare Committee. These channels make it easy for employees to share their thoughts with the Company, so that the responsible Company unit can offer a timely response, fostering positive interaction and trust between labor and management. Creating a seamless communication culture and an active, enlightened work environment enables us to better guarantee workers' rights and interests.</p> <p>(2) Investor relations The Company interacts with all shareholders based on the principle of being fair, just, and open. Besides notifying all shareholders to attend shareholders' meetings, the Company encourages shareholders to actively participate in directors and supervisors' elections, or propose amendments to the Articles of Incorporation. Material financial transactions, such as the acquisition or disposal</p>

(8) Other Important Corporate Governance Information: None.

(9) Status of the Internal Control System Implementation:

- a. Declaration of Internal Control

Statement of Declaration of Internal Control

Date: March 6, 2023

Based on the findings of a self-assessment, ASPEED Technology Inc. (ASPEED) states the following with regard to its internal control system during the year 2022:

1. ASPEED's board of directors and management are responsible for establishing, implementing, and maintaining an adequate internal control system. Our internal control is a process designed to provide reasonable assurance over the effectiveness and efficiency of our operations (including profitability, performance and safeguarding of assets), reliability, timeliness, transparency of our reporting, and compliance with applicable rulings, laws and regulations.
2. An internal control system has inherent limitations. No matter how perfectly designed, an effective internal control system can provide only reasonable assurance of accomplishing its stated objectives. Moreover, the effectiveness of an internal control system may be subject to changes due to extenuating circumstances beyond our control. Nevertheless, our internal control system contains self-monitoring mechanisms, and ASPEED takes immediate remedial actions in response to any identified deficiencies.
3. ASPEED evaluates the design and operating effectiveness of its internal control system based on the criteria provided in the Regulations Governing the Establishment of Internal Control Systems by Public Companies (herein below, the Regulations). The criteria adopted by the Regulations identify five key components of managerial internal control: (1) control environment, (2) risk assessment, (3) control activities, (4) information and communication, and (5) monitoring activities. Each criteria further contains several items. For more information on the abovementioned items, please refer to the Regulations.
4. ASPEED has evaluated the design and operating effectiveness of its internal control system according to the aforesaid criteria.
5. Based on the findings of such evaluation, ASPEED believes it can reasonably assure that the design and implementation of its internal control system as of December 31, 2022 (including supervision and management of subsidiaries), including the effectiveness and efficiency in operation, reliability, timeliness and transparency in financial reporting, and compliance with relevant regulatory requirements, have reasonably and efficiently achieved the aforementioned objectives.
6. This statement is an integral part of ASPEED's annual report for the year 2022 and prospectus, and will be made public. Any falsehood, concealment, or other illegality in the content made public will entail legal liability under Articles 20, 32, 171, and 174 of the Securities and Exchange Act.
7. This Statement was passed by the Board of Directors Meeting of the Company held on March 6, 2023, with none of the 9 attending Directors expressed dissenting opinions, and the remainder all affirming the content of this Statement.

ASPEED Technology Inc.

Chairman: Chris Lin

President: Chris Lin

	Cash Dividend Yield (Note 3)		1.53%	1.96	Note 4

Note 1: Price/Earnings Ratio = Average Market Price / Earnings Per Share

Note 2: Price/Dividend Ratio = Average Market Price / Cash Dividends Per Share

Note 3: Cash Dividend Yield = Cash Dividends Per Share / Annual Average Market Price

Note 4: Not applicable.

(6) Dividend Policy and Status

1. Dividend Policy:

Pursuant to Article 28-1 of the Articles of Incorporation, the Company's dividend policy is to allocate no less than 10% of its distributable earnings to shareholders' dividends each year, taking into account current and future development plans, the investment environment, capital requirements, domestic and foreign competition, and shareholders' interests, but no less than 50% of its paid-in capital.

2. Proposal to Distribute 2022 Profits

The Board approved a proposal for 2022 profit distribution as follows:

Cash dividends to common shareholders from retained earnings is NT\$ 1,701,930,555, or NT\$ 45.00 per share of cash to common shareholders. The approval is subject to report to shareholders at the Annual Shareholders' Meeting and authorize the right to Chairman to determine related matters.

(7) Effect of 2022 Share Dividends to Operating Performance and EPS:None.

(8) Employee profit sharing bonus and Director/Supervisor remuneration

a. The ratios or scope of the employee profit sharing bonus and director's remuneration in the Company's Articles of Incorporation:

Pursuant to Article 28 of the Articles of Incorporation, if the Company has any annual profit left, it shall allocate no less than 8% of the profit for employee's compensation sharing bonus. Qualification requirements of employees, including the employees of parents or subsidiaries of the company meeting certain specific requirements, entitled to receive shares or cash in accordance with the Board of Directors shall determine. The Board of Directors may allocate no more than 3% of the profit for director remuneration. Employees' compensation and remuneration to directors' distribution reports shall be submitted to the shareholders' meetings. However, the Company's accumulated losses shall have been covered (if any), and then allocate employee compensation and remuneration to director from the balance according to the ratio in the preceding Paragraph.

b. The estimation of the current year's employee profit sharing bonus and directors' remuneration, profit sharing bonus distributed in the form of shares

The Company estimates employee bonuses and Board remuneration according to the ratio within the range required by the Company's Articles of Incorporation. If there is any difference between the amount resolved by the board of directors and the estimated amount, and the difference is not significant, or if there is any variance between the distributed amount and estimated amount, the difference will be deemed change of accounting estimation and recognized as next year's profit or loss. There was no major deviation of the amount of employee bonuses and Board remuneration approved by the Board of Directors on March 6, 2023 from the amount recognized in 2022 as described below:

Unit: NT\$

Item	Board Resolution
Employee Compensation – Cash	229,900,122
Remuneration of Directors– Cash	28,737,515

Note: The number of shares issued for employee bonuses is calculated based on the closing price on the business day preceding the Board meeting.

Distributions of employee shares that amount to less than one full share will be made in cash.

- c. Status of board of directors' adoption of employee compensation/ remuneration distribution
- (I) The proposed amount of employee compensation and directors remuneration paid in cash was NT\$229,900,122 and NT\$28,737,515, respectively.
 - (II) The proposed amount of employee compensation to be paid in cash was NT \$229,900,122, which accounts for 9.84% of the sum of after-tax net profit and employee compensation for the current period.
 - (III) The distribution of the previous year's employee compensation and directors' remuneration. If there is any difference between the distributed amount and the estimated amount, the variance, reason and handling status shall be disclosed: There was no such discrepancy.
- ci. Distribution of employee compensation and directors remuneration in the previous year:

Unit: NT\$

Item	2021			
	Distributed amount	Estimated amount	Difference	Reason and treatment for differences
Employee Compensation	141,518,018	141,518,018	-	N/A
Remuneration of Directors	17,689,752	17,689,752	-	N/A

- (9) The Company's Buyback (Repurchase) of Stock:

Repurchase Times	The 1th
Purpose of Repurchase	For the shareholders' interests
Repurchase Period	2022/11/08~2023/01/07
Number of shares repurchased	60,000
Price Range of Repurchase	NTD1,418~2,544
shares currently repurchased (shares)	60,000
Current average repurchase price per share	2,085.84
The number of shares that have been cancelled and transferred	60,000
The cumulative number of shares held by the company to the total number of issued shares	0

2. Status of Corporate Bonds: None.
3. Status of Preferred Stocks: None.
4. Status of GDR/ADR: None.
5. Status of Employee Stock Option Plan:
 - (1) Employee stock options that have not matured yet: None.
 - (2) Names of managerial officers and top ten employees with respect to number of shares subscribable and subscribable amounts reaching NT\$30 million, and their subscription of shares up to the annual report publication date: None.

6. Status of New Employee Restricted Stock Issuance

(1) Issuance of New Restricted Employee Share

Types of New Restricted Employee shares	8th time	9th time	10th time	11th time

Issue date	Sep. 10 2019	Feb. 5 2020	Mar. 2 2020	Aug.8 2022
Number of New Restricted Employee Shares Issued	28,000 shares	31,000 shares	9,000 shares	44,000 shares
Issue price(NT\$)	NT\$0	NT\$0	NT\$0	NT\$0
New Restricted Employee Shares as a Percentage of Shares Issued	0.08 %	0.09 %	0.03 %	0.17 %
Vesting Conditions of New Restricted Employee Shares	<p>The percentage of shares distributed to employees at each of the following time points after receiving restricted share awards, provided that the employee is still an active employee and meets performance conditions that were agreed upon, is as follows:</p> <p>Serving for 1 full year: 10%</p> <p>Serving for 2 full years: 10%</p> <p>Serving for 3 full years: 40%</p> <p>Serving for 4 full years: 40%</p> <p>During the period, and any other agreement with the company. The set personal performance evaluation indicators and the company's operating goals; the maximum shareholding ratios that can be acquired on the vesting date of each year are:</p> <p>The upper limit of the proportion of vested shares in 2023 is 35%, the upper limit of the</p>			

Types of New Restricted Employee shares	8th time	9th time	10th time	11th time
	<p>proportion of vested shares in the two years from 2023 to 2024 is 70%, and the upper limit of the proportion of vested shares in the three years from 2023 to 2025 is 100%. Based on the settlement figures in 2021, the performance periods are calculated from the three settlement performance periods of 2022, 2023 and 2024, for a total of three performance periods..</p> <p>The company's operating target is based on the growth rate of operating profit. The minimum vested share ratio is 1.8%, the target value is 300%, and the target value is 100%.</p>			
Restrictions Right of New Restricted Employee Shares	<p>1. After employees are distributed new shares and before the restricted shares meet the vesting conditions, except for being inherited, the new restricted employee shares may not be sold, mortgaged, transferred, pledged, or disposed of using any other methods.</p>			

Types of New Restricted Employee shares	8th time	9th time	10th time	11th time
	2. The custodian institution attends, makes proposals, speaks, and votes during shareholders' meetings according to the trust agreement.			
Custody Status of New Restricted Employee Shares	The shares will be handed over to a trustee during the restricted period specified in the vesting conditions.			
Measures to be Taken When Vesting Conditions are not Met	Recalling and cancellation.			
Number of New Restricted Employee Shares that have been Redeemed or Bought Back	14,400 shares	10,800 shares	0 shares	0
Number of Released New Restricted Employee Shares	9,600 shares	12,600 shares	5,400 shares	0
Number of Unreleased New Restricted Shares	4,000 shares	7,600 shares	3,600 shares	44,000
Ratio of Unreleased New Restricted Shares to Total Issued Shares (%)	0.01 %	0.02 %	0.01 %	0.12 %
Impact on possible dilution of shareholdings	Dilution to original shareholders' holding is limited.			

(2) List of Executives Receiving New Restricted Employee Shares and the Top Ten Employees with New Restricted Employee Shares

Title	Name	No. of New Restricted Shares	New Restricted Shares as a Percentage of Shares Issued	Released (Note 1)			Unreleased				
				No. of Shares	Issued Price (NT\$)	Amount (NT\$ thousands)	Released Restricted Shares as a Percentage of Shares Issued	No. of Shares	Strike Price (NT\$)	Amount (NT\$ thousands)	Unreleased Restricted Shares as a Percentage of Shares Issued
Manager and Employee	Chris Lin

7. Status of News Shares Issuance in Connection with Mergers and Acquisitions: None.

8. Financing Plans and Implementation: Not applicable.

V. Business Activities

1. Business Scope

(1) Business Scope

a. The Main Business Activities of the Company

Design, develop, produce, manufacture and market the following products:

(I) Multimedia IC

(II) Computer peripherals IC

(III) High-end consumer electronics IC

(IV) Patent and services of the above-mentioned products

b. Revenue Breakdown

Unit: NT\$1,000

Category \ Year	2021		2022	
	Amount	%	Amount	%
Multimedia IC	3,392,407	93.26%	4,863,615	93.35%
Computer peripherals IC	225,360	6.20%	338,158	6.49%
Other	19,865	0.54%	8,355	0.16%
Total	3,637,632	100.00%	5,210,128	100.00%

c. The Company's current products (services)

Name of main products	Purpose
Multimedia IC	ASPEED Server Management product lines are designed to enrich the basic feature set with 2D graphic controller, hardware monitoring capabilities, iKVM function, and security function. Customer can select and implement from our Graphics & Remote Management Processors to best fit their design needs.
Computer peripherals IC	Our core technology includes display over IP, USB over IP and audio over IP. With our core technologies, we are able to support PC Extensions for application scenario such as PC-to-TV, PC centralization for Internet Cafe, and Enterprise PC over IP.
High-end consumer electronics IC	Applied to 360 degrees panoramic camera, immersive smart patrolling, video conferencing and making more innovative product and technology in camera applications .

d. Plans for the development of new products (services)

ASPEED Technology Inc. accumulated long term experiences for BMC development and relationships with customers. Feedbacks and requests from customers helped us to develop a comprehensive, high performance and high

security 7th generation BMC chip. There are some whole new features in next generation BMC chip: Hardware Elliptic Curve Cryptography (ECC) and RSA engine, hardware root of trust engine, TruzeZone bus controller, Security memory management, cache parity check. At the same time, the firmware supports are also enriched, like OpenBMC and UEFI GOP driver etc.

ASPEED's 2nd generation Cupola360 multi-image stitching video & audio SoC, AST1230, as well as the accompanying app which is suitable for immersive smart patrolling and with extensive and diverse experience in high performance video conferencing applications. The AST1230 SoC features include a powerful image signal processor (ISP) and a smart layout processing engine. Incorporating ASPEED's unique Hyper-stitching® technology, the AST1230 SoC is engineered to deliver extraordinary processing power for on-device real-time image stitching. Incorporating the high level programmable Audio DSP to tackle the most challenging audio/voice use cases, the AST1230 SoC offers exceptional power and thermal efficiency, making it ideal for a wide range of emerging IoT applications.

Offering complete Cupola360⁺ Software Kit total solution: Cupola360⁺ Industry smart patrolling is a digital control provides a whole new management system which can be connected to the 360 degrees panoramic camera devices to remote control and reporting problems to the headquarters in real time for handling. Traditional patrolling mostly rely on paper records and human which will increase a lot of extra resource, time and cost. It's difficult to management efficiency. The ASPEED Cupola360⁺ Industry smart patrolling system can fully digitize the data, to increase productivity and improving efficiency, save communication costs. With the Cupola360⁺ Software Kit, to deploy camera devices to read and trace the record at any time, which is convenient for management and data is easier to save and manage.

Cupola360⁺ Studio software (professional version) and future Cupola360⁺ Education software, combined with the video camera powered by Cupola360 IC chip, provides various advanced video functions, such as automatic speaker tracking, intelligent layout, whiteboard presentation mode (picture-in-picture), smart name tag, smart video recording and other functions are suitable for various video conferences, virtual family gatherings, and remote training.

(2) Industry Outlook

a. Industry Status and Trends

An overview of industries related to the Company's main products is provided below:

(I) Semiconductor Market

The global semiconductor industry had a strong growth in

2021, but the sudden increase in demand caused supply imbalance and created shortages which continues into first half 2022. Starting from 2nd quarter 2022, industry faced a rapid demand downturn on smart phone, PC, notebook, TV and consumer products which lead to increase in semiconductor inventory. In the longer term 5G, AI, IOT, automobile etc. will continue to trigger semiconductor growth.

Taiwan IC design industry undergo supply imbalanced in 2021 and continue to increase shipment as well as ASP in 2022. Demand for consumer products started to decline in 2H 2022, global inflation, epidemic continues, tension in Europe, US and China trade war issue etc. also negatively affected global export business. Industries are facing higher inventory and operating cost pressures.

Looking forward to 2023, high inventory and on top of it weakness in end demand will affect overall economics, reduce purchasing power. Gartner predicts global semiconductor market will decline 3.6% in 2023. IEK thinks if there is a recovery in economy, Taiwan semiconductor industry may still reach 6.1% growth in IC design.

(II) Multimedia IC

Global Server market shipments were affected by supply constraint in 1H2022, but from zero-Covid policy and lockdowns in China to weakness in global economy affected both China and global server shipment. Digitimes Research estimated 2022 world-wide server shipment to grown 4.3%.

Going into 2023, global economy continues to be weak, US top 4 hyperscale companies all adjusted their CAPEX spending as well as server procurement. TrendForce estimated world-wide shipment will be down to 1.87%.

Figure 1: 2022~2023 Top 4 US CSP Procurement Volume
表、2022~2023年北美四大CSP伺服器採購量年增/減幅度預估

北美四大CSP	2022	2023E (Original)	2023E (Revised)
Meta	19.7%	-0.5%	-3.0%
Microsoft	17.6%	16.9%	13.4%
Google	8.1%	7.5%	5.2%
AWS	13.2%	7.8%	6.2%
Total	15.1%	6.9%	4.4%

Source: TrendForce, Jan., 2023

(III) Computer peripherals IC

The market size and growth speed of global digital signage systems had become increasingly. According to the survey of Omidia, the market size of global digital signage system will reach 199 billion US dollars. The reason for the rapid expansion of the digital signage market in the post-pandemic era of contactless technology and social distancing is its wide range of applications. From kiosks that integrate ordering and payment services to drive-through ordering, digital signage is everywhere. With changing lifestyles, companies have begun to put more effort into enhancing digital communication to meet the needs of the trend. Digital signage has become important increasing in many areas such as airport, stations, retail shops, shopping malls, commercial building, government buildings, drugstores, supermarkets, movie theaters and etc. The demand in the advertising market continues to drive the market, allowing digital signage to grow rapidly.

Figure 2: Global digital signage shipment statistics and estimates

(IV) High-end consumer electronics IC

In 2020 with the lockdown caused by the raging of COVID-19 and the closure of many offices around the world, Ensuring remote work and distance learning have become new forms of communication, which also led to a proliferation of video conferencing solutions. Businesses, educational institutions, and governments are looking for effective ways to help employees and students stay connected and productive working from home. Faced with the need for organizations to go online quickly to keep operations running, they are looking for an easy-to-use video conferencing solution to replace physical office.

However, the adoption of these services has expanded rapidly, not only for business meetings, educational purposes and remote patient care, religious gatherings, yoga classes, celebrity endorsements and other social events have

all moved online, meeting solutions are fully integrated into the daily life, gradually becoming a part of life.

Gartner, a technology research and consulting firm, concluded that due to the increase in the use of video conferencing outside of work, it will increase employees' acceptance of remote meetings, and become more comfortable and confident in video online meetings, which will lead to more adoption of video solutions in enterprises.

As the post-pandemic era approaches, although many companies are planning to "return to the office", the demand for video calls will not disappear. Remote work still exists, and distributed work teams still need solid, reliable videoconferencing hardware and software to support collaboration. According to Global Market Insights Inc., by 2027, the overall market for videoconferencing software, hardware and cloud services will reach \$75 billion. Remote work is the future, and while many employees are bound to return to an office environment post-pandemic, the benefits of remote work will continue to become clearer.

b. Infrastructure of the Semiconductor Industry

The relationships among upstream, midstream and downstream suppliers in Taiwan's Semiconductor industry are shown in the table below. Generally the upstream is represented by fellow fabless IC design companies, midstream is represented by wafer foundry companies, and downstream is represented by various IC packaging and testing service providers.

Operation Stages	Processes	Definition	Basis for classification	Scope
Upstream	IC Design	Specializes in IC design and R&D but is not involved in IC manufacturing.	IC Design	Engages in design and outsources a portion of production to wafer foundry services.
Midstream	IC Manufacturing	Specializes in the establishment of production lines in foundries and provides IC manufacturing services.	Wafer Foundry	ODM for ICs.
			Memory manufacturing	DRAM, Flash, SRAM, ROM, etc.
Downstream	IC Packaging	Outputs functional signals from the IC through a carrier and protects the IC from damage.	Lead frame Packaging	Packaging that uses lead frames, such as DIP, SOP, QFP, etc.
			Substrate Packaging	Packaging that uses substrates, such as BGA, etc.
			FPC Packaging	Packaging that uses FPCs, such as COF, TCP, etc.

Operation Stages	Processes	Definition	Basis for classification	Scope
	IC Testing	After wafer fabrication is completed, testing instruments verify whether products are non-defective in two stages, before and after packaging, respectively.	Wafer Testing	A probe is used to test grains before wafer dicing and packaging.
			Product Testing	After IC packaging, IC function, speed, tolerance, power consumption, and heat diffusion testing are all part of product testing.

Source: Industrial Technology Research Institute of Taiwan, R.O.C. IEK, May 2012

Taiwan's semiconductor industry has a fully developed system with multiple companies that specialize in each link of production, such as: design tools, IC design, wafer materials, silicon wafers, mask production, IC manufacturing, packaging, lead frames, testing, and peripheral support. As a result of industry boom in recent years, the verticalization approach in the Semiconductor IC manufacturing industry involving various corporations has made up a complete ecosystem in our country in building a more comprehensive, professional and quality-driven supply chain.

c. Product Development Trends and Market Competition

The Company is a professional IC design house that mainly designs and sells Multimedia IC, Computer peripherals IC, and High-end consumer electronics IC. Therefore, changes in the supply and demand of industries that use terminal applications of the Company's products are as follows :

(I) Multimedia IC

The development of BMC SoCs must give due consideration to specification changes in the industry, such as changes in the specifications of different generation CPUs and chipsets made by Intel and AMD, DRAM specifications (such as DDR4 and DDR5), the development of display interface specifications (such as PCI and PCIe), integration of peripheral parts, and the convenience requirements of end users on servers. The Company mainly designs and sells BMC SoCs with three major functions, namely 2D VGA, BMC, and KVMoIP. The products are mainly sold to domestic and overseas server design and manufacturing companies. The Company closely follows industry standards and the organizations which set them when planning products, thus being able to accurately determine market demand for immediate development. The Company plans next generation ICs based on Intel's plans for new generation platforms, and its operating risks are thereby reduced. Currently, the major global players are ASPEED, Nuvoton Technology Corporation and Renesas Electronics Corporation. ASPEED Technology and

Nuvoton Technology are currently the only competitors in the market. Over 80% of server motherboards worldwide are designed and manufactured by Taiwanese suppliers. The Company's design team is located in Taiwan, in the same region where server suppliers are located, and is thus able to rapidly provide technical support, reduce the amount of time required for discussing technologies with customers, and achieve quick product release into the market.

(II) Computer peripherals IC

Solutions for PC & Audio/Video Extension SoCs currently in the market include analog transmission, digital transmission, and packet transmission. The main goals are long-distance transmission and signal stability. Users do not need to specially calibrate their signals due to the environment, and product portfolios that can achieve one-to-many or many-to-many have expanded the scope of its application. The Company specializes in digital transmission and packet transmission technologies, which have been patented in Taiwan and the U.S. The technologies offer excellent performance in effectively reducing image lag, and using a standard network transmission interface to transmit audio and video without any distance limits.

The Company designs and sells the compressor and transmitter chips for A/V extensions. These chips are an important component of extensions, and are generally divided into transmitting and receiving ends, with each end requiring one chip. There are also combinations of one transmitter chip with multiple receptor chips or multiple transmitter chips with multiple receptor chips. The Company uses the same chips on both ends to simplify customers' inventory management. The Company specializes in development of digital transmission and packet transmission technologies. These technologies first compress video and audio, and then transmit them to a receiving end 100 m or farther away through a network cable. Furthermore, the Company's chips can also transmit data via USB interface to the receiving end. This is the greatest difference between the Company's products and competitors.

(III) High-end consumer electronics IC

Video conferencing equipment on the market mostly uses single fisheye lens or double back-to-back fisheye lens to achieve the effect of 360-degree panoramic view. In addition to the high cost of fisheye lens, there is also the problem of low effective pixels at the edge of the lens. The AST1220 has the ability to process image distortion correction and stitching correction at the same time. It is not only suitable for processing the above single fisheye lens and double fisheye lens distortion correction, but also has the ability to stitch multiple wide-angle lenses. The stitching of multiple wide-angle lenses solves the pain points faced by products that use fish-eye lenses. In addition to saving costs and avoiding fish-eye lens edge quality problems, the vertical viewing

angle of the wide-angle lens is more suitable for meeting room scene applications.

At present, high-end video conferencing equipment mostly adopts dual-chip design for Video and Audio processing, which not only has a high overall BOM cost, but also has longer development cycle of software and hardware integration. AST1230 SoC is a product that integrates real-time multi-image splicing video and powerful audio processing capabilities to solve the pain points for current brand customers and improve product competitiveness.

(3) Technology and R&D

a. R&D Spending:

Unit: NT\$1,000

Item Year	2021	2022
R&D expenditures	506,283	627,743

b. Successful R&D Technologies or Products

Important technologies and products successfully developed by ASPEED Technology are as follows:

Year	R&D Achievements	Description
2017	AST1220 360 6 CAM Processor	Real-time 6 Lenses 360 Degree Camera Image Processor
	MIPI D-PHY interface controller	MIPI Interface Control Technology
2018	AST2500 7 th Generation Server Management Controller	7 th Generation BMC
	ARM multi-core bus interface controller	ARM multi-core bus interface controller
	Hardware ECC crypto engine	Hardware ECC crypto engine for new crypto technology
	Hardware Root of Trust Technology	Hardware Root of Trust Technology to improve system security
	360 Camera APP	To enrich 360 camera product lines
2019	Security OTP Memory Management	For Root of Trust technology
	Trust Zone Bus Controller	For trusted bus management
	AST1530/AST1620 8K PC/AV Extension Controller	For next generation 8K extension
	Cupola360 Image Post Processing	Algorithm for functions Stabilizer、Stitching、Lighting、WDR、
	360 Stitching Calibration Fixture	360 stitching calibration fixture design
	Sensor/ISP Calibrated Tools	Camera sensor/ISP calibration tools design
	UVC/UAC Protocols	USB Video/Audio Class
	Image Adaptive FOV	Adaptive FOV algorithm

Year	R&D Achievements	Description
2019	360 Video Conference F/W, VxD, App	S/W to enable video conference product
	Individual EV, Adaptive EV	EV algorithm and setting
	ePTZ Technology	Digital PTZ application
	360 Dash Cam F/W · App	S/W to enable dash cam DVR
2020	Hardware ECDSA384 engine	For digital signature algorithm
	Platform Firmware Resiliency	For platform protection
	New 2D Noise Reduction	For image quality improvement
	New ISP De-mosaic	For image quality improvement
	High Performance Stitching Engine	Support 2x stitching engine performance improvement
	Color Difference Compensation for Stitching Engine	For stitching quality improvement
	MIPI TX Controller	MIPI TX Controller
	USB3.0 Controller	USB3.0 Controller
	I3C Controller	I3C Controller
	Cupola360 Studio Software	Software development
	In-Camera dynamic image composition	API development in F/W
	In-Camera AI SoC for Face Detection	Integrate with 3rd party AI chipset to enable face detection
	In-Camera Beamforming/ DoA	Integrate with 3rd party audio DSP to enable speaker tracking
	IQ Preference Setting for Vendors Customized, -> IQ preset and IQ Tuning Tool	IQ tuning tool
	GAIA Calibration and Manufacture Support	Camera calibration tool
	Hyperion algorithm development for camera jig assembly correction	Camera calibration tool
	TITAN facility development for stitching quality verified and camera color re-calibrated.	Camera calibration tool
2021	Platform Firmware Resiliency (PFR)	System security standard
	Frame base image tessellation engine for responsive composition	A framework-based image subdivision engine for fast compositing
	In-camera Smart Director to provide best user experience of video meeting	The camera has built-in smart director, providing the best video conferencing user experience
	Smart meeting agent to drive the meeting efficiency	Video conferencing tool

Year	R&D Achievements	Description
2021	On the fly pipeline buffering design for rapidly latency.	Hardware IP to improve video latency
	Reliable and real-time object tracking algorithm	People tracking algorithm
2022	DDR5 controller	New generation DDR5 controller
	I3C HCI controller	I3C host control interface controller
	OpenTitan/Clyptra root of trust	Support open standard root of trust
	SGMII controller	Serial Ethernet interface
	LTPI controller	DC-SCM2.0 standard
	PCIe Gen4 controller	PCIe 16 GHz interface
	USB3.1 XHCI controller	USB3.1 host control interface controller
	SHA3/ECDSA/RSA crypto engine	SHA3/ECDSA/RSA hardware acceleration engine
	UFS controller	UFS serial flash interface controller
	Full trust bus matrix controller	Full secure matrix bus controler

(4) Long- and Short-Term Business Development Plans

In response to future industry developments and trends in the overall economic environment, the Company formulates various plans for its future business direction to enhance its competitiveness. The Company's long-term and short-term business development plans are summarized below:

a. Short-Term Business Development Plan

(I) Product strategy:

(a) Multimedia IC

Closely follow industry standards and the organizations which set them when planning products to accurately determine market demand for technology development; next generation ICs are planned based on Intel's new generation platforms. Increase the breadth and depth of technologies at a faster pace to provide a diversified product line.

Besides maintaining existing customers, continue to develop new customers to increase the market share of products. Continue to improve current product processes to raise the barriers to entry.

(b) Computer peripherals IC

Adopt a spanning tree protocol, develop applications for video walls and digital signage, and use a serial structure to improve the spanning tree and increase use scenarios. The second generation product is currently the only 4K2K over IP solution in the market.

(c) High-end consumer electronics IC

"Cupola360" technology brand promotion: In recent years, European and American semiconductor technology companies have launched a technology brand strategy to obtain the mind share of end users in order to enhance product technology adoption and brand value-added effects. In the promotion of this video conferencing product, ASPEED Technology also launched the "Cupola360" technology brand strategy. In the future, we will reach an agreement with customers to jointly promote "Powered by Cupola360" on the end product and software.

(II) Sales and Marketing Strategies

(a) Server products with different functions satisfy the needs of different customers, and the Company offers the full array of VGA only, BMC only, to high-end product lines with complete functions. Products are developed to meet the specific needs of different customers to build stable, long-term partnerships.

- (b) The rise of data centers has increased demand on entry level servers and increased the importance of such products in the product portfolio.
- (c) Regarding the marketing of products and services, we will leverage supply chain optimization of lens modules, the highly integrated video and audio system and the intelligent AI software to provide a complete turnkey solution to our customers. Customers can greatly shorten the time from product concept to mass production. The cycle time to develop various value-added and differentiated applications on the software development kit (SDK) can be significantly shortened. ASPEED Technology has established a global Cupola360 ecosystem with high-quality manufacturers and software and hardware partners. Moreover, we seek every possibility to increase our revenue more than hardware. The Studio software is aimed to become a new revenue stream in the near future. Selectively listed brand customer marketing information as follows:

b. Long-Term Business Development Plan

(I) Product Development

Expand the field of application for core technologies, and develop new application products to develop new product lines, new customers, and increase the market share of current products.

(II) Sales and Marketing Strategies

- (a) Strengthen the Company's systems and organizational performance, improve the sales management system, and establish a global technical cooperation and service network.
- (b) Nurture professional marketing talent, build stronger customer relations, and closely monitor changes and development trends in the product application market.
- (c) Gradually attain higher market share in the international market through joint development or strategic alliances with first tier multinational corporations.

2. Market, Production and Sales Outlook

(1) Market Analysis

a. Sales by Region of Major Products and Services

Unit: NT\$1,000

Region \ Year		2021		2022	
		Amount	%	Amount	%
Domestic sales		1,979,936	54.43 %	2,842,432	54.56 %
Exports	Asia	1,024,331	28.16 %	1,812,628	34.79 %
	Europe and America	633,365	17.41 %	555,068	10.65 %
Total		3,637,632	100.00 %	5,210,128	100.00 %

b. Market share

According to Taiwan Semiconductor Industry Association (TSIA) in reference to IEK (Industrial and Technology Research and Institution), Taiwan semiconductor IC industry revenue (including design, manufacturing packaging, and testing) totaled 4.84 trillion in NTD. ASPEED 2022 revenue was 52.1 billion NTD which accounts for 0.1% of Taiwan semiconductor industry. Rough estimates of the market share of each product are as follows:

(I) Multimedia IC

According the 2022 Digitimes Research, worldwide server shipment was 18.045 million. Every motherboard needs at least one BMC, so the total number of BMCs shipped worldwide in 2022 was about 18.045 million. The Company shipped 15.254 million BMCs in 2022, so our market share was about 85%. We need to take in account customers' safety stock level in 2022. According to the demand situation in 2022, about 10%~15% of the shipment are for inventory. Se believe ASPEED's reasonable market share should be about 70%.

(II) Computer peripherals IC

According to IEK (Industrial Technology Research Institute), demand in stadiums, upgrade in the train stations, vending machines, indoor and

outdoor panels will continue to drive the growth of digital signage solution. Visual and interactive solution especially facial recognition will be one of the important key factor to adopt digital signage.

With the rise of IoT and Big Data, the retail industry has gradually entered the era of smart retail, including the use of digital electronic signage, integrated IoT with AI systems, camera and facial recognition for analysis. Retailers will invest in digital signage throughout 2020, both in developed and emerging markets, because of the benefits that digital signage offers, and we'll see more retail shops, business disseminate information that is crucial to their business.

(III) High-end consumer electronics IC

In 2021, AST1220 products officially enter the mass production stage in the video conferencing market. Brand customers in Europe, the United States, Japan and other markets have successively mass-produced products.

ASPEED's 2nd generation Cupola360 multi-image stitching video & audio SoC with a highly integration. Brand customers are evaluating and many international brands are designing-in. Expect to extend the applications into the market to bring a whole new innovative panoramic 360 degrees image integration technology.

Offering complete panoramic 360 degrees smart patrolling total solutions: Panoramic 360 degrees cameras and Cupola360+ Software Kit. International Smart Manufactories and smart cities in some countries are *gradually to evaluate to phase into new city infrastructure*.

c. Major Markets

(I) Multimedia IC

Following the popularization of mobile devices with Internet access, user behavior has overturned conventional business models. As innovative services create new trends, people's lives are now inseparable from cloud computing. The ratio of structural data has increased as the total amount of data doubled. Services with added value and extended benefits, such as big data or artificial intelligence applications, continue to increase hardware requirements. Cloud computing products are customized products that usually involve controls of national policy. Taiwanese companies utilize the production foundation for end products along with local cloud computing services to aid the deployment of local data center hardware or integration solutions. Taiwanese companies have worked together with North American companies for a long period of time, and have maintained close cooperation in response to the rapid growth of China's cloud market. At present, China's local cloud computing service providers still mainly focus on the domestic market, and will work together with traditional brands before they achieve economies of scale.

(II) Computer peripherals IC

According to forecasts of Digital Signage M2M research a total of total of 17 million LCD digital signage systems were shipped worldwide in 2019, and forecasted to ship 32 million in 2024 with CAGR of 13.8%. Commercial segment is estimated to hold largest market share in 2026 for advertising and content delivery. APAC is projected to become the largest geographical market by 2026.

(III) High-end consumer electronics IC

According to the latest report from Global Market Insights, by 2027, the overall market for video conferencing software, hardware and cloud services will reach \$75 billion. The CAGR from 2021 to 2027 is estimated to reach 23%.

The major market drivers come from below:

1. Growing demand for unified communication in the U.S. and Europe.
2. Increasing trend of work from home and online learning globally.
3. Demand for high-speed communication infrastructure in Asia Pacific.
4. Increasing trend for cloud applications in Latin America.
5. Rising need to reduce communication cost among organizations.

d. Competitive Advantage

- (I) ASPEED Technology has independent development abilities and is fully aware of the latest market trends

The Company has a professional R&D team with excellent design and development abilities, integrating 2D VGA, BMC, and KVM over IP technologies, which is unlike competitors that need to acquire IP licensing from IP design service providers. This enables the Company to develop products that meet market demands anytime in response to market developments. Furthermore, our ability to design cloud computing remote

management ICs for servers has gained recognition from Intel Capital, the global leader in the semiconductor industry. Intel Capital thus made a strategic investment to become a shareholder of ASPEED Technology, and will be able to offer advice on future development trends and market strategies, allowing us to stay up-to-date on the latest market trends.

(II) Long-term cooperation with semiconductor foundry service providers and business partners

Professional IC design companies rely almost entirely on foundry service providers, assembly houses and testing houses for product manufacturing. Hence, their process technologies, quality and yield, equipment capacity, and delivery speed are important factors to whether products are successful. The Company's good and close long-term relationships with semiconductor foundry service providers, business partners, and customers are key factors to its success.

The Company's main products are sold to server ODMs, and comprehensive product development services are provided to customers to help shorten their development time, or rapidly begin mass production of new products. We have met the demands of our customers with respect to quality, yield, and delivery, and it has enabled us to maintain long-term relationships, which is a key factor to our success in the industry.

(III) Excellent quality control

The Company obtained ISO 9001 2015 quality certification, which is a guarantee of our product quality. We have also installed ERP software on our operating system to integrate and mechanize all processes from receiving purchase orders, production, material procurement, inventory, quality management, to financial management. The software can immediately provide correct statistics and data analysis results for the managers of each department to understand and control processes anytime.

(IV) Having an international strategic partner

Furthermore, our ability to design cloud computing management ICs for servers has gained recognition from Intel Capital, the global leader in the semiconductor industry. Intel Capital thus became our strategy partner. Besides making a strategic investment to become a shareholder of ASPEED Technology, it will also be able to offer advice on future development trends and market strategies, allowing us to develop the right products to meet market demand.

e. Favorable Developments, Unfavorable Factors and Countermeasures

Favorable Developments

- (I) "Cloud" is the way of the future, and the corporate server market will flourish
Server market demand will be cut from various angles, including cloud, big data, artificial intelligence, Internet of Things (IoT), 5G applications and so on to create a faster and closer interconnection trend. These trends will also

multiply the importance and quantity of servers in a further step. This contains the following:

- 5G servers will open up new computing and network connectivity.
- Artificial intelligence is gradually taking shape, driving technology trends and transformation.
- Internet of Things Technology Development.
- Cloud Computing Moves to Edge Computing.
- Virtual Reality/Virtual Education, etc.
- Cloud Streaming Games.

(II) Designated supplier of major Internet service providers

The amount of Internet services has grown significantly in recent years. In addition to the rise of Google, the leading search engine, the influence of social media platform Facebook on millennials has also created immense business opportunities. Under the explosive growth of online information, the demand on server hardware will only increase. Besides existing server brands, the supply chain of server hardware is also beginning to accommodate customized requirements. Internet service providers will directly designate suppliers and then directly purchase assembled products from server ODMs. This will benefit the development of Taiwan's overall cloud supply chain, and we will work together with ODMs to find a suitable entry point.

(III) Comprehensive IC Manufacturing Infrastructure in Taiwan

The semiconductor industry is a capital and technology intensive industry, and in Taiwan, the industrial chain's upstream and downstream all have clearly defined roles. Following the rapid development of process technologies, semiconductor foundry service providers, assembly houses, and testing houses are constantly increasing their capital expenditures on facilities and technologies under their economies of scale. This continues to enhance the international competitiveness of their IC manufacturing abilities. As semiconductor foundry service providers, assembly houses, and testing houses become more specialized and achieve economies of scale, they are able to provide professional IC design companies with logistic support, e.g., advanced technologies and processes, flexible production scheduling, world class service quality, and rapid response ability, allowing them to seize opportunities for entering the market.

(IV) Market share of Taiwan's server motherboards

Taiwan has about 80% of global market share in the design and production of server motherboards. The Company enjoys this geographic advantage and is able to provide faster technical support and information access than competitors.

(V) Difficulty of developing key technologies for products and high barriers to entry

The Company's SoC (System on Chip) product development requires the ability to design ICs with digital, analog, and remote management functions,

and must develop controller firmware and server drivers based on server specifications, software system, and the integration functions of peripheral devices. This requires more advanced technologies, involves a wider range of fields, and therefore has higher barriers to entry than typical IC products. The Company is thus able to avoid bargaining or low-price competition from new competitors and maintain its profitability.

- (VI) High control over independently developed technologies provides greater flexibility for making product adjustments.

Unlike competitors that develop products through patent licensing, the Company is able to develop SoC products that integrate 2D VGA, BMC, and KVM over IP using its own technologies. Hence, the Company has relatively higher control over technologies that it has independently developed. Since the Company is a Taiwanese company, it is located in the same region as Taiwanese server suppliers. The Company is geographically closer, speaks the same language, has no time zone difference, and can rapidly provide technical support with less time spent on discussing technologies with customers. Due to the different platforms of server products, their demand on remote management functions are not entirely the same, and the functional requirements of data centers are not entirely the same as for conventional servers. The Company is able to quickly make adjustments based on customers' requirements when facing such differences between platforms.

The Company currently provides ICs with different functions for the latest generation products that are in mass production, and pins are compatible, so that customers can use the same design module for different server platforms, which also reduces customers' development costs.

Unfavorable Factors

- (I) Server virtualization

As cloud computing has doubled, servers are virtualizing and sharing system resources to increase system utilization. As a result, server growth has been far lower than cloud computing.

Countermeasures

BMCs can be applied in different markets, such as storage devices, high level adapters, and NAS.

- (II) Difficulty of training professional IC designers

Due to the large number of IC related competing industries, it has become growingly difficult to recruit outstanding talent, which is often very expensive. The Company needs to spend even more to strengthen employees' loyalty to the Company.

Countermeasures

The Company provides generous compensation and a wide range of thoughtful employee benefits, caring for employees in every possible way, while providing an excellent working environment that is fair, healthy,

pursues innovative R&D, and is performance based. We also implemented an employee stock option plan that allows employees to become shareholders and share the Company's profits, so as to attract outstanding talent.

(III) Exchange rate fluctuations

The Company's procurements and sales are all calculated in USD, so profits are highly affected by exchange rate fluctuations.

Countermeasures

- (a) The Company's Finance Department utilizes the natural hedging effect from procurements and sales both denominated in foreign currency.
- (b) Dedicated personnel closely follow exchange rate fluctuations, collect information on international exchange rate trends and exchange rate fluctuations, are fully aware of future trends in exchange rates, and keep in touch with the foreign exchange department of banks. After considering the professional advice provided by the departments and the Company's cash requirements, the personnel reduce risks by exchanging currency at appropriate times.
- (c) Depending on the position of foreign currency, hedging is carried out in accordance with the Operating Procedures "Procedures Governing the Acquisition or Disposition of Assets" when necessary.

(2) Key Product Applications and Manufacturing Processes

a. Key Product Applications

Product Series	Major Applications
Multimedia IC	ASPEED Server Management product lines are designed to enrich the basic feature set with 2D graphic controller, hardware monitoring capabilities, and iKVM function. Customer can select and implement from our Graphics & Remote Management Processors to best fit their design needs.
Computer peripherals IC	Our core technology includes display over IP, USB over IP and audio over IP. With our core technologies, we are able to support PC Extensions for application scenario such as PC-to-TV, PC centralization for Internet Cafe, and Enterprise PC over IP.
High-end consumer electronics IC	Applied to 360 degrees panoramic camera, immersive smart patrolling, video conferencing and making more innovative product and technology in camera applications .

b. Key Product Manufacturing Process

ASPEED Technology is a professional fabless IC design house that outsources the back-end design process involving IC layout and routing to design service companies after completing RTL design and verification. The turnkey service company is responsible for processes such as wafer foundry, packaging, and testing processes during mass production. It then delivers the products to ASPEED

Technology for IC system testing, and then the IC products are packaged and put in storage after their quality is further verified.

The flowchart below shows the process of developing an IC product:

(3) Supply of Essential Raw Materials

The Company is an IC Design house and all products are coordinated with mid- and down-stream companies through a turnkey service provider. Hence, when deciding on the turnkey service provider, besides considering the completeness of its silicon IP and APR (Auto Place & Route) technical capabilities, which foundry, assembly house and testing house it is in a strategic alliance with is even more important because the foundry's process technologies, quality and yield are key factors to whether or not a product is successful. Our current turnkey service provider provides raw materials and products in good condition and with stable quality.

(4) Major Suppliers Accounting for over 10% of the Annual Total Purchase in either 2021 or 2022

Unit: NT\$1,000

2021				2022			
Supplier	Amount Purchase	% of Total Purchases	Relations	Supplier	Amount Purchase	% of Total Purchases	Relations
A	1,068,339	92.39%	None	A	1,781,046	88.95%	None
B	84,754	7.33%	Note	B	200,474	10.01%	None
Other	3,305	0.28%	None	Other	20,853	1.04%	None
Total	1,156,398	100.00%		Total	2,002,373	100.00%	

Note: Investor with significant influence (non-related party since February 26, 2021).

Reasons for changes:

ASPEED purchases chips from a foundry through a turnkey service provider. Since foundries are technology and capital intensive, only a few companies provide such services and maintains long-term relationships with suppliers.

(5) Major Customers Accounting for over 10% of the Annual Total Sales in either 2021 or 2022

Unit: NT\$1,000

2021				2022			
Customer	Amount Revenue	% of Total Revenue	Relations	Customer	Amount Revenue	% of Total Revenue	Relations
A	661,271	18.18%	None	A	878,024	16.85%	None
B	407,221	11.19%	None	B	610,074	11.71%	None
C	293,596	8.07%	None	C	499,828	9.60%	None
D	363,936	10.00%	None	D	449,268	8.62%	None
E	248,946	6.84%	None	E	442,349	8.49%	None
Other	1,662,662	45.72%	None	Other	2,330,585	44.73%	None
Total	3,637,632	100.00%		Total	5,210,128	100.00%	

(6) Production Volume and Value in the Past Two Years: Not applicable.

The Company does not manufacture chips. "Production Capacity" is not applicable as the ASPEED Group outsourced manufacturing procedures to wafer foundry, packaging and testing plants.

(7) Sales Volume and Value in the Past Two Years

Unit: 1,000PCS/NT\$1,000

Year and Major Products	2021				2022			
	Domestic		Exports		Domestic		Exports	
	Volume	Value	Volume	Value	Volume	Value	Volume	Value
Multimedia IC	6,419	1,740,349	6,475	1,652,058	7,789	2,511,284	7,465	2,352,331
Computer peripherals IC	346	220,687	7	4,673	441	324,690	22	13,468
Other	43	18,900	-	965	11	6,458	3	1,897
Total	6,808	1,979,936	6,482	1,657,696	8,241	2,842,432	7,490	2,367,696

3. Employees

Unit: Person/%

Year		2021	2022	2023 (As of April 01)
Number of Employees	R&D	68	74	77
	Sales and Management	28	32	34
	Total	96	106	111
Average Age		38.97	40.32	40.89
Average Years of Service		5.37	5.78	5.27
Education	Doctoral	2.08%	2.83%	2.70%
	Master	67.71%	70.75%	71.17%
	Bachelor	30.21%	26.42%	26.13%
	High School	—	—	—

4. Environmental Protection Expenditure

ASPEED Group's scope of business includes IC R&D, testing and sales, and focuses on product development and market sales. All products are manufactured through a turnkey service provider, so ASPEED Group does not cause any environmental pollution and is therefore not required to apply for a pollution control facility permit or pollutant emission permit, pay a pollution control fee, or establish a dedicated unit or personnel for environmental protection.

5. Labor-Management Relations

(1) The Group's employee welfare program, training and development, and retirement policy and settlement between employees and the employer

a. Labor Benefits and Welfare Program

ASPEED Group established the Staff Welfare Committee in accordance with laws and regulations, and makes monthly contributions to the Staff Welfare Fund, which is used by the Staff Welfare Committee to provide the following benefits: Employee trips, cultural and health activities, emergency aid, health exams, and gift certificates for Chinese New Year's. Benefits are also provided for marriage, childbirth, and funerals (condolence money). ASPEED Group also provides employee education and training, employee stock subscription, and bonuses. Furthermore, besides enrolling employees in the Labor Insurance and National Health Insurance in accordance with the Labor Standards Act and related laws and

regulations, the Company also provides employees with group medical insurance and travel insurance for even greater protection.

b. Training and Development

ASPEED Technology provides employees with continuing education, utilizing both internal and external on-the-job training resources. With various learning resources and channels to encourage employees to do training for self-improvement to further uplift their performance and potential.

In order to enable the effective training plans which meet employees' requirements of general, professional, and management course as well, ASPEED Technology provides a diverse network of learning resources, including on-the-job training, classroom training, e-learning, mentoring, to realign and refresh its workforce skill set and are a useful tool for motivating and re-energizing employees morale. Company training will continue to be part of companies' strategies to achieve competitive advantage.

ASPEED's training programs include:

- New employee training
Designed to meet each department's requirement, ASPEED introduce a senior mentor program for new employees, providing assistance in life and work techniques for them to quickly adapt to the environment.
- General Training
To provide trainings on general subjects for all employees, or the trainings required by government regulations to enable employees to fit in the environment and meet business goal as soon as possible.
- Professional Skill Training
Identify the professional training needs of each department, and provide the training to employees to strengthen their professional competence.
- Management Skill Training
For potential employees with management talents, ASPEED provide training courses to establish management thinking, cultivate strategic analysis and planning capabilities for organization development and team operations.
- Celebrity Lectures
The series of lectures provide the opportunity for employees to hear from a top thought leader in various fields to broaden their horizons.
- Workshop
Through experiential learning, employees can learn how to implement theoretical management theory to practical daily work, hence high performance can be achieved.
- Self-Study and Development
ASPEED offers an open and diversified platform for employees to access unlimited online courses which suitable for their professions. For external training courses, ASPEED also full subsidized the tuition for employees to participate in external training courses.

c. Retirement Systems

ASPEED Group established Regulations for Employee Retirement in accordance with the Labor Standards Act, and makes monthly contributions to employees' personal accounts at the Bureau of Labor Insurance in accordance with the Labor Pension Act if they select the new labor pension plan.

d. Negotiation and settlement between Interest of Employees and Management

The ASPEED Group emphasizes the right to know and therefore convenes quarterly business performance meetings and labor-management meetings, which allow employees to understand the Company's business performance and future plans. The ASPEED Group takes employees' opinions very seriously and encourages employees to offer their advice, which it uses as the basis for improving its management and benefits system. It is for this reason that labor and management are on good terms and there have been no litigations or matters requiring negotiation between labor and management.

(2) Losses incurred by Labor Disputes in recent years as at the Date of Print for Annual Report 2021

The ASPEED Group ensures that the relationship among employees and managements are harmonious by maintaining effective two-way communication channels at all times. No labor disputes were occurred in the past.

6. Cyber security management

(1) The cyber security risk management framework, cyber security policies, concrete management programs, and investments in resources for cyber security management

For business to proceed smoothly and to ensure confidentiality, integrity, and availability, ASPEED Technology formulated an information security policy that all employees must follow.

a. Information Security Policy

- Strengthen information security management systems and acquire third party certification.
- Strengthen information security and prevent hacker, virus, and extortion attacks.
- Implement an information and data backup plan that involves local and remote storage.
- Effective management of information assets, including continuing to implement risk analysis and adopting suitable prevention measures.
- Protect information systems to prevent unauthorized access and maintain confidentiality.
- Prevent unauthorized changes to protect the integrity of the information system.
- Ensure that authorized users can access information systems when needed.
- Adhere to all information rules and regulations.

- Establish disaster recovery plans for core information systems so that operations can continue after a manmade or natural disaster.
- Strengthen information security education and training to raise employee information security awareness.
- Establish information security management and advocacy programs for suppliers.
- Conduct audits and manage the review process to ensure continued improvements to information security management systems.

b. Information Security Objectives

- In 2021, the Company plans to adopt a new information security management system and pass thirdparty certification (ISO 27001), with certification expected to be awarded in 2022.
- At the end of September 2021, the Company completed integration of Cortex XDR 2.0 to stop hacking, virus, and extortion attacks.
- Achieve information system reliability of at least 99.99% (hours of interrupted service/total usage hours \leq 0.01%).
- Achieve 100% rate of compliance with rules regarding reporting, response, and recovery following information security incidents.
- Complete information security education and training (once per year).
- No more than two data breaches affecting the Company's information systems in a year.
- Respond to legal and external technological changes in a timely manner by revising information security and maintenance procedures to avoid any attacks, including unauthorized access, use, control, leaks, damage, changes, or destruction, with the aim of ensuring confidentiality, integrity, and availability.
- Enhance supplier selection, monitoring, and management while rigorously reviewing commissioned contracts in order to confirm that supplier relations information is secure. Raise information security awareness among Company employees to effectively detect and prevent external attacks.

c. Information Security and Data Protection

As part of a commitment to managing information security, ASPEED Technology designated operating procedures for administrative management of information and operating procedures for software/hardware management. These procedures reduce information security risks in our network, protect personal information and customer privacy, and uphold the rights and interests of stakeholders. At the same time, we actively publicize information security measures to raise awareness among employees.

For internal management, ASPEED Technology established a comprehensive internet and computing security network to maintain vital corporate functions, such as manufacturing operations, procurement and sales, and accounting. The Company periodically reviews and assesses cybersecurity architecture to ensure adequacy and effectiveness. Besides enhancing efficiency and backing up important information stored in our databases, in an evolving landscape of

internet security threats, the Company must protect computer systems to prevent external network attacks that can cripple our systems. These measures prevent theft or hacking attacks on our trade secrets, intellectual property, and confidential information.

For external suppliers and cooperative partners, ASPEED Technology achieves mutual assurance of information confidentiality by periodically confirming that suppliers have comprehensive information security management and backup plans in place. Furthermore, ASPEED Technology protects confidentiality by requiring 100% of employees to sign a nondisclosure agreement. For some projects and cases cooperative partners must also sign an NDA to guarantee that each parties' information is protected.

- (2) Losses suffered by the company in the most recent fiscal year and up to the annual report publication date due to significant cyber security incidents, the possible impacts therefrom, and measures being or to be taken. If a reasonable estimate cannot be made, an explanation of the facts of why it cannot be made shall be provided

In 2020, ASPEED Technology was not aware of any material information security incidents or cyberattacks, nor had it been involved in any legal proceedings or regulatory investigations related thereof. The audit and assurance firm Deloitte conducted an information operations audit on the Company in 2020 that covered the following areas: understanding the customer's computer processing environment, general computer controls, and application system automated controls. It did not uncover any problems. To further strengthen risk management, ASPEED Technology plans to introduce an ISO 27001 Information Security Management plan starting in June 2021 and to complete certification in 2022. At the end of September 2021, the Company completed integration of Cortex XDR 2.0 to prevent hacking, virus, and extortion attacks. In 2020, the Risk Management Team reviewed and reformulated the Company's information security policies and made plans to change irregular information security education and training into an annual event to further strengthen information security awareness. Our aim is for ASPEED Technology's information security management to provide a more secure environment for employees, customers, suppliers, and cooperative partners.

7. Material Contracts

Agreement Type	Counterparty	Term	Summary	Restriction
Factory lease agreement	Taiwan Fertilizer Co., Ltd.	2019/09/01~2024/08/31	Factory lease agreement (4F., No. 1, Sec. 3, Gongdao 5th Rd., East Dist., Hsinchu City)	None
Factory lease agreement	Cathay Life Insurance Co., Ltd.	2021/10/01~2024/09/30	Factory lease agreement (5F, No. 16, Sec. 4, Nanjing East Road, Taipei)	None
Loan	Mega International Commercial Bank Hsinchu Science Park Hsin-an Branch	2022/06/23~2023/06/22	2021 Credit agreement/Credit limit of NT\$500,000,000	None
Loan	Hua Nan Commercial Bank Zhubei Branch	2022/05/20~2023/05/20	2021 Credit agreement/Credit limit of NT\$500,000,000	None
Loan	CTBC Bank Dunbei Branch	2022/06/30~2023/06/30	2021 Credit agreement/Credit limit of NT\$500,000,000	None
Loan	E.SUN Bank Hsinchu Branch	2022/05/10~2023/05/10	2021 Credit agreement/Credit limit of NT\$150,000,000	None
Loan	International Bills Finance Corporation	2023/02/14~2024/02/13	2021 Credit agreement/Credit limit of NT\$150,000,000	None
Commercial fire insurance	Fubon Insurance	2022/11/21~2023/11/21	2021 Commercial fire insurance/Total insurance amount of NT\$386,713 thousand	None

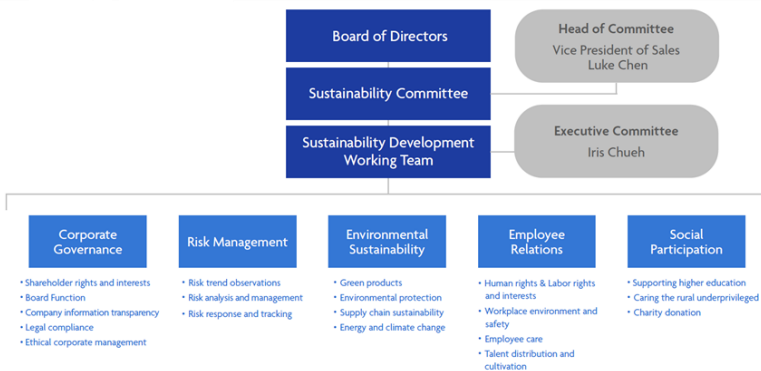

VI. Sustainability

ASPEED Technology firmly believes that business success and growth depend on the interplay of operational management with the pursuit of a sustainable development vision. As a leading fabless IC design company, we are committed to using green innovation, environmental sustainability, and social prosperity as objectives in the shared pursuit of sustainable development. At the same time, we steadfastly lead our employees, customers, suppliers & contractors, society, and other stakeholders in sharing the benefits of sustainability in this rapidly changing and competitive industry.

1. Sustainability Committee

In 2012 ASPEED Technology approved the “Corporate Social Responsibility Best Practice Principles,” developed the corporate responsibility principles and revised annually according to the situation of corporate social responsibility and Sustainable Development Best Practice Principles for TWSE/TPEX Listed Companies. Recognizing the need for sustainable development in the corporate framework, in 2021 the Company revised the CSR Working Team to Sustainability Committee as a new functional committee under the Board of Directors. Led and convened by the vice

president of sales, the committee shall supervise and make decisions on sustainability-related issues while reporting on implementation of sustainability to the Board of Directors biannually. Under the committee will be the Sustainability Development Working Team, which will include the marketing and PR manager as executive committee and oversee five work teams: corporate governance, risk management, environmental sustainability, employee relations, and social participation. The Working Team will be responsible for overall implementation, including compiling stakeholder-related topics and promoting sustainability issues, and shall meet biannually with each work team to report on implementation status and future planning.

2. Identification of Stakeholders and Communication

ASPEED Technology's CSR Working Team identifies and evaluates core stakeholders based on the business and interactions of each department, pursuant to the five principles of the AA1000 Stakeholder Engagement Standard (AA1000 SES): Responsibility, Influence, Dependency, Tension, and Diverse Perspectives. In 2020, nine key stakeholders were ultimately identified as priority targets for engagement: employees, shareholders & investors, customers, suppliers, government agencies, media, public welfare organizations, academic research organizations, and partners.

Stakeholders	Communication Frequency	Topics of Concern
Employees	<ul style="list-style-type: none"> - Opinions mailbox: hr@aspeedtech.com (regular) - Labor-management coordination meeting (quarterly) - Meeting of Employee Welfare Committee (quarterly) - Manager discussions (biannual) - Employee satisfaction survey (annually) - Expressing opinions at the end of the year (annually) 	<ul style="list-style-type: none"> - Operational achievements and financial performance - Compensation and employee care - Talent recruitment and cultivation - Community contributions and social participation
Shareholders/ Investors	<ul style="list-style-type: none"> - Investor relations email address: ir@aspeedtech.com - Shareholders' meeting (annually) - Investors' conferences (ad hoc) 	<ul style="list-style-type: none"> - Corporate governance and ethical corporate management - Legal compliance - R&D innovations and technological improvements - Operational achievements and financial performance - Risk management
Customers	<ul style="list-style-type: none"> - Customer contact email address: sales@aspeedtech.com - Customer satisfaction survey (annually) - Sales interviews and interactions (ad hoc) 	<ul style="list-style-type: none"> - Customer privacy and confidentiality measures - Product quality and customer satisfaction - Legal compliance - R&D innovations and technological improvements - Sustainable supply chain management - Response to international organizations and initiatives - Management of hazardous substances and chemical products

3. Risk Management

1. Risk Management Policy

ASPEED Technology is a fabless IC design company. Having adopted a “fabless lite” operational model, our workforce primarily consists of R&D personnel, management and marketing staff, and administrators. We do not routinely engage in foundry production processes. Changes to the global economic environment and the potential internal and external operational impacts of sustainability risks underscore the importance of preventing problems before they emerge. Knowing how to avoid problems and respond to risk is critical. ASPEED Technology therefore formulated the Risk Management Policy, which uses corporate governance, environmental, and social topics as a foundation to identify risks that could have an impact on the Company’s sustainable development. The Company then crafts follow-up response strategies that are in line with primary areas of concern for our stakeholders as well as international trends.

2. Major Risk Management and Structure

ASPEED Technology established risk management units that are overseen by the Sustainability Committee, under the Board of Directors. After considering various business continuity standard requests and following internal evaluations, the risk management units implement control and management measures. The management framework primarily involves monitoring, analysis, and confirmation of risks by finance, business, administration, environment & safety, and information security units. They then report on these risks to management and launch response mechanisms. Investor

relations, media relations, and public relations staff communicate these issues externally at the appropriate time in order to ease any concerns of stakeholders. By identifying risks, managing organizational and operational risks, and formulating countermeasures, related staff members play a critical role in risk control. Also, after considering the potential impact of various risks on business continuity, the Company formulated the Business Continuity Plan. When a risk emerges or an unexpected event occurs, the plan minimizes the impact. Normal operations can then resume as quickly as possible, limiting any potential losses to customers' rights and interests.

- The Risk Management Team, which is under the CSR Working Team, is responsible for identifying risk factors related to business operations.
- Assess the impact of risk factors on business operations. Also formulate countermeasures for handling risks that could have a significant impact on operations.
- Track risk management items and report to the Board of Directors on a biannual basis.

3. Risk Identification

ASPEED Technology carries out risk identification, analysis, evaluation, response, and tracking based on the Company's internal organization and core business as well as external environmental conditions. Scope covers corporate governance, environmental, and social aspects and other sustainable development areas. In 2022, five material risk factors we identified were: interest rate & exchange rate fluctuation, research and development and intellectual property protection, supply chain management, information security, and facility management & disaster response. For each risk factor we formulate emergency response management processes to ensure that when a disaster or other event that has a major impact on the business does occur, we can maintain operations at an acceptable level and have a path to recovery. These measures protect the rights and interests of our customers and stakeholders.

Type	Risk Factor Explanation	Responsible Unit	Management Strategies
Market Risk	<ul style="list-style-type: none"> - Impact of interest rate and foreign currency exchange rate changes on income and expenditures 	<ul style="list-style-type: none"> - Financial Unit 	<ul style="list-style-type: none"> - Long-term monitoring of international conditions and investment markets. Follow appropriate risk standards when evaluating investments and hedging interest and foreign exchange rates.

4. Information Security Risk Management

1. Information Security & Data Protection

As part of a commitment to managing information security, ASPEED Technology designated operating procedures for administrative management of information and operating procedures for software/ hardware management. Since 2021, the Company has gradually adjusted these procedures based on current needs. Following adjustments and integration, the procedures became the Information Security Policy and 23 information security-related standards. These standards manage and protect the Company's information security and reduce information security risks in our network, in order to protect personal information and customer privacy, and uphold the rights and interests of stakeholders. At the same time, the Company actively publicizes information security measures to raise awareness among employees.

For internal management, ASPEED Technology established a comprehensive internet and computing security network to maintain vital corporate functions, such as manufacturing operations, procurement and sales, and accounting. The Company periodically reviews and assesses cybersecurity architecture to ensure adequacy and effectiveness. Besides enhancing efficiency and backing up important information stored in our databases, in an evolving landscape of internet security threats, the Company must protect computer systems to prevent external network attacks that can cripple our systems. These measures prevent theft or hacking attacks on our trade secrets, intellectual property, and confidential information. For external suppliers and cooperative partners, ASPEED Technology achieves mutual assurance of information confidentiality by periodically confirming that suppliers have comprehensive information security management and backup plans in place. Furthermore, ASPEED Technology protects confidentiality by requiring 100% of employees to sign a nondisclosure agreement, and use the software legally. For some projects and cases cooperative partners must also sign an NDA to guarantee that each parties' information is protected.

In 2022, ASPEED Technology was not aware of any material information security incidents or cyberattacks, nor had it been involved in any legal proceedings or regulatory investigations related thereof. To further strengthen risk management, ASPEED Technology has introduced an ISO 27001 Information Security Management

plan starting in June 2021 and completed certification in 2022. Also, the Company completed integration of Cortex XDR 2.0 to prevent hacking, virus, and extortion attacks. In 2022, the Risk Management Team reviewed and reformulated the Company’s information security policies and made plans to change irregular information security education and training into an annual event to further strengthen information security awareness. Our aim is for ASPEED Technology’s information security management to provide a more secure environment for employees, customers, suppliers, and cooperative partners.

2.Information Security Policy and Goals

For business to proceed smoothly and to ensure confidentiality, integrity, and availability, ASPEED Technology formulated an information security policy that all employees must follow.

3.Information Security Management Methods

To evaluate whether information security management goals are met, ASPEED Technology adopted the following management methods:

Information Security Policy	<ul style="list-style-type: none">• Strengthen information security management systems and acquire third party certification.• Strengthen information security and prevent hacker, virus, and extortion attacks.• Implement an information and data backup plan that involves local and remote storage.• Effective management of information assets, including continuing to implement risk analysis and adopting suitable prevention measures.• Protect information systems to prevent unauthorized access and maintain confidentiality.• Prevent unauthorized changes to protect the integrity of the information system.• Ensure that authorized users can access information systems when needed.• Adhere to all information rules and regulations.• Establish disaster recovery plans for core information systems so that operations can continue after a manmade or natural disaster.• Strengthen information security education and training to raise employee information security awareness.• Establish information security management and advocacy programs for suppliers.• Conduct audits and manage the review process to ensure continued improvements to information security management systems.
-----------------------------	--

Quantitative Indicators	<ul style="list-style-type: none"> • To ensure information is secure, information can only be accessed after an authorized unit grants permission and confirms its confidentiality status. Each year there shall be zero cases of restricted or confidential information leaks. • To ensure accuracy and integrity of customers' products and data, each year there shall be zero cases of unauthorized information alterations. • To ensure continuity of the Company's information operations and services, drills and operations to safeguard continuity plans are conducted at least once a year. • To investigate how information security incidents can cause system, processor, or network abnormalities that interrupt operations and services, the Company's information services availability must meet the following requirements: <ol style="list-style-type: none"> 1. Basic operational service time shall be at least 99% of annual working hours. 2. Interruption of key services shall not be more than three times per quarter; each interruption shall not be more than four working hours. • To ensure that the Company's information security measures and regulations meet current laws, regulations, and contractual requirements, each year the Company shall conduct at least one internal audit.
Qualitative Indicators	<ul style="list-style-type: none"> • Regularly review the authority of the Company's information security organization staff to ensure the implementation of related duties. • Provide information security training that is suited to employees' position and responsibilities. • Strengthen the Company's environmental safety; adopt suitable protection and authority control measures. • Ensure that information is not inadvertently leaked or sent to unauthorized third parties. • Strengthen access controls to prevent unauthorized access and ensure that the Company's information has an appropriate level of protection. • Consider security needs when conducting routine monitoring of information systems and safety management of system vulnerabilities. • Confirm that all information security incidents and security vulnerabilities are reported to management via appropriate channels and that suitable investigation and treatment follows.

5. Supply Chain Management

ASPEED Technology's suppliers can be divided into two main categories: critical suppliers and general business suppliers. Critical suppliers provide main raw materials, production, and testing. Considering the importance of this group towards the Company's operations, we only choose world-class Tier 1 manufacturers and suppliers and confirm that they meet our standards for social responsibility, green environmental protection, occupational safety and health, labor rights, and human rights. They must follow the Code of Conduct-Responsible Business Alliance, and priority shall be given to suppliers that pass ISO9001, ISO14001, or ISO45001 certification. In addition, the Company requests that suppliers produce and publicly release annual sustainable management reports to support audits and assessments. The Company also monitors to see whether the suppliers have any incidents that cause reputational damage or face any fines from international customers.

1. Supplier Audit Management

ASPEED Technology conducts annual onsite or written supplier assessments. Suppliers must score at least 75 points to pass; those who fail must make improvements within a limited time period then apply for reassessment. If a supplier fails reassessment it no longer qualifies to be a supplier of the Company. The assessment process includes quality control, design procedures and management, document records, storage, and inspections, as well as green product management and ESG. If a serious quality problem occurs with an approved supplier, ASPEED Technology increases the proportion of sampling tests in accordance with the inspection and testing management procedures. Rigorous reviews continue until improvements are completed. If following guidance, a supplier is still unable to make expected improvements the supplier loses its supplier qualification.

ASPEED Technology supported the Company's green pledge, human rights protection, and conflict-free minerals policy by issuing a public statement on the corporate website proclaiming that the Company and the Company's suppliers shall uphold their social and environmental protection responsibilities. They shall not accept minerals from conflict zones or illegal mines. The Company required that all suppliers commit to implementing these measures. Since 2020, ASPEED Technology requests all supplier strictly follow international standard to implement their social responsibility and also to sign the agreement of corporate social responsibility commitment as well.

2. Declaration of Minerals Conflict-Free

To manage the Company's conflict-free minerals policy, ASPEED Technology supports the "responsible minerals procurement" position. ASPEED Technology shares the Company's conflict-free minerals policy with suppliers and insists on full compliance. Each year the Company examines suppliers' Conflict Minerals Reporting Template (CMRT). Suppliers must identify their smelting source. All of their purchases must be made from conflict-free and qualified mineral suppliers, and they

shall faithfully disclose their conflict minerals information. Compliance is included in annual supplier evaluations, which enables us to implement our conflict-free procurement program. Suppliers shall also sign ASPEED Technology's corporate social responsibility pledge and confirm that they will adhere to its conflict-free minerals policy. In the event that we discover that products or raw materials from suppliers contain conflict minerals from non-qualified sources, we take the necessary measures to stop use. ASPEED Technology issued a public declaration of support for responsible minerals procurement on the Company's corporate website and seeks to fully implement this social responsibility. In 2022, there were not any incidents of the Company's suppliers using conflict minerals.

3. RBA Code of Conduct

To comply with the RBA Code of Conduct, ASPEED Technology is committed to ensuring that working conditions at the Company and in the Company's supply chain are safe; that workers have a safe and healthy work environment and are treated with respect and dignity; and that business operations are environmentally responsible and conducted ethically.

6. Green Environment

1. Environmental Management Policy

- Fully implement ISO 14001:2015 Environmental Management Systems
- Create procedures related to environmental management
- Raise environmental awareness, and full participation
- Record and publicly report the GHG emission, water withdrawal, and waste management

Since passing ISO 14001 environmental management systems certification in 2017, each year ASPEED Technology has systematically managed the Company's internal environmental protection system. The Company built a routine environmental management system and established procedures for making improvements. In addition, the Corporate Sustainability Committee meets biannually. The committee examines environmental protection trends and regulations, and fully implements the Company's environmental management policies, in order to meet shareholders' expectations towards the Company. As a fabless IC design Company, internal environmental management primarily focuses on general water and electricity use, waste disposal and management, and green product specifications. Externally, the Company focuses on expansion of sustainable supply chain management. ASPEED Technology makes every effort to join suppliers in implementing environmental management.

Year	GHG emission		Water Use		Industrial Waste (Kg)
	Emissions (metric tons of CO2e)	GHG Emission Intensity (metric tons of CO2e/million piece)	Water Use (metric tons)	Water Use Intensity (metric tons/million piece)	
2019	177.66	0.33	892	101.24	261.8
2020	271.66	0.21	3531	307.93	139.3
2021	8718	655.98	2,572	193.53	36.3

*Average fuel consumed during business travel is assumed as 10km/L.

*Conversion factors are based on the Environmental Protection Administration's Greenhouse Gas Emission Factor Table, version 6.0.4.

*GHG emissions intensity data are calculated based on the Company's yearly product deliveries (Unit: millions of pieces). The internal GHG inventory in 2019 and 2020 only included scope 1 and scope 2, hence the significant difference in 2021.

*Discrepancies between 2019 and 2020 industrial waste and the numbers disclosed in the 2020 Sustainability Report are primarily due to the addition of IC waste and declared weight of computer equipment.

Emissions of Scope 1 and Scope 2 in 2021

Type of GHG	Emission (tCO ₂ e)	Total Emission (tCO ₂ e)
CO ₂	301.29	310.2
CH ₄	6.51	
N ₂ O	0.23	
HFCs	2.17	
SF ₆	0	
NF ₃	0	
PFCs	0	

2. Green Breakthrough

To support environmental protection and energy savings, on the supplier side ASPEED Technology seeks to strengthen supplier management and reduce environmental risk by suppliers. Internally, the Company seeks to design more energy efficient products. Companies that use our BMC SoC in data centers can reduce their cloud service computing costs, energy use, and carbon emissions, contributing towards our goal of reducing overall carbon production in the industry. In product applications, using the electricity consumed by the first-generation BMC AST2000 at 80% workload as a benchmark, every new generation of BMC achieves the same level of performance with lower energy consumption.

For example, on average over the course of a year our 2020 AST2600 7th generation BMC SoC can achieve the same work output as the AST2000 1st generation model with 93.21% lower energy use. Meanwhile the 7th generation AST2600 BMC SoC is 61.34% more efficient than the 6th generation AST2500 model. In 2021, compare the deliveries of the main product of ASPEED

Technology, AST2600, to AST2000, the electricity usage is 94,380,621 kwh less, approximately equal to 47,379.07 metric tons of carbon emissions, or about the equivalent of the carbon absorbency of 61,315 acres of U.S. forests in one year. If compare to AST 2500, AST2600 can reduce 5,981.00 metric tons of carbon emissions, or about the equivalent of the carbon absorbency of 7,078 acres of U.S. forests in one year.

*Based on the 2021 electricity carbon emission factor of 0.509 kg of CO₂e per kWh, as announced by the Bureau of Energy, Ministry of Economic Affairs

*Used 2021 AST2600 deliveries to calculate total carbon emissions savings for the year

*Used the Greenhouse Gas Equivalencies Calculator, from the US Environmental Protection Agency, to calculate carbon absorption capacity

7. Employee Welfare

1. Compliance with International Human Rights Norms

ASPEED Technology scrupulously abides by the laws and regulations of each location it operates while following the principles of international human rights conventions, including upholding employees' freedom to form associations and opposing any behaviors that infringe on or violate people's rights. In employment, the Company opposes any form of discrimination. Employees shall not be discriminated against on the basis of their race, age, gender, sexual orientation, disability, maternity, politics, or religion. All employees sign a labor agreement in accordance with the law, and work regulations stipulate that employees' freedom to assemble or form associations shall not be infringed upon, child labor shall not be used, and there shall be no forced labor. These rules protect workers' basic human rights. If a special circumstance arises in Taiwan where the Company must terminate a labor agreement with an employee, the Company prepares and pays severance in accordance with the "Labor Standards Act." In 2022, the Company did not have any incidents of employing child laborers or forced labor, and did not receive any complaints related to human rights, child labor, or forced labor.

2. Employee Care and Communications Channels

Employees are the most valuable resource of ASPEED Technology. We have a high-quality labor force that we provide with comprehensive employee welfare benefits. We care for our employees and their households while supporting their lifestyles. By conscientiously heeding employee opinions, we use communication as a bridge for connecting employees' work with the Company vision. Employees build trust with one another, which encourages joint hard work and continued growth. ASPEED Technology's organizational framework has a linear design that supports internal free flow of opinions and open communications channels. Employees share their opinions at the end of each year in Company satisfaction surveys as well as labor management meetings, digital mailboxes, and through the Employee Welfare Committee. These channels make it easy for employees to share their thoughts with the Company, so that the responsible Company unit can offer a timely response, fostering positive interaction and trust between labor and management. Creating a seamless communication culture and an active, enlightened work environment enables us to better guarantee workers' rights and interests. In order to provide employees with a smooth and confidential communications channel, ASPEED Technology started to create a whistleblower system in 2022 and it is expected to be completed in the first half of 2023.

Channel	Contents	Frequency
Digital mailbox	Any opinions or topics relating to the Company	Ad Hoc
Labor management meeting	Labor-management relations, labor conditions	Quarterly
Employee welfare committee	Employee welfare topics	Quarterly
Manager discussions	Work performance, goals and plans, career development	Biannual
Employee satisfaction survey	Corporate environment, administrative affairs support, various welfare activities, and open questions about anything else relating to the Company	Yearly
Annual prospect meeting	Company performance and communication of coming year goals 、employees feedbacks	Yearly

3. Compensation and Employee Welfare

ASPEED Technology provides employees with an excellent work environment. Using a people oriented management approach, the Company respects employees' autonomy and offers compensation that is competitive on the open market and fair based on internal standards while providing diverse, meaningful benefits that consolidate team spirit, so that we can grow together.

After moving our Company headquarters to the Taiwan Fertilizer building in 2020 and giving employees a more comfortable office environment, in 2021 ASPEED Technology raised the guaranteed salary for all employees by increasing the number of guaranteed paid months' salary from 14 to 15 months per year. The Company's wage adjustment mechanism shows employees how deeply the Company values employee retention.

In 2021, the Company spent NT\$344 million on employee welfare fees, which was an increase of 19.44% compared to 2020. Total salary of non-managerial, fulltime employees was NT\$234 million, for a large year-on-year increase of 27.17%, and average salary was NT\$2,831 million. We ranked 13th among listed firms in 2021 for average salary of non-management employees. In the future we will continue to provide more comprehensive salary and welfare packages.

➤ **Designing a Performance-based Compensation System**

ASPEED Technology's incentives system was designed to support the Company's operational goals and was formulated based on our employees' duties, professional knowledge and skills, and performance. The Company's employee assessments are 100% individual based, and employee rewards include the stipulation that at least 8% of the Company's annual profits (if any) shall be distributed to employees as a bonus, which exceeds the standard of distributing at least 1% of annual profits as bonuses that is generally followed by other companies. Salary raises and bonuses shall also reflect employee performance, in order for our compensation system to have a stronger impact on the Company. We want to encourage employees to demonstrate team spirit and show cooperation, so they can find innovative ways to generate more profits to share in the future.

To examine employees' development and work performance results, ASPEED Technology established an employee performance management system. Separate assessments are conducted for new employees during their trial period and all employees for their annual performance review. Every employee who reported before October 31st of the previous year, apart from those on fixed-term contracts, must participate in the performance reviews regardless of gender, age, or work category. Employees' managers and colleagues review goal fulfillment as well as the values and capabilities that employees bring to their future career planning. Together, they reach agreement on key areas of development to make personalized improvement recommendations that support career development planning.

➤ **Birth Incentives/Parental Leave**

In accordance with the "Labor Standards Act," ASPEED Technology's "Worker attendance and leave rules" state that the Company shall not terminate an employee's labor contract when the employee is on parental leave. Female workers qualify for a combined total of 56 days of maternity leave before and after childbirth. An employee may take five days paid leave during a spouse's pregnancy or within 15 days before, after, or on the

day of birth (miscarriage). The Staff Welfare Committee provides birth gifts to congratulate the addition of a new member to an employee's family. Employees who need to provide child care can apply for parental leave. Since the Company offers flexible work hours, employees can arrange their schedules in a way that helps them to care for their families.

- **Comprehensive Employee Insurance Plan**
Besides enrolling employees in the government-mandated Labor Insurance and National Health Insurance, the Company also provides employees with comprehensive group insurance that covers life, major illness, accident and injury, medical, cancer, and disaster. When employees face an unexpected major illness or accident, they can receive comprehensive medical care, financial support, and economic protection. In 2021, the Company added vaccine insurance to the group insurance plan, so that employees and their families could receive comprehensive health care and financial support in the event of an unpredicted, serious sickness or death. For employees who travel overseas for business, we offer high coverage travel insurance to provide even greater guarantees.
- **Retirement Planning**
ASPEED Technology established the "Regulations for Employee Retirement" in accordance with the "Labor Standards Act" and the "Labor Pension Act." Following enactment of the "Labor Pension Act" on July 1st, 2005, all employees adopted the new retirement system. For employees who use the new retirement system, every month the Company deposits 6% of their salary into their personal retirement account at the Bureau of Labor Insurance. We also assist in voluntary submission in accordance with the wishes of each employee.
- **Talent Development**
ASPEED Technology is a leading IC design company that has always relied on an innovative R&D team and cooperation with customers to provide the highest quality services and technologies. For talent management, we analyze each position to determine the needed knowledge, techniques, capabilities, and personality characteristics. We then formulate recruitment policies based on required core skills. At the same time, ASPEED Technology regularly holds school recruitment activities to connect and interact with our core targets while promoting the Company's image and expanding our influence. Summer internships, which offer flexible learning opportunities for students and an early experience of life in the workplace, help us to attract top quality talents. We also cooperate with the government by recruiting R&D substitute service members, which provides another steady source of talent for the Company. Besides active recruitment of new employees, ASPEED Technology cultivates internal talent. The Company consolidates internal and external resources to build a diverse, rich learning environment that favors continuing learning. Through

training and results-based mechanisms, we help employees and managers to examine past performance then use their insights to establish future work objectives and development guidelines. These become a foundation for learning development. We place great importance on employees' long-term career planning. By helping employees to open new directions of development and tap their individual potential, we help our employees to grow with the Company.

- New Employee Training: Designed to meet each department's requirements, ASPEED Technology introduced a senior mentor program for new employees. The program provides basic training and employment guidance to assist new employees in quickly adapting to the team.
- General Training: Skills training that embodies the core values of the Company and teaches employees knowledge they will routinely need in their everyday work and lives. Includes training required by government regulations and professional skills that employees must possess. Besides professional skills and classes, the Company considers general training classes that are needed as part of continuing education.
- Professional Skill Training: Identify the professional training needs of each department then provide to employees to strengthen their professional skills.
- Management Skill Training: For employees with management potential, the Company provides training courses to build management thinking, cultivate strategic analysis, and foster organizational planning capabilities. Our objective is continuity of organizational development and team operations.
- Celebrity Lectures: A series of lectures planned to provide opportunities for employees to hear from top thought leaders in various fields to broaden their horizons and inspire new thinking.
- Workshops: Through experiential learning, employees join situational activities to learn how to incorporate business management theory into their regular work, leading to higher quality, better results.
- Self-study and Development: We offers an open, diversified study platform for employees to access professional online courses that can raise their professional skills. The Company also fully subsidizes tuition for external training courses.

8. Social Participation

Besides focusing on core operations, every year ASPEED Technology contributes towards social participation so that we can give back to the community. Our focus has always been on disadvantaged people and rural communities. The Company cooperates with first-rate universities to keep top professors in Taiwan and encourages students to focus on academic research. We aim to fulfill our role as a

corporate advisor that provides direction for students engaged in life planning. In 2021, besides providing manpower and resources, the Company contributed close to NTD10.7577 million towards social causes, and in the future we will continue working to fulfill our social objectives.

1. Rural Education

ASPEED Technology is committed to the idea that reducing the gap between rural and urban communities must begin from education. Since 2013, we have donated books and other reading materials to schools while our employees have contributed as volunteers. Since 2015, for seven consecutive years we have participated in the Global Views Educational Foundation's "Sow the Seeds of Reading to Give Children a Great Future" activity by donating periodicals to children in the Taitung area.

Enthusiasm among the children led to us to turn this into a long-term endeavor and to expand the scope of our donations from elementary schools to junior high schools. Through 2020, we had already donated 17,208 magazines to 84 schools in 17 townships in Taitung. Starting in 2017, the Company began paying even closer attention to the uneven distribution of educational resources. Whether in terms of reading or learning, we advocated for more suitable development of rural students by investing in children who showed talent for sports or music. Besides subsidizing repairs to school facilities, so that the children could confidently study, we began sponsoring sports and music events, such as offering financial assistance to the Vox Nativa Association in Nantou, supporting winter training activities for the baseball and judo teams at Pei Nan Junior High School in Taitung, and sponsoring dragon boat and canoe teams in Taitung. In 2021, the Company sponsored uniforms, soccer boots, and soccer equipment to the soccer team at Fugang Elementary School in Taitung. For the elementary school students in Lanyu Township, Taitung the Company sponsored sports clothing. These contributions enable children to showcase their talents and learn without worries.

2. Combining Public Welfare and Corporate Core Development Through Higher Education Programs

In recent years, as ASPEED Technology conducted CSR, we considered ways to tie public welfare activities back to the Company's core business so that our charitable and regular work could complement each other. In 2015, we participated in the "Beyond the world of exams and credits" initiative with the Electrical Engineering Department of National Tsing Hua University, which provides corporate mentoring to students, and for three consecutive years we offered scholarships to the electrical engineering students at Tsing Hua. Our aim was to provide financial support to young scholars while giving the students a chance to interact

with our Company chairman, who could inspire the students to explore their interests and clarify their career ambitions.

(1) Junior Chair Professor Sponsorship Program: The program is contributing approximately NT\$11.52 million over four years to sponsor junior chair professors at National Yang Ming Chiao Tung University and National Tsing Hua University. The program consists of monthly contributions that sponsor young professors, which supports the local higher education environment by helping schools to keep talented teachers in Taiwan. When connections exist between the young professors' R&D plans and ASPEED Technology's business, the Company promotes further interaction. We started the program with National Yang Ming Chiao Tung University in 2020 then expanded it to National Tsing Hua University in 2021.

(2) National Tsing Hua University Sunrise Scholarship Program: The program provides financial support to underprivileged students. Over the course of four years the Company is contributing NT\$1.6 million, providing aid to four underprivileged students each year so they study without facing financial concerns.

(3) Academic Exchange: We offer a series of speeches, lectures, and course planning for both schools. One aim of the program is to promote our brand as an employer among young adults who will soon enter the workforce, in order to support future recruitment. In this way the program supports the Company's internal core talent development program and talent cultivation.

(3) Information on CPAs and Auditors' Opinions

a. Information on CPAs and Auditors' Opinion

Year	Name of auditors (CPA)	CPA firm	Auditors' opinion
2018	Ming-Hui Chen and I-Hsin Kao	Deloitte & Touche	Unqualified opinion
2019	Ming-Hui Chen and I-Hsin Kao	Deloitte & Touche	Unqualified opinion
2020	Ming-Hui Chen and I-Hsin Kao	Deloitte & Touche	Unqualified opinion
2021	Ming-Yuan Chung and I-Hsin Kao	Deloitte & Touche	Unqualified opinion
2022	Ming-Yuan Chung and Hsin-Tung Lin	Deloitte & Touche	Unqualified opinion

b. Reason for replacement of accountants in the most recent five years:

Due to internal adjustments of the accounting firm.

2. Five-Year Financial Analysis

(1) Financial analysis

a. Five-Year Financial Analysis – IFRS (Consolidated)

Analysis item		Financial information from 2018 to 2022				
		2018	2019	2020	2021	2022
Capital Structure (%)	Debt ratio	17.78	22.97	19.05	22.17	24.28
	Long-term capital to Property , plant, and equipment ratio	2,838.71	2,258.66	2,169.05	1,921.68	2,087.76
Ability to repay debts	Current ratio %	428.79	364.03	453.73	376.80	345.12
	Quick ratio %	393.73	349.05	410.33	358.83	314.72
	Times Interest Earned(Times)	1,182.23	543.15	355.84	493.98	681.79
Operation ability	A/R turnover (times)	5.63	4.82	5.35	5.41	5.76
	A/R collection days	64.83	75.72	68.22	67.46	63.36
	Inventory turnover (times)	7.53	8.26	9.08	7.80	6.52
	A/P turnover (times)	13.22	8.73	8.79	6.92	6.52
	Inventory turnover days	48.47	44.18	40.19	46.79	55.98
	Property , plant, and equipment ratio turnover rate (times)	31.19	23.88	22.94	21.87	25.65
	Total assets turnover rate (times)	0.78	0.79	0.85	0.88	0.99
Profitability	Return on assets (%)	24.98	26.63	28.26	31.82	43.75
	Return on equity attributable to shareholders of the parent (%)	31.13	33.50	35.64	40.09	52.41
	EBIT proportion to paid-in capital (%)	250.70	295.61	357.53	468.46	691.39
	Net profit margin (%)	31.85	33.45	32.79	36.09	40.41
	Basic earnings per share (NT\$)	20.20	24.39	29.38	38.30	55.72
Cash flow	Cash flow ratio (%)	183.62	157.36	199.57	181.25	166.78
	Cash flow adequacy ratio (%)	143.78	140.82	133.22	140.62	138.64
	Cash reinvestment ratio (%)	17.20	20.67	18.15	27.45	29.04
Leverage	Operation leverage	2.69	2.46	2.41	2.20	2.12
	Financial leverage	1	1	1	1	1

Changes in financial ratios that exceed 20% in the past two years:

1. Increase in times interest earned (times): Due to increase in income before income tax and interest expenses.
2. Increase in EBIT proportion to paid-in capital ratio: Due to increase in revenue and profit.
3. Increase in Inventory turnover days: Due to an increase in inventory levels caused by a decrease in demand towards the end of the year, Inventory turnover days Increase.
4. Increase in Return on assets: Due to increase in revenue and profit.
5. Increase in ROE: Due to increase in revenue and profit.
6. Increase in Basic earnings per share (NT\$): Due to increase in revenue and profit.

Note 1: The financial statements for each year above were certified by the accountant.

Note 2: The formula for financial analysis is as follows:

1. Capital structure
 - (1) Debt-ratio = Total liabilities / Total assets.
 - (2) Long-term capital to Property, plant, and equipment ratio = (Shareholders' equity + long-term liabilities) / net fixed assets
2. Ability to repay debts
 - (1) Current ratio = current assets / current liabilities.
 - (2) Quick ratio = (current assets - inventory - prepayments) / current liabilities.
 - (3) Times interest earned (times) = EBIT / interest expense for the current period
3. Operating ability
 - (1) A/R (including account receivable and business notes receivable) turnover times = net sales / average balance of receivables (including account receivable and business notes receivable)
 - (2) Average A/R turnover days = 365 / A/R turnover times
 - (3) Inventory turnover = cost of goods sold / average inventory balance
 - (4) A/P turnover (including account payable and business notes payable) = cost of goods sold / average balance of payables (including account payable and business notes payable)
 - (5) Inventory turnover days = 365 / inventory turnover times
 - (6) Property, plant, and equipment ratio turnover = net sales / net fixed assets
 - (7) Total assets turnover = net sales / total assets
4. Profitability
 - (1) Return on assets = [Earnings + interest expenses \times (1 - tax rate)] / average total assets
 - (2) Return on shareholders' equity = Earnings / net average shareholders' equity
 - (3) Net profit margin = Earnings / net sales
 - (4) Earning per share = (earning - preferred stock dividend) / weighed average outstanding shares
5. Cash flows
 - (1) Cash ratio = net cash flow from operation / current liabilities
 - (2) Cash flow adequacy ratio = net cash flow from operation over the last five years / (capital spending + increase in inventory + cash dividend) in the last five years
 - (3) Cash reinvestment ratio = (net cash flow from operation - cash dividend) / (gross fixed assets + long-term investment + other assets + working capital)
6. Leverage:
 - (1) Operating leverage = (net income from operation - variable operating cost and expenses) / income from operation
 - (2) Financial leverage = income from operation / (income from operation - interest expenses)

b. Five-Year Financial analysis – IFRS (Parent Company only)

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders
ASPEED Technology Inc.

Opinion

We have audited the accompanying consolidated financial statements of ASPEED Technology Inc. and its subsidiaries (collectively referred to as the "Group"), which comprise the consolidated balance sheets as of December 31, 2022 and 2021, and the consolidated statements of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies (collectively referred to as the "consolidated financial statements").

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2022 and 2021, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with The Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended December 31, 2022. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

The key audit matters identified in the Group's consolidated financial statements for the year ended December 31, 2022 are stated as follows:

Recognition of revenue

The Group operates principally as a supplier of multimedia integrated circuits (ICs) and computer oriented ICs. For the year ended December 31, 2022, the Group recognized revenue of NT\$5,210,128 thousand, which increased by 43% compared with that of last year, refer to Note 21 for related information. Due to the increasing market demand for remote server management system, the significant changes in the amount of the Group's operating revenue in recent years have a significant impact on the consolidated financial statements for the year ended December 31, 2022. For customers whose sales growth rates were significant, we considered the existence and occurrence of sales as key audit matters of the current period.

The audit procedures that we performed included, but not limited to the following: We evaluated the appropriateness of the Company's accounting policies relating to revenue recognition. We obtained an understanding of the internal controls over the approval of sales order and shipping. We tested the effectiveness of those internal controls and selected samples of sales documents to verify the sales authenticity by inspecting sales details, including cash collections in the audited period and the subsequent period. Moreover, we checked for abnormalities between the recorded sales and cash received.

Other Matter

We have also audited the parent company only financial statements of ASPEED Technology Inc. as of and for the years ended December 31, 2022 and 2021 on which we have issued an unmodified opinion.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient and appropriate audit evidence regarding the financial information of entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the year ended December 31, 2022 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audits resulting in this independent auditors' report are Ming Yuan Chung and Lin Hsin-Tung.

Notice to Readers

The accompanying consolidated financial statements are intended only to present the consolidated financial position, financial performance and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such consolidated financial statements are those generally applied in the Republic of China.

For the convenience of readers, the independent auditors' report and the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language independent auditors' report and consolidated financial statements shall prevail.

ASPEED TECHNOLOGY INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2022 AND 2021 (In Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL INFORMATION

ASPEED Technology Inc. (the “Company”) was approved by the Ministry of Economic Affairs for establishment on November 15, 2004. The Company is mainly engaged in the manufacturing of electronic products, wholesale of information software, retail and service industry, international trade, intellectual property, product design, and other industrial and commercial services. The Company’s shares have been traded on the Taipei Exchange since April 30, 2013.

The financial statements are presented in the Company’s functional currency, the New Taiwan dollar.

2. APPROVAL OF FINANCIAL STATEMENTS

The consolidated financial statements were approved by the Company’s board of directors on March 6, 2023.

3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

- a. Initial application of the amendments to the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) (collectively, the “IFRSs”) endorsed and issued into effect by the Financial Supervisory Commission (FSC)

The initial application of the IFRSs endorsed and issued into effect by the FSC did not have material impact on the Group’s accounting policies.

- b. The IFRSs endorsed by the FSC for application starting from 2023

New, Amended and Revised Standards and Interpretations	Effective Date Announced by International Accounting Standards Board
Amendments to IAS 1 “Disclosure of Accounting Policies”	January 1, 2023 (Note 1)
Amendments to IAS 8 “Definition of Accounting Estimates”	January 1, 2023 (Note 2)
Amendments to IAS 12 “Deferred Tax related to Assets and Liabilities arising from a Single Transaction”	January 1, 2023 (Note 3)

Note 1: The amendments will be applied prospectively for annual reporting periods beginning on or after January 1, 2023.

Note 2: The amendments will be applicable to changes in accounting estimates and changes in accounting policies that occur on or after the beginning of the annual reporting period beginning on or after January 1, 2023.

Note 3: Except for deferred taxes that were recognized on January 1, 2022 for temporary differences associated with leases and decommissioning obligations, the amendments were applied prospectively to transactions that occurred on or after January 1, 2022.

As of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact of the application of other standards and interpretations will have on the Group's financial position and financial performance and will disclose the relevant impact when the assessment is completed.

- c. New IFRSs in issue but not yet endorsed and issued into effect by the FSC

New IFRSs	Effective Date Announced by IASB (Note 1)
Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets between An Investor and Its Associate or Joint Venture"	To be determined by IASB
Amendments to IFRS 16 "Leases Liability in a Sale and Leaseback"	January 1, 2024 (Note 2)
IFRS 17 "Insurance Contracts"	January 1, 2023
Amendments to IFRS 17	January 1, 2023
Amendments to IFRS 17 "Initial Application of IFRS 9 and IFRS 17-Comparative Information"	January 1, 2023
Amendments to IAS 1 "Classification of Liabilities as Current or Non-current"	January 1, 2024
Amendments to IAS 1 "Non-current Liabilities with Covenants"	January 1, 2024

Note 1: Unless stated otherwise, the above IFRSs are effective for annual reporting periods beginning on or after their respective effective dates.

Note 2: A seller-lessee shall apply the Amendments to IFRS 16 retrospectively to sale and leaseback transactions entered into after the date of initial application of IFRS 16.

As of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact of the application of other standards and interpretations on the Group's financial position and financial performance and will disclose the relevant impact when the assessment is completed.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICY

For the convenience of readers, the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language consolidated financial statements shall prevail.

- a. Statement of compliance

The consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IFRSs as endorsed and issued into effect by the FSC.

- b. Basis of preparation

The consolidated financial statements have been prepared on the historical cost basis except for financial instruments which are measured at fair value.

The fair value measurements, which are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and based on the significance of the inputs to the fair value measurement in its entirety, are described as follows:

- 1) Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- 2) Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for an asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- 3) Level 3 inputs are unobservable inputs for an asset or liability.

c. Classification of current and non-current assets and liabilities

Current assets include:

- 1) Assets held primarily for the purpose of trading;
- 2) Assets expected to be realized within 12 months after the reporting period; and
- 3) Cash and cash equivalents unless the asset is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period.

Current liabilities include:

- 1) Liabilities held primarily for the purpose of trading;
- 2) Liabilities due to be settled within 12 months after the reporting period, even if an agreement to refinance, or to reschedule payments, on a long-term basis is completed after the reporting period and before the consolidated financial statements are authorized for issue; and
- 3) Liabilities for which the Group does not have an unconditional right to defer settlement for at least 12 months after the reporting period.

Assets and liabilities that are not classified as current are classified as non-current.

d. Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and the entities controlled by the Company (i.e., its subsidiaries).

Income and expenses of subsidiaries acquired or disposed of during the period are included in the consolidated statement of profit or loss and other comprehensive income from the effective dates of acquisitions up to the effective dates of disposals, as appropriate.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the Company.

All intra-group transactions, balances, income and expenses are eliminated in full upon consolidation. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the interests of the Group and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the Company.

Refer to Notes 10 and 31 for the detailed information of subsidiaries (including the percentage of ownership and main business).

e. Business combinations

Acquisitions of businesses are accounted for using the acquisition method. Acquisition-related costs are generally recognized in profit or loss as they are incurred.

Goodwill is measured as the excess of the sum of the consideration transferred and the fair value of the acquirer's previously held equity interests in the acquiree over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

f. Foreign currencies

In preparing the financial statements of each individual entity, transactions in currencies other than the entity's functional currency (i.e., foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the period in which they arise.

Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Exchange differences arising from the retranslation of non-monetary items are included in profit or loss for the period except for exchange differences arising from the retranslation of non-monetary items in respect of which gains and losses are recognized directly in other comprehensive income; in which cases, the exchange differences are also recognized directly in other comprehensive income.

Non-monetary items that are measured at historical cost in a foreign currency are not retranslated.

For the purpose of presenting consolidated financial statements, the functional currencies of the Company and its foreign operations (including subsidiaries that use currency different from the currency of the Company) are translated into the presentation currency - the New Taiwan dollar as follows: Assets and liabilities are translated at the exchange rates prevailing at the end of the reporting period; income and expense items are translated at the average exchange rates for the period. The resulting currency translation differences are recognized in other comprehensive income (attributed to the owners of the Company and non-controlling interests as appropriate).

g. Inventories

Inventories consist of work-in-process and finished goods are stated at the lower of cost or net realizable value. Inventory write-downs are made by item, except where it may be appropriate to group similar or related items. Net realizable value is the estimated selling price of inventories less all estimated costs of completion and costs necessary to make the sale. Inventories are recorded at standard cost and adjusted to approximate weighted-average cost on the balance sheet date.

h. Property, plant, and equipment

Property, plant and equipment are stated at cost, less accumulated depreciation.

Depreciation on property, plant and equipment is recognized using the straight-line method. Each significant part is depreciated separately. The estimated useful lives, residual values and depreciation methods are reviewed at the end of each reporting period, with the effects of any changes in estimates accounted for on a prospective basis.

On derecognition of an item of property, plant and equipment, the difference between the sales proceeds and the carrying amount of the asset is recognized in profit or loss.

i. Goodwill

Goodwill arising from the acquisition of a business is measured at cost as established at the date of acquisition of the business less accumulated impairment loss.

For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating units or groups of cash-generating units (referred to as "cash-generating units") that are expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually or more frequently whenever there is an indication that the unit may be impaired, by comparing its carrying amount, including the attributed goodwill, with its recoverable amount. However, if the goodwill allocated to a cash-generating unit was acquired in a business combination during the current annual period, that unit shall be tested for impairment before the end of the current annual period. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then pro rata to the other assets of the unit based on the carrying amount of each asset in the unit. Any impairment loss is recognized directly in profit or loss. Any impairment loss recognized for goodwill is not reversed in subsequent periods.

If goodwill has been allocated to a cash-generating unit and the Group disposes of an operation within that unit, the goodwill associated with the operation which is disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal and is measured on the basis of the relative values of the operation disposed of and the portion of the cash-generating unit retained.

j. Intangible assets

1) Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are initially measured at cost and subsequently measured at cost less accumulated amortization. Amortization is recognized on a straight-line basis. The estimated useful life, residual value, and amortization method are reviewed at the end of each reporting period, with the effect of any changes in the estimate accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are measured at cost less accumulated impairment loss.

2) Internally-generated intangible assets - research and development expenditure

Expenditure on research activities is recognized as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from the development phase of an internal project is recognized if, and only if, all of the following have been demonstrated:

- a) The technical feasibility of completing the intangible asset so that it will be available for use or sale;
- b) The intention to complete the intangible asset and use or sell it;
- c) The ability to use or sell the intangible asset;
- d) How the intangible asset will generate probable future economic benefits;
- e) The availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- f) The ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognized for internally-generated intangible assets is the sum of the expenditure incurred from the date when such an intangible asset first meets the recognition criteria listed above. Subsequent to initial recognition, they are measured on the same basis as intangible assets that are acquired separately.

3) Intangible assets acquired in a business combination

Intangible assets acquired in a business combination and recognized separately from goodwill are initially recognized at their fair value at the acquisition date (which is regarded as their cost). Subsequent to initial recognition, they are measured on the same basis as intangible assets that are acquired separately.

4) Derecognition of intangible assets

On derecognition of an intangible asset, the difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss.

k. Impairment of property, plant and equipment, right-of-use assets and intangible assets other than goodwill

At the end of each reporting period, the Group reviews the carrying amounts of its property, plant and equipment, right-of-use assets and intangible assets, excluding goodwill, to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Corporate assets are allocated to the smallest group of cash-generating units on a reasonable and consistent basis of allocation.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

The recoverable amount is the higher of fair value less costs to sell and value in use. If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount, with the resulting impairment loss recognized in profit or loss.

When an impairment loss is subsequently reversed, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but only to the extent of the carrying amount that would have been determined had no impairment loss been recognized on the asset or cash-generating unit in prior years. A reversal of an impairment loss is recognized in profit or loss.

1. Financial instruments

Financial assets and financial liabilities are recognized when the Group becomes a party to the contractual provisions of the instruments.

Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognized immediately in profit or loss.

1) Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

a) Measurement categories

Financial assets are classified into the following categories: Financial assets at FVTPL and financial assets at amortized cost.

i. Financial assets at FVTPL

Financial assets are classified as at FVTPL when such a financial asset is mandatorily classified as at FVTPL. Financial assets mandatorily classified as at FVTPL include investments in equity instruments which are not designated as at FVTOCI and debt instruments that do not meet the amortized cost criteria or the FVTOCI criteria.

Financial assets at FVTPL are subsequently measured at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any dividends or interest earned on such a financial asset. Fair value is determined in the manner described in Note 27.

ii. Financial assets at amortized cost

Financial assets that meet the following conditions are subsequently measured at amortized cost:

- i) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- ii) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, financial assets at amortized cost, including cash and cash equivalents, trade receivables and other receivables at amortized cost, are measured at amortized cost, which equals the gross carrying amount determined using the effective interest method less any impairment loss. Exchange differences are recognized in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of such a financial asset, except for:

- i) Purchased or originated credit-impaired financial assets, for which interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of such financial assets; and
- ii) Financial assets that are not credit impaired on purchase or origination but have subsequently become credit impaired, for which interest income is calculated by applying the effective interest rate to the amortized cost of such financial assets in subsequent reporting periods.

A financial asset is credit impaired when one or more of the following events have occurred:

- i) Significant financial difficulty of the issuer or the borrower;
- ii) Breach of contract, such as a default;
- iii) It is becoming probable that the borrower will enter bankruptcy or undergo a financial reorganization; or
- iv) The disappearance of an active market for that financial asset because of financial difficulties.

Cash equivalents include time deposits with original maturities within 3 months from the date of acquisition, which are highly liquid, readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These cash equivalents are held for the purpose of meeting short-term cash commitments.

b) Impairment of financial assets

The Group recognizes a loss allowance for expected credit losses on financial assets at amortized cost (including trade receivables (including related parties)).

The Group always recognizes lifetime expected credit losses (ECLs) for trade receivables. For all other financial instruments, the Group recognizes lifetime ECLs when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on a financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECLs.

Expected credit losses reflect the weighted average of credit losses with the respective risks of default occurring as the weights. Lifetime ECLs represent the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECLs represent the portion of lifetime ECLs that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

The Group recognizes an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account, except for investments in debt instruments that are measured at FVTOCI, for which the loss allowance is recognized in other comprehensive income and does not reduce the carrying amount of the financial asset.

For internal credit risk management purposes, the Group determines that the following situations indicate that a financial asset is in default (without taking into account any collateral held by the Group):

- i. Internal or external information show that the debtor is unlikely to pay its creditors.

c) Derecognition of financial assets

The Group derecognizes a financial asset only when the contractual rights to the cash flows from the financial asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the financial asset to another party.

On derecognition of a financial asset at amortized cost in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss.

2) Equity instruments

Equity instruments issued by the Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments issued by the Group are recognized at the proceeds received, net of direct issue costs.

The repurchase of the Group's own equity instruments is recognized in and deducted directly from equity and its carrying amounts are calculated based on weighted average by share types and calculated separately by repurchase category. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

3) Financial liabilities

a) Subsequent measurement

All financial liabilities are measured at amortized cost using the effective interest method.

b) Derecognition of financial liabilities

The difference between the carrying amount of the financial liabilities derecognized and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

m. Provisions

Provisions are measured at the best estimate of the discounted cash flows of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

1) Warranties

Provisions for the expected cost of warranty obligations to assure that products comply with agreed-upon specifications are recognized on the date of sale of the relevant products at the best estimate by the management of the Group of the expenditures required to settle the Group's obligations.

2) Decommissioning

The Group has the obligation for decommissioning at the end of the useful lives of offices. Pursuant to regulations, the Group estimates the decommissioning costs, which are discounted by applying the effective interest rate and recognized as the carrying amount. The decommissioning costs are capitalized and added to the carrying amount of property, plant and equipment.

The Group recognizes both the increased decommissioning provisions discounted on a time basis and interest expense. The Group regularly reviews the change of decommissioning obligation at each end of the reporting period and adjusts it to reflect the best estimates.

n. Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances. Allowance for sales returns and liability for returns are recognized at the time of sale based on the seller's reliable estimate of future returns and past experience and other relevant factors.

The Group identifies contracts with customers, allocates the transaction price to the performance obligations and recognizes revenue when performance obligations are satisfied.

1) Revenue from the sale of goods

Revenue from the sale of goods comes from sales of multimedia integrated circuits (ICs) and computer peripherals oriented ICs. Sales of multimedia ICs and computer peripherals oriented ICs are recognized as revenue when the ICs are delivered to the customer. Trade receivables are recognized concurrently because it is the time when the customer has full discretion to set the price, use, resell the goods to future customers and bears the risks of obsolescence.

The Group does not recognize revenue on materials delivered to subcontractors because this delivery does not involve a transfer of control. There were no materials delivered to subcontractors in 2022.

2) Royalties Revenue

Royalty revenue is recognized on an accrual basis in accordance with the substance of the relevant agreement and provided that it is probable that the economic benefits will flow to the Group and that the amount of revenue can be measured reliably. Royalties determined on a time basis are recognized on a straight-line basis over the period of the agreement. Royalty arrangements that are based on production, sales and other measures are recognized by reference to the underlying arrangements.

o. Leasing

At the inception of a contract, the Group assesses whether the contract is, or contains, a lease.

1) The Group as lessor

Leases are classified as finance leases whenever the terms of a lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

When the Group subleases a right-of-use asset, the sublease is classified by reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. However, if the head lease is a short-term lease that the Group, as a lessee, has accounted for applying recognition exemption, the sublease is classified as an operating lease.

2) The Group as lessee

The Group recognizes right-of-use assets and lease liabilities for all leases at the commencement date of a lease, except for short-term leases and low-value asset leases accounted for applying a recognition exemption where lease payments are recognized as expenses on a straight-line over the lease terms.

Right-of-use assets are initially measured at cost, which comprises the initial measurement of lease liabilities adjusted for lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs needed to restore the underlying assets, and less any lease incentives received. Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses and adjusted for any remeasurement of the lease liabilities. Right-of-use assets are presented on a separate line in the consolidated balance sheets.

Right-of-use assets are depreciated using the straight-line method from the commencement dates to the earlier of the end of the useful lives of the right-of-use assets or the end of the lease terms.

Lease liabilities are initially measured at the present value of the lease payments. The lease payments are discounted using the interest rate implicit in a lease, if that rate can be readily determined. If that rate cannot be readily determined, the Group uses the lessee's incremental borrowing rate.

Subsequently, lease liabilities are measured at amortized cost using the effective interest method, with interest expense recognized over the lease terms. When there is a change in a lease term, the Group remeasures the lease liabilities with a corresponding adjustment to the right-of-use-assets. However, if the carrying amount of the right-of-use assets is reduced to zero, any remaining amount of the remeasurement is recognized in profit or loss. Lease liabilities are presented on a separate line in the consolidated balance sheets.

p. Employee benefits

1) Short-term employee benefits

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related services.

2) Retirement benefits

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered services entitling them to the contributions.

q. Restricted shares for employees

The fair value at the grant date of the restricted shares for employees is expensed on a straight-line basis over the vesting period, based on the Group's best estimates of the number of shares or options that are expected to ultimately vest, with a corresponding increase in other equity - unearned employee benefit. It is recognized as an expense in full at the grant date if vesting immediately.

When restricted shares for employees are issued, other equity - unearned employee benefits is recognized on the grant date, with a corresponding increase in capital surplus - restricted shares for employees. If restricted shares for employees are granted for consideration and should be returned, they are recognized as payables. Dividends paid to employees on restricted shares that do not need to be returned if employees resign in the vesting period are recognized as expenses when the dividends are declared with a corresponding adjustment in capital surplus - restricted shares for employees.

At the end of each reporting period, the Group revises its estimate of the number of restricted shares for employees expected to vest. The impact of the revision of the original estimates is recognized in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to capital surplus - restricted share option for employees.

r. Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

1) Current tax

Income tax payable(recoverable) is based on taxable profit(loss) for the year determined according to the applicable tax laws of each tax jurisdiction.

According to the Income Tax Act in the ROC, an additional tax on unappropriated earnings is provided for in the year the shareholders approve to retain earnings.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

2) Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities and the corresponding tax bases used in the computation of taxable profit.

If a temporary difference arises from the initial recognition of assets and liabilities in a transaction that (other than in the acquisition of a subsidiary) affects neither the taxable profit nor the accounting profit, the resulting deferred tax asset or liability is not recognized. In addition, a deferred tax liability is not recognized on any taxable temporary difference arising from the initial recognition of goodwill included in the investment in the subsidiary.

Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences, research and development expenditures and personnel training expenditures to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. A previously unrecognized deferred tax asset is also reviewed at the end of each reporting period and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the year which the liability is settled or the asset is realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

3) Current and deferred taxes

Current and deferred taxes are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity; in which case, the current and deferred taxes are also recognized in other comprehensive income or directly in equity, respectively.

Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, management is required to make judgments, estimations, and assumptions on the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered relevant. Actual results may differ from these estimates.

The Group considers the possible impact of the recent development of the COVID-19 and its economic environment implications when making its critical accounting estimates on cash flows, growth rates, discount rates, profitabilities, etc. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised if the revisions affect only that period or in the period of the revisions and future periods if the revisions affect both current and future periods.

Key Sources of Estimation Uncertainty

a. Write-down of Inventories

The net realizable value of inventories is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. The estimation of net realizable value is based on current market conditions and historical experience in the sale of product of a similar nature. Changes in market conditions may have a material impact on the estimation of the net realizable value.

b. Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The calculation of the value in use requires management to estimate the future cash flows expected to arise from the cash-generating units and a suitable discount rate in order to calculate the present value. Where the actual future cash flows are less than expected, a material impairment loss may arise.

6. CASH AND CASH EQUIVALENTS

	December 31	
	2022	2021
Cash on hand	\$ 101	\$ 101
Checking accounts and demand deposits	692,291	1,254,955
Cash equivalents (investments with original maturities of 3 months or less)		
Repurchase agreements collateralized by bonds	2,056,720	722,392
Time deposits	79,846	-
	<u>\$ 2,828,958</u>	<u>\$ 1,977,448</u>

The market rate intervals of cash in bank at the end of the reporting period were as follows:

	December 31	
	2022	2021
Bank deposits	0.05%-4.88%	0.01%-0.20%
Repurchase agreements collateralized by bonds	3.55%-4.10%	0.30%

7. FINANCIAL INSTRUMENTS AT FAIR VALUE THROUGH PROFIT OR LOSS

	December 31	
	2022	2021
Financial assets mandatorily classified as at FVTPL -current		
Non-derivative financial assets		
Mutual funds	\$ 327,087	\$ 300,681
Domestic listed shares	199,980	218,893
Foreign shares	-	12,541
	<u>\$ 527,067</u>	<u>\$ 532,115</u>
Financial assets mandatorily classified as at FVTPL - non-current		
Non-derivative financial assets		
Foreign corporate bonds	<u>\$ 72,893</u>	<u>\$ 82,686</u>

8. TRADE RECEIVABLES

	December 31	
	2022	2021
<u>Trade receivables</u>		
Non-related parties	<u>\$ 979,728</u>	<u>\$ 828,723</u>
<u>Trade receivables</u>		
At amortized cost		
Gross carrying amount	\$ 979,728	\$ 828,723
Less: Allowance for impairment loss	-	-
	<u>\$ 979,728</u>	<u>\$ 828,723</u>

The average credit period of sale of goods was 30-60 days. The Group adopted a policy that is in order to minimize credit risk, the management of the Group regularly reviews credit limits and credit approvals and performs other monitoring procedures to ensure that follow-up action is taken to recover overdue debts.

Before trading with new customers, the Group assesses the potential customer's credit quality and defines credit limits based on the credit rating system. Credit rating information is obtained from independent rating agencies where available or, if not available, the Group uses other publicly available financial information or its own trading records to rate its major customers.

As for the trade receivables that are overdue at the end of the reporting date but not yet recognized as the allowance for bad debts, the credit quality has not changed significantly; thus, the management of the Group believes that the amount can still be recovered. The Group does not hold any collateral or other credit enhancements to those trade receivables.

The Group which permits the use of lifetime expected loss provision for all trade receivables. The expected credit losses on trade receivables are estimated using a provision matrix approach considering the past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of economic conditions at the reporting date. As the Group's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished according to the Group's different customer base.

The Group writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery. For trade receivables that have been written off, the Group continues to engage in enforcement activity to attempt to recover the receivables due. Where recoveries are made, these are recognized in profit or loss.

The following table details the loss allowance of trade receivables based on the Group's provision matrix.

December 31, 2022

	Gross Carrying Amount	Loss Allowance	Amortized Cost
Not past due	\$ 687,224	\$ -	\$ 687,224
Past due			
Within 30 days	255,608	-	255,608
31-60 days	22,062	-	22,062
61-90 days	10,461	-	10,461
91-180 days	<u>4,373</u>	<u>-</u>	<u>4,373</u>
	<u>\$ 979,728</u>	<u>\$ -</u>	<u>\$ 979,728</u>

December 31, 2021

	Gross Carrying Amount	Loss Allowance	Amortized Cost
Not past due	\$ 561,879	\$ -	\$ 561,879
Past due			
Within 30 days	249,288	-	249,288
31-60 days	17,418	-	17,418
61-90 days	138	-	138
91-180 days	<u>-</u>	<u>-</u>	<u>-</u>
	<u>\$ 828,723</u>	<u>\$ -</u>	<u>\$ 828,723</u>

9. INVENTORIES

	December 31	
	2022	2021
Finished goods	\$ 282,388	\$ 110,533
Work in progress	<u>118,004</u>	<u>46,980</u>
	<u>\$ 400,392</u>	<u>\$ 157,513</u>

The cost of inventories recognized as cost of goods sold for the years ended December 31, 2022 and 2021 was \$1,818,976 thousand and \$1,262,074 thousand, respectively. The cost of inventories recognized as operating cost were as follows:

	December 31	
	2022	2021
Inventory write-downs (reversal)	<u>\$ 24,231</u>	<u>\$ (4,067)</u>
Loss on disposal of inventories	<u>\$ 6,569</u>	<u>\$ 4,694</u>

10. SUBSIDIARIES

- a. Subsidiaries included in the consolidated financial statements

Investor	Investee	Nature of Activities	Proportion of Ownership (%)	
			December 31	
			2022	2021
ASPEED Technology Inc.	ASPEED Technology (Samoa) Inc.	Investment holding company	100	100
	ASPEED Technology India Private Limited	R&D and technical services	1	1
ASPEED Technology (Samoa) Inc.	Cupola360 Inc.	Software Design Services	100	100
	ASPEED Technology (U.S.A) Inc.	R&D and technical services	100	100
	ASPEED Technology India Private Limited	R&D and technical services	99	99

The investment accounted for using the equity method and the calculation of the share of profit or loss and other comprehensive income were recognized based on the financial statements of subsidiaries that have been audited.

11. PROPERTY, PLANT AND EQUIPMENT

	December 31	
	2022	2021
Assets used by the Company	<u>\$ 217,562</u>	<u>\$ 188,662</u>

	<u>109,594</u>	<u>\$ 78,656</u>	<u>\$ (2,413)</u>	<u>\$ 81</u>	<u>185,918</u>
Carrying amount	<u>\$ 188,662</u>				<u>\$ 217,562</u>

b. Year 2021

Year Ended December 31, 2021						
	Balance at Beginning of the Year	Additions	Disposals	Reclassification Adjustment	Net Exchange Differences	Balance at End of the Year
<u>Cost</u>						
Machinery equipment	\$ 26,826	\$ 2,326	\$ (5,627)	\$ -	\$ -	\$ 23,525
Office equipment	13,760	3,783	(1,946)	-	(25)	15,572
Other equipment	193,979	105,423	(43,197)	2,954	-	259,159
	<u>234,565</u>	<u>\$ 111,532</u>	<u>\$ (50,770)</u>	<u>\$ 2,954</u>	<u>\$ (25)</u>	<u>298,256</u>
<u>Accumulated depreciation</u>						
Machinery equipment	12,946	\$ 5,907	\$ (3,881)	\$ -	\$ -	14,972
Office equipment	6,001	2,891	(1,946)	-	(19)	6,927
Other equipment	71,729	59,163	(43,197)	-	-	87,695
	<u>90,676</u>	<u>\$ 67,961</u>	<u>\$ (49,024)</u>	<u>\$ -</u>	<u>\$ (19)</u>	<u>109,594</u>
Carrying amount	<u>\$ 143,889</u>					<u>\$ 188,662</u>

The above items of property, plant and equipment are depreciated on a straight-line basis over their following estimated useful lives as follows:

Machinery equipment	3-5 years
Office equipment	3-7 years
Other equipment	3-5 years

12. LEASE ARRANGEMENTS

a. Right-of-use assets

	December 31	
	2022	2021
<u>Carrying amount</u>		
Buildings	\$ 40,255	\$ 63,909
Transportation equipment	<u>1,624</u>	<u>-</u>
	<u>\$ 41,879</u>	<u>\$ 63,909</u>

	For the Year Ended December 31	
	2022	2021
Additions to right-of-use assets	<u>\$ 3,760</u>	<u>\$ 637</u>
Depreciation charge for right-of-use assets		
Buildings	\$ 25,078	\$ 25,203
Transportation equipment	<u>1,181</u>	<u>662</u>
	<u>\$ 26,259</u>	<u>\$ 25,865</u>

Except for the aforementioned additions and recognized depreciation, the Group did not have significant sublease or impairment of right-of-use assets during the years ended December 31, 2022 and 2021.

b. Lease liabilities

	December 31	
	2022	2021
<u>Carrying amount</u>		
Current	<u>\$ 25,120</u>	<u>\$ 23,668</u>
Non-current	<u>\$ 14,896</u>	<u>\$ 37,689</u>

Range of discount rates for lease liabilities was as follows:

	December 31	
	2022	2021
Buildings	2.00%	2.00%
Transportation equipment	2.50%	-

c. Material lease-in activities and terms

The Group leases certain buildings for the use of manufacturing and office with lease terms of 1 to 5 years. The Group doesn't have options to purchase the equipment for a nominal amount at the end of the lease terms. In addition, the Group is prohibited from subleasing or transferring all or any portion of the underlying assets without the lessor's consent.

d. Other lease information

	For the Year Ended December 31	
	2022	2021
Expenses relating to short-term leases	<u>\$ 1,005</u>	<u>\$ 407</u>
Expenses relating to low-value asset leases	<u>\$ 77</u>	<u>\$ 127</u>
Total cash outflow for leases	<u>\$ (27,821)</u>	<u>\$ (26,292)</u>

The Group's leases of certain office equipment qualify as short-term and low-value asset leases. The Group has elected to apply the recognition exemption and thus, did not recognize right-of-use assets and lease liabilities for these leases.

13. GOODWILL

For the Year Ended December 31

	2022	2021
--	------	------

Cost

Balance at beginning and end of the year	\$ 369,040	\$ 369,040
--	------------	------------

On December 30, 2016, the Group acquired the pilot product line, which was mainly expected to create synergies and benefits to the Group's existing products. When an impairment test is performed, the goodwill is related to the Group and deemed as a single cash-generating unit. Therefore, the impairment of goodwill is assessed by calculating the recoverable amount of the Group and the carrying amount of the net assets.

In addition, according to the asset impairment assessment analysis report issued by the Group, the financial forecast of the Group from 2023 to 2027 is based on the financial analysis according to the following: (a) management's reference to revenue growth rate of historical period, and (b) the difference between actual results and estimates of operating profit from 2019 to 2022, with conservative data as the basis for prediction.

The recoverable amount of the consolidated total cash-generating unit is still greater than the carrying amount, so no impairment loss is recognized.

The Group's recoverable amount is determined on the basis of the value in use, and the cash flow estimate of the financial budget for the next five years is approved by the management of the Group and is calculated using the annual discount rate of 16.10%.

Additional provisions recognized	<u>9,948</u>	<u>-</u>
Balance at December 31, 2022	<u>\$ 49,634</u>	<u>\$ 6,447</u>

- a. The provision for warranty claims represents the present value of management's best estimate of the future outflow of economic benefits. The estimate has been made on the basis of historical warranty trends and may vary as a result of new materials, altered manufacturing processes or other events affecting product quality.
- b. The provision for decommissioning represents the Company's obligation to decommission (including the restoration of the office). The costs are estimated based on internal research, and the Company regularly reviews and adjusts it to reflect the best estimates.

19. RETIREMENT BENEFIT PLANS

- a. Defined contribution plans

The Company adopted a pension plan under the Labor Pension Act (LPA), which is deemed a defined contribution plan. Pursuant to the LPA, the Company makes monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages.

The total expenses recognized in the consolidated statement of comprehensive income were \$8,138 thousand and \$6,447 thousand, representing the contributions made and to be made to these plans by the Company at the rates specified in the plans for the years ended December 31, 2022 and 2021, respectively.

20. EQUITY

- a. Ordinary share capital

	December 31	
	2022	2021
Number of shares authorized (in thousands of shares)	<u>50,000</u>	<u>50,000</u>
Shares authorized par value \$10 (in thousands of NTD)	<u>\$ 500,000</u>	<u>\$ 500,000</u>
Number of shares issued and fully paid (in thousands of shares)	<u>37,821</u>	<u>34,369</u>
Shares issued and fully paid (in thousands of NTD)	<u>\$ 378,207</u>	<u>\$ 343,694</u>

Ordinary shares issued and fully paid have a par value of NT\$10. Each share has one voting right and the right to receive dividends.

On March 7, 2022, the board of directors of the Company resolved to take back 14,000 new shares of restricted employee rights from former employees without compensation in accordance with the law. The Company had capital reduction, and the base date for capital reduction was March 7, 2022. The registration of the change was completed on March 16, 2022.

On March 7, 2022, the board of directors of the Company made a resolution in accordance with the Company's Article, article 241 subparagraphs 1 and 2 of paragraph 1 which stipulates that capital reserves should be used for capital, and the total amount of the annual capital shall not exceed 10% of the paid-in capital. The proposed capital reserve of NT\$34,355 thousand was converted into capital for the issuance of new shares at NT\$10 per share, with 3,436 thousand shares allotted to 100 shares for every 1,000 shares, and were approved by the shareholders in their meeting on May 31, 2022. The board of directors were authorized to complete the record date in accordance with the relevant regulations on July 4, 2022, and the registration of the change was completed on July 13, 2022.

On March 7, 2022, the board of directors of the Company made a resolution to convert employees' compensation into capital stock with NT\$141,518 thousand, NT\$10 per share. The above-mentioned capital increase was reported at the general meeting of the shareholders on May 31, 2022 and was approved by the competent authority to declare and take effect. The base date of the capital increase was also set on August 9, 2022 with 52 thousand shares, and the registration of the change was completed on August 29, 2022.

On August 8, 2022, the board of directors of the Company made a resolution in the new employee restricted stocks with 44 thousand shares at NT\$10 per share. The above-mentioned issuance of new shares was approved and declared to be effective by the competent authority, and the registration of the change was completed on August 29, 2022, refer to Note 25.

On November 7, 2022, the board of directors of the Company resolved to take back 6 thousand new shares of restricted employee rights from former employees without compensation in accordance with the law. The capital reduction operation was planned, and the base date for capital reduction was November 7, 2022. The registration of the change was completed on November 18, 2022.

On December 16, 2022, the board of directors of the Company resolved to cancel the treasury shares in accordance with the law and eliminated a total of 60 thousand issued shares. The base date for capital reduction was December 16, 2022, and the registration of the change was completed on December 28, 2022.

b. Capital surplus

	December 31	
	2022	2021
May be used to offset a deficit, distributed as cash dividends, or <u>transferred to share capital (a)</u>		
Issuance of ordinary shares	\$ 756,385	\$ 793,019
Employee share bonus	608,492	467,500
From expired/vested employee restricted shares	69,599	54,483
From expired/exercised employee share options	2,156	2,156
<u>May not be used for any purpose</u>		
Employee restricted shares	103,146	53,972
	<u>\$ 1,539,778</u>	<u>\$ 1,371,130</u>

- a) The capital surplus may be used to offset a deficit; in addition, when the Company has no deficit, such capital surplus may be distributed as cash dividends or transferred to share capital (limited to a certain percentage of the Company's capital surplus and to once a year).
- c. Retained earnings and dividend policy

The shareholders of the Company held their regular meeting on May 29, 2019 and in that meeting, resolved the amendments to the Company's Articles of Incorporation (the "Articles"). The amendments explicitly stipulate that the Company may allocate a portion or all of its reserves for distribution in accordance with relevant laws or regulations or the orders of the authorities in charge. When the reserves are to be distributed in cash, the distribution may be approved by the board of directors and reported to the shareholders in their meeting.

Under the dividends policy as set forth in the Articles after the amendments, where the Company made a profit in a fiscal year, the profit shall be first utilized for paying taxes, offsetting losses of previous years, setting aside as a legal reserve of 10% of the remaining profit, setting aside or reversing a special reserve in accordance with the laws and regulations, and then any remaining profit together with any undistributed retained earnings shall be used by the Company's board of directors as the basis for proposing a distribution plan, which should be resolved by the shareholders in their meeting for distribution bonuses to shareholders.

For the policies on the distribution of compensation of employees and remuneration of directors and supervisors after the amendment, refer to compensation of employees and remuneration of directors and supervisors in Note 22(g).

The Company's Articles stipulate the dividends policy based on present and future projects, investment environment, capital requirements, domestic and international competitive environment, and the interests of shareholders, whereby the Company distributes no less than 10% of the distributable earnings in the form of dividend bonus. If the accumulatively distributable earnings were less than 50% of the Company's paid-in capital, the dividend bonus would not be distributed. In principle, cash dividends are limited to no less than 10% of the total dividends distributed.

The appropriation of earnings to a legal reserve shall be made until the legal reserve equals the Company's paid-in capital. The legal reserve may be used to offset any deficit. If the Company has no deficit and the legal reserve has exceeded 25% of the Company's paid-in capital, the excess may be transferred to capital or distributed in cash.

The special reserve should be appropriated from the prior years' unappropriated earnings to the extent of the debit balance accumulated from prior years. Afterward, if there is any reversal of the decrease in other stockholders' equity, the Group is allowed to appropriate retained earnings from the reversal amount.

The appropriations of earnings for 2021 and 2020 were as follows:

	Appropriation of Earnings	
	For the Year Ended December 31	
	2021	2020
Legal reserve	\$ 131,292	\$ 100,470
(Reversal) recognition of special reserve	\$ (23,722)	\$ 11,299
Cash dividends	\$ 1,202,427	\$ 892,204
Cash dividends per share (NT\$)	\$ 35.00	\$ 26.00

The above appropriations for cash dividends were resolved by the Company's board of directors on March 7, 2022 and March 8, 2021. The other appropriations of earnings for 2021 and 2020 were proposed by the shareholders in their meetings on May 31, 2022 and July 30, 2021, respectively.

The appropriation of earnings for 2022 which was approved in the board of directors' meeting on March 6, 2023, was as follows:

	For the Year Ended December 31, 2022
Write-off of the retained earnings for cancellation of the treasury shares	<u>\$ 122,271</u>
Legal reserve	<u>\$ 198,334</u>
Special reserve	<u>\$ 42,532</u>
Cash dividends	<u>\$ 1,701,931</u>
Cash dividends per share (NT\$)	<u>\$ 45.00</u>

The above cash dividends have been distributed by the Company's boards of directors and the rest are yet to be resolved at the shareholders' meetings expected to be held on May 30, 2023.

d. Special reserve

	For the Year Ended December 31 2022	2021
Balance at January 1	\$ 45,891	\$ 34,592
Appropriation:		
Debits to other equity items	-	11,299
Reversal:		
Reversal of debits to other equity items	<u>(23,722)</u>	<u>-</u>
Balance at December 31	<u>\$ 22,169</u>	<u>\$ 45,891</u>

e. Other equity items

1) Unearned employee benefits

For information about the restricted share plans for employees, refer to Note 25.

	For the Year Ended December 31 2022	2021
Balance at January 1	\$ (16,785)	\$ (41,675)
Issued	(78,980)	-
Cancelled	14,457	10,281
Share-based payment expenses recognized	<u>18,625</u>	<u>14,609</u>
Balance at December 31	<u>\$ (62,683)</u>	<u>\$ (16,785)</u>

2) Exchange differences on translation of the financial statements of foreign operations

	For the Year Ended December 31	
	2022	2021
Balance at January 1	\$ (5,384)	\$ (4,217)
Exchange differences on translation of the financial statements of foreign operations	<u>3,366</u>	<u>(1,167)</u>
Balance at December 31	<u><u>\$ (2,018)</u></u>	<u><u>\$ (5,384)</u></u>

f. Treasury stock

The Company's board of directors approved a share buyback for employees' plan on November 7, 2022 to repurchase 60 thousand shares on the Taiwan Stock Exchange during the period from November 8, 2022 to January 7, 2023, with the buyback price ranging from \$1,418 to \$2,544. The reacquired 60 thousand treasury shares from November 9, 2022 to November 18, 2022, totaled NT\$125,150 thousand, and the average price was NT\$2,086 per share.

On December 16, 2022, the Company's board of directors resolved to cancel 60 thousand treasury shares, and the treasury shares held by the Company were NT\$0 as of December 31, 2022.

	Shares Cancelled (In Thousands of Shares)
Number of shares at January 1, 2022	-
Increase during the year	60
Cancelled during the year	<u>(60)</u>
Number of shares at December 31, 2022	<u>-</u>

21. REVENUE

a. Revenue from contracts with customers

	For the Year Ended December 31	
	2022	2021
Revenue from the sale of goods	\$ 5,209,154	\$ 3,636,161
Royalty income	<u>974</u>	<u>1,471</u>
	<u><u>\$ 5,210,128</u></u>	<u><u>\$ 3,637,632</u></u>

b. Contract balances

	December 31, 2022	December 31, 2021	January 1, 2021
Trade receivables (Note 8)	<u>\$ 979,728</u>	<u>\$ 828,723</u>	<u>\$ 515,341</u>
Contract liabilities (Note 17)			
Sale of goods	<u>\$ 33</u>	<u>\$ 71</u>	<u>\$ -</u>

The changes in the contract liability balances primarily result from the timing difference between the Company's performance and the customer's payment.

c. Disaggregation of revenue

g. Compensation of employees and remuneration of directors

The Company accrued compensation of employees and remuneration of directors at rates of no less than 8% and no higher than 3%, respectively, of net profit before income tax, compensation of employees, and remuneration of directors. The compensation of employees and remuneration of directors for the years ended December 31, 2022 and 2021, which have been approved by the Company's board of directors on March 6, 2023 and March 7, 2022, respectively, were as follows:

Accrual rate

	For the Year Ended December 31	
	2022	2021
Compensation of employees	8%	8%
Remuneration of directors	1%	1%

Amount

	For the Year Ended December 31			
	2022		2021	
	Cash	Shares	Cash	Shares
Compensation of employees	\$ 229,900	\$ -	\$ -	\$ 141,518
Remuneration of directors	28,738	-	17,609	-

If there is a change in the amounts after the annual consolidated financial statements are authorized for issue, the differences are recorded as a change in the accounting estimate.

The number of shares of the compensation of employees, which was determined by dividing the amount of the compensation of employees resolved for 2021 by the closing price per share of NT\$2,695, respectively, which is the closing price per share determined on the day immediately preceding the meeting of the Company's board of directors, was 53 thousand shares for 2021.

There is no difference between the actual amounts of compensation of employees and remuneration of directors and supervisors paid and the amounts recognized in the consolidated financial statements for the years ended December 31, 2021 and 2020.

Information on the compensation of employees and remuneration of directors resolved by the Company's board of directors is available at the Market Observation Post System website of the Taiwan Stock Exchange.

h. Gains or losses on foreign currency exchange

	For the Year Ended December 31	
	2022	2021
Foreign exchange gains	\$ 265,583	\$ 10,231
Foreign exchange losses	<u>(73,272)</u>	<u>(63,634)</u>
	<u>\$ 192,311</u>	<u>\$ (53,403)</u>

23. INCOME TAXES RELATING TO CONTINUING OPERATIONS

a. Major components of income tax expense recognized in profit or loss

	For the Year Ended December 31	
	2022	2021
Current tax		
In respect of the current year	\$ 507,257	\$ 324,944
Adjustments for prior years	<u>-</u>	<u>(4,892)</u>
	507,257	320,052
Deferred tax		
In respect of the current year	<u>2,051</u>	<u>(22,900)</u>
Income tax expense recognized in profit or loss	<u>\$ 509,308</u>	<u>\$ 297,152</u>

A reconciliation of accounting loss and income tax expense was as follows:

	For the Year Ended December 31	
	2022	2021
Income before tax from continuing operations	<u>\$ 2,614,922</u>	<u>\$ 1,610,077</u>
Income tax expense calculated at the statutory rate	\$ 526,331	\$ 325,600
Non-deductible expenses in determining taxable income	7,841	(4,413)
Deductible temporary differences	(4,771)	812
Additional income tax under the Alternative Minimum Tax Act	24	22
Investment credits	(20,117)	(19,977)
Adjustments for prior years' tax	<u>-</u>	<u>(4,892)</u>
Income tax expense recognized in profit or loss	<u>\$ 509,308</u>	<u>\$ 297,152</u>

b. Current tax liabilities

	December 31	
	2022	2021
Current tax liabilities		
Income tax payable	<u>\$ 378,402</u>	<u>\$ 222,026</u>

c. Deferred tax assets and liabilities

The movements of deferred tax assets and deferred tax liabilities were as follows:

For the year ended December 31, 2022

	Opening Balance	Recognized in Profit or Loss	Closing Balance
<u>Deferred Tax Assets</u>			
Temporary differences			
Inventory write-down	\$ 1,000	\$ 4,846	\$ 5,846
Investments accounted for using the equity method	3,008	(660)	2,348
Depreciation of decommissioning right-of- use assets	516	257	773
Provisions	7,937	1,990	9,927
Refund liabilities	27,853	(13,935)	13,918
Estimated expense payable and others	<u>8,664</u>	<u>3,405</u>	<u>12,069</u>
	<u>\$ 48,978</u>	<u>\$ (4,097)</u>	<u>\$ 44,881</u>
<u>Deferred Tax Liabilities</u>			
Temporary differences			
Unrealized net foreign exchange gains	\$ 3,711	\$ 11,851	\$ 15,562
Other intangible assets - acquisitions	<u>31,432</u>	<u>(13,897)</u>	<u>17,535</u>
	<u>\$ 35,143</u>	<u>\$ (2,046)</u>	<u>\$ 33,097</u>

For the year ended December 31, 2021

	Opening Balance	Recognized in Profit or Loss	Closing Balance
<u>Deferred Tax Assets</u>			
Temporary differences			
Inventory write-down	\$ 1,813	\$ (813)	\$ 1,000
Investments accounted for using the equity method	3,352	(344)	3,008
Depreciation of decommissioning right-of- use assets	258	258	516
Provisions	6,562	1,375	7,937
Refund liabilities	21,037	6,816	27,853
Estimated expense payable and others	<u>7,122</u>	<u>1,542</u>	<u>8,664</u>
	<u>\$ 40,144</u>	<u>\$ (8,834)</u>	<u>\$ 48,978</u>
<u>Deferred Tax Liabilities</u>			
Temporary differences			
Unrealized net foreign exchange gains	\$ 3,880	\$ (169)	\$ 3,711
Other intangible assets - acquisitions	<u>45,329</u>	<u>(13,897)</u>	<u>31,432</u>
	<u>\$ 49,209</u>	<u>\$ (14,066)</u>	<u>\$ 35,143</u>

d. Income tax assessments

The Company's tax returns through 2019 have been assessed by the tax authorities.

24. EARNINGS PER SHARE

Unit: NT\$ Per Share

	For the Year Ended December 31 2022	2021
Basic earnings per share	\$ 55.72	\$ 34.81
Diluted earnings per share	\$ 55.35	\$ 34.70

The effect of the share dividends has been retroactively adjusted for the calculation of earnings per share, and the base date of the share dividends was set on July 4, 2022. The changes in basic and diluted earnings per share for 2021 due to retroactive adjustments are as follows:

Unit: NT\$ Per Share

	Before Retrospective Adjustment For the Year Ended December 31 2021	After Retrospective Adjustment For the Year Ended December 31 2021
Basic earnings per share	\$ 38.30	\$ 34.81
Diluted earnings per share	\$ 38.17	\$ 34.70

The earnings and weighted-average number of ordinary shares outstanding used in the calculation of earnings per share are as follows:

Net Income for the Year

	For the Year Ended December 31 2022	2021
Earnings used in the computation of basic and diluted earnings per share	\$ 2,105,614	\$ 1,312,925

Unit: Thousands of shares

	For the Year Ended December 31 2022	2021
Weighted average number of ordinary shares in computation of basic earnings per share	37,792	37,719
Effect of potentially dilutive ordinary shares:		
Compensation of employees	146	51
Restricted shares to employees	102	64
Weighted average number of ordinary shares in computation of diluted earnings per share	38,040	37,834

The Group may settle the compensation in cash or shares; therefore, the Group assumes that the entire amount of the compensation will be settled in shares and the resulting potential shares will be included in the weighted average number of shares outstanding used in the computation of diluted earnings per share, as the effect is dilutive. Such dilutive effect of the potential shares is included in the computation of diluted earnings per share until the number of shares to be distributed to employees is resolved in the following year.

25. SHARE-BASED PAYMENT ARRANGEMENTS

a. Restricted share plan for employees

Information on restricted share plan for employees was as follows:

Approved Date	Grant Shares (Thousand)	Board of Directors Approved Issue Date	Issued Date	Issued Shares (Thousand)	Fair Value
2017/05/26	100	2017/11/03	2018/02/05	36	740
2018/05/30	40	2018/11/05	2018/11/12	21	481
2019/05/29	100	2019/08/02	2019/09/10	28	791
2019/05/29	100	2019/08/02	2020/02/05	31	952
2019/05/29	100	2019/08/02	2020/03/02	9	1,005
2022/05/31	60	2022/08/08	2022/08/08	44	1,795

On May 31, 2022, the shareholders held a meeting and resolved to issue a restricted share plan for employees with a total of 60 thousand shares. The Company shall set up the actual issuance date (s) in one tranche or by installments within one year from the effective date of the receipt of registration from the competent authority. The board of directors authorized the Company's chairman to determine the issue date. The main elements of the restricted share plan for employees were as follows:

- 1) Issue price: The Company issued the gratuitous restricted shares for employees.
- 2) Vesting conditions of restricted shares for employees are as follows:
 - a) Employees, who are still employed from the date when new employee restricted stocks are granted and the personal performance conditions signed by individual employees are set and the achievement rate of the Company's operating goals according to the time of giving, may satisfy the vesting conditions in the following proportions of shares, respectively:

The maximum portions of the vesting shares of 2023 are 35%,

The cumulative maximum portions of vesting shares from 2023 to 2024 are 70%,

The cumulative maximum portions of vesting shares from 2023 to 2025 are 100%,
 - b) When the employees do not reach the vesting conditions, the Company will recover and cancel the shares.
 - c) During the vesting period, the dividends will distribute to employees gratuitously.

3) In addition to the vesting conditions, the limitations are as follows:

- a) The employees cannot sell, pledge, transfer, donate or, in any other way, dispose of these shares.
- b) During the vesting period, the rights of attendants in the shareholders' meeting, proposal, speech, resolution and voting right, etc., will be enforced by trust institutions.

On May 29, 2019, the shareholders held a meeting and resolved to issue a restricted share plan for employees with a total of 100 thousand shares. The Company shall set up the actual issuance date(s) in one tranche or by installments within one year from the effective date of the receipt of registration from the competent authority. The board of directors authorized the Company's chairman to determine the issue date. The main elements of the restricted share plan for employees were as follows:

1) Issue price: The Company issued the gratuitous restricted shares for employees.

2) Vesting conditions of restricted shares for employees are as follows:

- a) To meet the vesting conditions, an employee has to meet performance and other conditions over the vesting period, as follows:

Remain employed by the Company within 1 year - 10% of restricted shares will be vested;

Remain employed by the Company within 2 year - 10% of restricted shares will be vested;

Remain employed by the Company within 3 year - 40% of restricted shares will be vested;

Remain employed by the Company within 4 year - 40% of restricted shares will be vested;

- b) When the employees do not reach the vesting conditions, the Company will recover and cancel the shares.
- c) During the vesting period, the dividends will distribute to employees gratuitously.

3) In addition to the vesting conditions, the limitations are as follows:

- a) The employees cannot sell, pledge, transfer, donate or, in any other way, dispose of these shares.
- b) During the vesting period, the rights of attendants in the shareholders' meeting, proposal, speech, resolution and voting right, etc., will be enforced by trust institutions.

Information on restricted share plan for employees was as follows:

	Number of Shares (In Thousands)	
	For the Year Ended December 31	
	2022	2021
Balance at January 1	67	100
Granted	44	-
Vested	(20)	(22)
Cancelled	<u>(20)</u>	<u>(11)</u>
Balance at December 31	<u>71</u>	<u>67</u>

For the years ended December 31, 2022 and 2021, the compensation costs recognized were NT\$18,625 thousand and NT\$14,609 thousand, respectively.

26. CAPITAL MANAGEMENT

The Group manages its capital to ensure that the Group will be able to operate under the premises of going concerns while maximizing the return to shareholders through the optimization of the debt and equity balance.

The capital structure of the Group consists of net debt (borrowings offset by cash and cash equivalents) and equity attributable to owners of the Group (comprising issued capital, reserves, retained earnings and other equity).

The Group is not subject to any externally imposed capital requirements.

Key management personnel of the Group review the capital structure on a regular basis. As part of this review, the key management personnel consider the cost of capital and the risks associated with each class of capital. Based on recommendations of the key management personnel, in order to balance the overall capital structure, the Group may adjust the amount of dividends paid to shareholders and the number of new shares issued.

27. FINANCIAL INSTRUMENTS

a. Fair value of financial instruments not measured at fair value

The management considers that the carrying amounts of financial assets and financial liabilities recognized in the consolidated financial statements approximate their fair values.

b. Fair value of financial instruments measured at fair value

1) Fair value hierarchy

December 31, 2022

	Level 1	Level 2	Level 3	Total
Financial assets at FVTPL-				
current				
Mutual funds	\$ 327,087	\$ -	\$ -	\$ 327,087
Domestic listed shares	199,980	-	-	199,980
Financial assets at FVTPL -				
non-current				
Foreign corporate bonds	-	72,893	-	72,893
	<u>\$ 527,067</u>	<u>\$ 72,893</u>	<u>\$ -</u>	<u>\$ 599,960</u>

December 31, 2021

	Level 1	Level 2	Level 3	Total
Financial assets at FVTPL-				
current				
Mutual funds	\$ 300,681	\$ -	\$ -	\$ 300,681
Foreign shares	12,541	-	-	12,541
Domestic listed shares	218,893	-	-	218,893
Financial assets at FVTPL -				
non-current				
Foreign corporate bonds	-	82,686	-	82,686
	<u>\$ 532,115</u>	<u>\$ 82,686</u>	<u>\$ -</u>	<u>\$ 614,801</u>

There were no transfers between Level 1 and Level 2 in the current and prior periods.

2) Valuation techniques and inputs applied for Level 2 fair value measurement

Financial Instrument	Valuation Technique and Inputs
Foreign corporate bonds	It is based on the quoted market transaction price provided by a third-party institution as a measurement.

c. Categories of financial instruments

	December 31	
	2022	2021
<u>Financial assets</u>		
Financial assets at amortized cost (1)	\$ 3,820,777	\$ 2,816,995
Financial assets at FVTPL	599,960	614,801

Financial liabilities

Measured at amortized cost (2)	549,305	296,768
--------------------------------	---------	---------

- 1) The balances include financial assets measured at amortized cost, which comprise cash and cash equivalents, trade and other receivables and refundable deposits.
- 2) The balances include financial liabilities measured at amortized cost, which comprise trade payables and other payables.

d. Financial risk management objectives and policies

The Group's major financial instruments include mutual investments, trade receivables and trade payables. The Group's Corporate Treasury function provides services to the business, coordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyze exposures by degree and magnitude of risks. These risks include market risk (including foreign currency risk and interest rate risk), credit risk and liquidity risk.

1) Market risk

The Group's activities exposed it primarily to the financial risks of changes in foreign currency exchange rates (see (a) below), and interest rates (see (b) below).

a) Foreign currency risk

The Group had foreign currency sales and purchases, which exposed the Group to foreign currency risk. Approximately 100% of the Group's sales were denominated in currencies other than the functional currency, whilst almost 99% of costs were denominated in the functional currency of the entity in the Group.

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are set out in Note 30.

Sensitivity analysis

The Group was mainly exposed to the USD.

The following table details the Group's sensitivity to a 5% increase and decrease in the New Taiwan dollar (i.e., the functional currency) against the relevant foreign currencies. The sensitivity rate used when reporting foreign currency risk internally to key management personnel and representing management's assessment of the reasonably possible change in foreign exchange rates is 5%. The sensitivity analysis included only outstanding foreign currency denominated monetary items, and adjusts their translation at the end of the reporting period for a 5% change in foreign currency rates. A positive number below indicates an increase in pre-tax profit associated with the New Taiwan dollar strengthening 5% against the relevant currency. For a 5% weakening of the New Taiwan dollar against the relevant currency, there would be an equal and opposite impact on pre-tax profit, and the balances below would be negative.

	USD Impact	
	For the Year Ended December 31	
	2022	2021
Pre-tax profit	\$ 97,377	\$ 80,963

This was mainly attributable to the exposure on outstanding receivables and payables in USD which were not hedged at the end of the reporting period.

The Group's sensitivity to USD currency increased during the current period mainly due to the increase in the net assets of the USD which was due to the increase in bank deposits, cash equivalents and accounts receivable denominated in USD.

The management believes that the sensitivity analysis cannot represent the inherent risk of the exchange rate, because the foreign currency risk at the end of the reporting period cannot reflect the mid-year risk situation.

b) Interest rate risk

Hedging activities are evaluated regularly to align with interest rate views and defined risk appetite, ensuring that the most cost-effective hedging strategies are applied.

The carrying amount of the Group's financial assets and financial liabilities with exposure to interest rates at the end of the reporting period were as follows:

	December 31	
	2022	2021
Fair value interest rate risk		
Financial assets	\$ 2,209,459	\$ 805,078
Cash flow interest rate risk		
Financial assets	692,291	1,254,955

Sensitivity analysis

The sensitivity analysis below was determined based on the Group's exposure to interest rates for both derivative and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis was prepared assuming the amount of each liability outstanding at the end of the reporting period was outstanding for the whole year.

A 0.1 basis point increase or decrease was used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

The Group had no floating rate liabilities for the years ended December 31, 2022 and 2021.

2) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group.

The Group adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group only transacts with entities that are rated the equivalent of investment grade and above. This information is supplied by independent rating agencies where available and, if not available, the Group uses other publicly available financial information and its own trading records to rate its major customers. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the risk management committee annually.

Ongoing credit evaluation is performed on the financial condition of trade receivables and, where appropriate, credit guarantee insurance cover is purchased.

3) Liquidity risk

The Group manages liquidity risk by monitoring and maintaining a level of cash and cash equivalents deemed adequate to finance the Group's operations and mitigate the effects of fluctuations in cash flows. In addition, management monitors the utilization of bank borrowings and ensures compliance with loan covenants.

The Group relies on bank borrowings as a significant source of liquidity. As of December 31, 2022 and 2021, the information of the group's available unutilized short-term bank loan facilities could refer to (2) financing facilities below.

a) Liquidity and interest risk rate table for non-derivative financial liabilities

The Group's remaining contractual maturity for its non-derivative financial liabilities were drawn up based on the undiscounted cash flows (included principal and interest) of financial liabilities from the earliest date on which the Group can be required to pay.

December 31, 2022

	On Demand or Less than 1 Month	1-3 Months	3 Months - 1 Year	1-5 Years	5+ Years	Total
Non-derivative financial liabilities						
Lease liabilities	\$ 2,251	\$ 4,503	\$ 18,932	\$ 15,010	\$ -	\$ 40,696

	<u>\$ 152,579</u>	<u>\$ 145,336</u>	<u>\$ 23,531</u>	<u>\$ 38,337</u>	<u>\$ -</u>	<u>\$ 359,783</u>

Further information on the maturity analysis of the above financial liabilities was as follows:

	Less than 1 Year	1-5 Years	5-10 Years	10-15 Years	15-20 Years	20+ Years
Lease liabilities	<u>\$ 24,678</u>	<u>\$ 38,337</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>

b) Financing facilities:

	<u>December 31</u>	
	<u>2022</u>	<u>2021</u>
Unsecured borrowings facilities		
Amount unused	<u>\$ 1,650,000</u>	<u>\$ 1,050,000</u>

28. TRANSACTIONS WITH RELATED PARTIES

Balances and transactions between the Company and its subsidiaries, which are related parties of the Company, have been eliminated on consolidation and are not disclosed in this note. Besides information disclosed elsewhere in the other notes, details of transactions between the Group and other related parties are disclosed below:

a. Related parties and their relationships associated with the Group:

<u>Related Parties</u>	<u>Relationship with the Group</u>
Avago Technologies International Sales PTE. Limited	Investor with significant influence over the Group (non-related party since February 26, 2021)

b. Purchases

<u>Related Party Name</u>	<u>For the Year Ended December 31</u>	
	<u>2022</u>	<u>2021</u>
Avago Technologies International Sales PTE. Limited	<u>\$ -</u>	<u>\$ 3,612</u>

The purchase of the related party is determined according to the agreed terms of the two parties, and there is no other suitable trading object to compare.

c. Compensation of key management personnel

The total amount of payroll to directors and supervisors and other key executives in 2022 and 2021 were as follows:

	For the Year Ended December 31	
	2022	2021
Short-term benefits	\$ 73,699	\$ 39,415
Post-employment benefits	312	324
Share-based payments	<u>10,284</u>	<u>3,125</u>
	<u>\$ 84,295</u>	<u>\$ 42,864</u>

The remuneration of key executives was determined by the remuneration committee based on the performance of individuals and market trends.

29. SIGNIFICANT CONTINGENT LIABILITIES AND UNRECOGNIZED COMMITMENTS

In addition to those disclosed in other notes, significant commitments and contingencies of the Group as of December 31, 2022 and 2021 were as follows:

Under the agreement, the Group shall pay royalties at a percentage of the sales volume of certain products. For the years ended December 31, 2022 and 2021, royalty expense amounted to \$32,431 thousand and \$14,149 thousand, respectively.

30. SIGNIFICANT ASSETS AND LIABILITIES DENOMINATED IN FOREIGN CURRENCIES

The Group's significant financial assets and liabilities denominated in foreign currencies aggregated by the foreign currencies other than functional currencies of the entities in the Group and the related exchange rates between foreign currencies and respective functional currencies were as follows:

December 31, 2022

	Foreign Currency	Exchange Rate	Carrying Amount
<u>Financial assets</u>			
Monetary items			
USD	\$ 83,206	30.71	\$ 2,555,256
<u>Financial liabilities</u>			
Monetary items			
USD	19,789	30.71	607,720

December 31, 2021

	Foreign Currency	Exchange Rate	Carrying Amount
<u>Financial assets</u>			
Monetary items			
USD	\$ 74,697	27.68	\$ 2,067,613
<u>Financial liabilities</u>			
Monetary items			
USD	16,198	27.68	448,361

The significant unrealized foreign exchange gains (losses) were as follows:

For the Year Ended December 31				
2022		2021		
Foreign Currency	Exchange Rate	Net Foreign Exchange Gain (Loss)	Exchange Rate	Net Foreign Exchange Gain (Loss)
USD	30.71 (USD:NTD)	<u>\$ 77,808</u>	27.68 (USD:NTD)	<u>\$ 18,555</u>

31. SEPARATELY DISCLOSED ITEMS

a. Information on significant transactions and information on investees:

- 1) Financing provided to others: None
- 2) Endorsements/guarantees provided: None
- 3) Marketable securities held:

 - c) The amount of property transactions and the amount of the resultant gains or losses
 - d) The balance of negotiable instrument endorsements or guarantees or pledges of collateral at the end of the period and the purposes
 - e) The highest balance, the end of period balance, the interest rate range, and total current period interest with respect to financing of funds
 - f) Other transactions that have a material effect on the profit or loss for the period or on the financial position, such as the rendering or receipt of services
- d. Information of major shareholders: list all shareholders with ownership of 5% or greater showing the name of the shareholder, the number of shares owned, and percentage of ownership of each shareholder

Name of Major Shareholder	Shares	
	Number of Shares	Percentage of Ownership (%)
Fenghua Investment Co., Ltd.	5,253,076	13.86

Note: The information of major shareholders presented in this table is provided by the Taiwan Depository & Clearing Corporation based on the number of ordinary shares and preference shares held by shareholders with ownership of 5% or greater, that have been issued without physical registration (including treasury shares) by the Company as of the last business day for the current quarter. The share capital in the consolidated financial statements may differ from the actual number of shares that have been issued without physical registration because of different preparation basis.

32. SEGMENT INFORMATION

The Group is considered as a single operating segment. Profit and loss, assets and liabilities are measured on the same basis as the basis for the preparation of the consolidated financial statements. For relevant operating information, refer to the consolidated financial statements.

a. Major revenue of products and services

The following was an analysis of the Group's major revenue by products and services from continuing operations by reportable segments.

	For the Year Ended December 31	
	2022	2021
Multimedia Integrated Circuits (ICs)	\$ 4,863,615	\$ 3,392,407
Computer Peripherals Oriented ICs	338,158	225,360
Other	<u>8,355</u>	<u>19,865</u>
	<u>\$ 5,210,128</u>	<u>\$ 3,637,632</u>

b. Geographical information

The Group's net operating revenue from external customers by location of customer and information about its non-current assets by location are detailed below.

	Revenue from External Customers		Non-current Assets	
	For the Year Ended December 31		December 31	
	2022	2021	2022	2021
Taiwan	\$ 2,842,432	\$ 1,979,936	\$ 1,017,111	\$ 900,265
China	1,812,628	1,024,331	-	-
U.S.A.	141,897	417,711	2,522	5,576
Others	<u>413,171</u>	<u>215,654</u>	<u>-</u>	<u>-</u>
	<u>\$ 5,210,128</u>	<u>\$ 3,637,632</u>	<u>\$ 1,019,633</u>	<u>\$ 905,841</u>

Non-current assets exclude financial instruments and deferred tax assets.

c. Information about major customers

Single customers who contributed 10% or more to the Group's revenue were as follows:

	For the Year Ended December 31	
	2022	2021
Customer A	\$ 878,024	\$ 661,271
Customer B	610,074	407,221
Customer C	499,828	293,596
Customer D	449,268	363,936

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders
ASPEED Technology Inc.

Opinion

We have audited the accompanying financial statements of ASPEED Technology Inc. (the "Company"), which comprise the balance sheets as of December 31, 2022 and 2021, and the statements of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the financial statements, including a summary of significant accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2022 and 2021, and its financial performance and its cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with The Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements for the year ended December 31, 2022. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

The key audit matters identified in the Company's financial statements for the year ended December 31, 2022 are stated as follows:

Recognition of revenue

The Company operates principally as a supplier of multimedia integrated circuits (ICs) and computer peripherals oriented ICs. For the year ended December 31, 2022, the Company recognized revenue of NT\$5,210,126 thousand, which increased by 43% compared with that of last year, refer to Note 21 for related information. Due to the increasing market demand for remote server management system, the significant changes in the amount of the Company's operating revenue in recent years have a significant impact on the financial statements for the year ended December 31, 2022. For customers whose sales growth rates were significant, we considered the existence and occurrence of sales as key audit matters of the current period.

The audit procedures that we performed included, but not limited to the following: We evaluated the appropriateness of the Company's accounting policies relating to revenue recognition. We obtained an understanding of the internal controls over the approval of sales order and shipping. We tested the effectiveness of those internal controls and selected samples of sales documents to verify the sales authenticity by inspecting sales details, including cash collections in the audited period and the subsequent period. Moreover, we checked for abnormalities between the recorded sales and cash received.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient and appropriate audit evidence regarding the financial information of entities or business activities within the Company to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements for the year ended December 31, 2022 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audits resulting in this independent auditors' report are Ming Yuan Chung and Hsin Tung Lin.

Deloitte & Touche

ASPEED TECHNOLOGY INC.

NOTES TO FINANCIAL STATEMENTS

FOR THE YEARS ENDED DECEMBER 31, 2022 AND 2021

(In Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL INFORMATION

ASPEED Technology Inc. (the “Company”) has been approved by the Ministry of Economic Affairs for establishment on November 15, 2004. The Company is mainly engaged in the manufacturing of electronic products, wholesale of information software, retail and service industry, international trade, intellectual property, product design, and other industrial and commercial services. The Company’s shares have been traded on the Taipei Exchange since April 30, 2013.

The financial statements are presented in the Company’s functional currency, the New Taiwan dollar.

2. APPROVAL OF FINANCIAL STATEMENTS

The parent company only financial statements were approved by the Company’s board of directors and authorized for issue on March 6, 2023.

3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

- a. Initial application of the amendments to the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) (collectively, the “IFRSs”) endorsed and issued into effect by the Financial Supervisory Commission (FSC)

The initial application of the IFRSs endorsed and issued into effect by the FSC did not have material impact on the company’s accounting policies.

- b. The IFRSs endorsed by the FSC for application starting from 2023

<u>New, Amended and Revised Standards and Interpretations</u>	<u>Effective Date Announced by International Accounting Standards Board</u>
Amendments to IAS 1 “Disclosure of Accounting Policies”	January 1, 2023 (Note 1)
Amendments to IAS 8 “Definition of Accounting Estimates”	January 1, 2023 (Note 2)
Amendments to IAS 12 “Deferred Tax related to Assets and Liabilities arising from a Single Transaction”	January 1, 2023 (Note 3)

Note 1: The amendments will be applied prospectively for annual reporting periods beginning on or after January 1, 2023.

Note 2: The amendments will be applicable to changes in accounting estimates and changes in accounting policies that occur on or after the beginning of the annual reporting period beginning on or after January 1, 2023.

Note 3: Except for deferred taxes that were recognized on January 1, 2022 for temporary differences associated with leases and decommissioning obligations, the amendments were applied prospectively to transactions that occurred on or after January 1, 2022.

As of the date the financial statements were authorized for issue, the Company is continuously assessing the possible impact of the application of other standards and interpretations on the Company's financial position and financial performance and will disclose the relevant impact when the assessment is completed.

- c. New IFRSs in issue but not yet endorsed and issued into effect by the FSC

New IFRSs	Effective Date Announced by IASB (Note 1)
Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets between An Investor and Its Associate or Joint Venture"	To be determined by IASB
Amendments to IFRS 16 "Leases Liability in a Sale and leaseback"	January 1, 2024 (Note 2)
IFRS 17 "Insurance Contracts"	January 1, 2023
Amendments to IFRS 17	January 1, 2023
Amendments to IFRS 17 "Initial Application of IFRS 9 and IFRS 17-Comparative Information"	January 1, 2023
Amendments to IAS 1 "Classification of Liabilities as Current or Non-current"	January 1, 2024
Amendments to IAS 1 "Non-current Liabilities with Covenants"	January 1, 2024

Note 1: Unless stated otherwise, the above IFRSs are effective for annual reporting periods beginning on or after their respective effective dates.

Note 2: A seller-lessee shall apply the Amendments to IFRS 16 retrospectively to sale and leaseback transactions entered into after the date of initial application of IFRS 16.

As of the date the financial statements were authorized for issue, the Company is continuously assessing the possible impact of the application of other standards and interpretations on the Company's financial position and financial performance and will disclose the relevant impact when the assessment is completed.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICY

- a. Statement of compliance

The parent company only financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

- b. Basis of Preparation

The financial statements have been prepared on the historical cost basis except for financial instruments which are measured at fair value.

The fair value measurements, which are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and based on the significance of the inputs to the fair value measurement in its entirety, are described as follows:

- 1) Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- 2) Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for an asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- 3) Level 3 inputs are unobservable inputs for an asset or liability.

When preparing its parent company only financial statements, the Company used equity method to account for its investment in subsidiaries. In order for the amounts of the net profit for the year, other comprehensive income for the year and total equity in the parent company only financial statements to be the same with the amounts attributable to the owner of the Company in its consolidated financial statements, adjustments arising from the differences in accounting treatment between parent company only basis and consolidated basis were made to investments accounted for using the equity method, share of profit or loss of subsidiaries and related equity items, as appropriate, in the parent company only financial statements.

c. Classification of current and non-current assets and liabilities

Current assets include:

- 1) Assets held primarily for the purpose of trading;
- 2) Assets expected to be realized within 12 months after the reporting period; and
- 3) Cash and cash equivalents unless the asset is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period.

Current liabilities include:

- 1) Liabilities held primarily for the purpose of trading;
- 2) Liabilities due to be settled within 12 months after the reporting period, even if an agreement to refinance, or to reschedule payments, on a long-term basis is completed after the reporting period and before the financial statements are authorized for issue; and
- 3) Liabilities for which the Company does not have an unconditional right to defer settlement for at least 12 months after the reporting period.

Assets and liabilities that are not classified as current are classified as non-current.

d. Business combinations

Acquisitions of businesses are accounted for using the acquisition method. Acquisition-related costs are generally recognized in profit or loss as they are incurred.

Goodwill is measured as the excess of the sum of the consideration transferred and the fair value of the acquirer's previously held equity interests in the acquiree over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

e. Foreign currencies

In preparing the parent company only financial statements, transactions in currencies other than the Company's functional currency (i.e., foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the period in which they arise.

Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Exchange differences arising from the retranslation of non-monetary items are included in profit or loss for the period except for exchange differences arising from the retranslation of non-monetary items in respect of which gains and losses are

recognized directly in other comprehensive income; in which cases, the exchange differences are also recognized directly in other comprehensive income.

Non-monetary items that are measured at historical cost in a foreign currency are not retranslated.

f. Inventories

Inventories consist of work-in-process and finished goods are stated at the lower of cost or net realizable value. Inventory write-downs are made by item, except where it may be appropriate to Company similar or related items. Net realizable value is the estimated selling price of inventories less all estimated costs of completion and costs necessary to make the sale. Inventories are recorded at standard cost and adjusted to approximate weighted-average cost on the balance sheet date.

g. Investments in subsidiaries

The Company uses the equity method to account for its investments in subsidiaries.

Subsidiaries are the entities controlled by the Company.

Under the equity method, the investment in a subsidiary is initially recognized at cost, and the carrying amount is increased or decreased to recognize the Company's share of the profit or loss and other comprehensive income of the subsidiary after the date of acquisition. Besides, the Company also recognizes the Company's share of the change in other equity of the subsidiary.

Changes in the Company's ownership interest in a subsidiary that do not result in the Company losing control of the subsidiary are equity transactions. Any difference between the carrying amount of the investment and the fair value of the consideration paid or received is recognized in equity.

When the Company's share of losses of a subsidiary exceeds its interest in that subsidiary (which includes any carrying amount of the investment accounted for by the equity method and long-term interests that, in substance, form part of the Company's net investment in the subsidiary), the Company continues recognizing its share of further losses.

Any excess of the cost of acquisition over the Company's share of the net fair value of the identifiable assets and liabilities of a subsidiary that constitutes a business at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment and is not amortized. Any excess of the Company's share of the net fair value of the identifiable assets and liabilities of a subsidiary that constitutes a business over the cost of acquisition is recognized immediately in profit or loss.

The Company assesses its investment for any impairment by comparing the carrying amount with the estimated recoverable amount as assessed based on the investee's financial statements as a whole. Impairment loss is recognized when the carrying amount exceeds the recoverable amount. If the recoverable amount of the investment subsequently increases, the Company recognizes the reversal of the impairment loss; the adjusted post-reversal carrying amount should not exceed the carrying amount that would have been recognized (net of amortization or depreciation) had no impairment loss been recognized in prior years. An impairment loss recognized on goodwill cannot be reversed in a subsequent period.

When the Company loses control of a subsidiary, it recognizes the investment retained in the former subsidiary at its fair value at the date when control is lost. The difference between the fair value of the retained investment plus any consideration received and the carrying amount of the previous investment at the date when control is lost is recognized as a gain or loss in profit or loss. Besides, the Company accounts for all amounts previously recognized in other comprehensive income in relation to that subsidiary on the same basis as would be required had the Company directly disposed of the related assets or liabilities.

Profits or losses resulting from downstream transactions are eliminated in full only in the parent company only financial statements. Profits and losses resulting from upstream transactions and transactions between subsidiaries are recognized only in the parent company financial statements and only to the extent of interests in the subsidiaries that are not related to the Company.

h. Property, plant and equipment

Property, plant and equipment are stated at cost, less accumulated depreciation.

Depreciation on property, plant and equipment is recognized using the straight-line method. Each significant part is depreciated separately. The estimated useful lives, residual values and depreciation methods are reviewed at the end of each reporting period, with the effects of any changes in estimates accounted for on a prospective basis.

On derecognition of an item of property, plant and equipment, the difference between the sales proceeds and the carrying amount of the asset is recognized in profit or loss.

i. Goodwill

Goodwill arising from the acquisition of a business is measured at cost as established at the date of acquisition of the business less accumulated impairment loss.

For the purposes of impairment testing, goodwill is allocated to each of the Company's cash-generating units or groups of cash-generating units (referred to as "cash-generating units") that is expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually or more frequently when there is an indication that the unit may be impaired, by comparing its carrying amount, including the attributed goodwill, with its recoverable amount. However, if the goodwill allocated to a cash-generating unit was acquired in a business combination during the current annual period, that unit shall be tested for impairment before the end of the current annual period. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then pro rata to the other assets of the unit based on the carrying amount of each asset in the unit. Any impairment loss is recognized directly in profit or loss. Any impairment loss recognized for goodwill is not reversed in subsequent periods.

If goodwill has been allocated to a cash-generating unit and the entity disposes of an operation within that unit, the goodwill associated with the operation which is disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal and is measured on the basis of the relative values of the operation disposed of and the portion of the cash-generating unit retained.

j. Intangible assets

1) Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are initially measured at cost and subsequently measured at cost less accumulated amortization. Amortization is recognized on a straight-line basis. The estimated useful life, residual value, and amortization method are reviewed at the end of each reporting period, with the effect of any changes in the estimate accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are measured at cost less accumulated impairment loss.

2) Internally-generated intangible assets - research and development expenditure

Expenditure on research activities is recognized as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from the development phase of an internal project is recognized if, and only if, all of the following have been demonstrated:

- a) The technical feasibility of completing the intangible asset so that it will be available for use or sale;
- b) The intention to complete the intangible asset and use or sell it;
- c) The ability to use or sell the intangible asset;
- d) How the intangible asset will generate probable future economic benefits;
- e) The availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- f) The ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognized for internally-generated intangible assets is the sum of the expenditure incurred from the date when such an intangible asset first meets the recognition criteria listed above. Subsequent to initial recognition, they are measured on the same basis as intangible assets that are acquired separately.

3) Intangible assets acquired in a business combination

Intangible assets acquired in a business combination and recognized separately from goodwill are initially recognized at their fair value at the acquisition date (which is regarded as their cost). Subsequent to initial recognition, they are measured on the same basis as intangible assets that are acquired separately.

4) Derecognition of intangible assets

On derecognition of an intangible asset, the difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss.

k. Impairment of property, plant and equipment, right-of-use assets and intangible assets other than goodwill

At the end of each reporting period, the Company reviews the carrying amounts of its property, plant and equipment, right-of-use assets and intangible assets, excluding goodwill, to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Corporate assets are allocated to the smallest group of cash-generating units on a reasonable and consistent basis of allocation.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

The recoverable amount is the higher of fair value less costs to sell and value in use. If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount, with the resulting impairment loss recognized in profit or loss.

When an impairment loss is subsequently reversed, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but only to the extent of the carrying amount that would have been determined had no impairment loss been recognized on the asset or cash-generating unit in prior years. A reversal of an impairment loss is recognized in profit or loss.

1. Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognized immediately in profit or loss.

1) Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

a) Measurement categories

Financial assets are classified into the following categories: Financial assets at FVTPL and financial assets at amortized cost.

i. Financial assets at FVTPL

Financial assets are classified as at FVTPL when such a financial asset is mandatorily classified as at FVTPL. Financial assets mandatorily classified as at FVTPL include investments in equity instruments which are not designated as at FVTOCI and debt instruments that do not meet the amortized cost criteria or the FVTOCI criteria.

Financial assets at FVTPL are subsequently measured at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any dividends or interest earned on such a financial asset. Fair value is determined in the manner described in Note 27.

ii. Financial assets at amortized cost

Financial assets that meet the following conditions are subsequently measured at amortized cost:

- i) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- ii) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, financial assets at amortized cost, including cash and cash equivalents, trade receivables and other receivables at amortized cost refundable deposits, are measured at amortized cost, which equals the gross carrying amount determined using the effective interest method less any impairment loss. Exchange differences are recognized in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of such a financial asset, except for:

- i) Purchased or originated credit-impaired financial assets, for which interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of such financial assets; and
- ii) Financial assets that are not credit impaired on purchase or origination but have subsequently become credit impaired, for which interest income is calculated by applying the effective interest rate to the amortized cost of such financial assets in subsequent reporting periods.

A financial asset is credit impaired when one or more of the following events have occurred:

- i) Significant financial difficulty of the issuer or the borrower;
- ii) Breach of contract, such as a default;
- iii) It is becoming probable that the borrower will enter bankruptcy or undergo a financial reorganization; or
- iv) The disappearance of an active market for that financial asset because of financial difficulties.

Cash equivalents include time deposits with original maturities within 3 months from the date of acquisition, which are highly liquid, readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These cash equivalents are held for the purpose of meeting short-term cash commitments.

b) Impairment of financial assets

The Company recognizes a loss allowance for expected credit losses on financial assets at amortized cost (including trade receivables (including related parties)).

The Company always recognizes lifetime expected credit losses (ECLs) for trade receivables. For all other financial instruments, the Company recognizes lifetime ECLs when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month ECLs.

Expected credit losses reflect the weighted average of credit losses with the respective risks of default occurring as the weights. Lifetime ECLs represent the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECLs represent the portion of lifetime ECLs that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

The Company recognizes an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account, except for investments in debt instruments that are measured at FVTOCI, for which the loss allowance is recognized in other comprehensive income and does not reduce the carrying amount of the financial asset.

For internal credit risk management purposes, the Group determines that the following situations indicate that a financial asset is in default (without taking into account any collateral held by the Group):

- i. Internal or external information show that the debtor is unlikely to pay its creditors.

c) Derecognition of financial assets

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the financial asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the financial asset to another party.

On derecognition of a financial asset at amortized cost in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss.

2) Equity instruments

Equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs.

The repurchase of the Company's own equity instruments is recognized in and deducted directly from equity, and its carrying amounts are calculated base on weighted average by share types and calculated separately by repurchase category. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

3) Financial Liabilities

a) Subsequent measurement

All financial liabilities are measured at amortized cost using the effective interest method.

b) Derecognition of financial liabilities

The difference between the carrying amount of the financial liabilities derecognized and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

m. Provisions

Provisions are measured at the best estimate of the discounted cash flows of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

1) Warranties

Provisions for the expected cost of warranty obligations to assure that products comply with agreed-upon specifications are recognized on the date of sale of the relevant products at the best estimate by the management of the Company of the expenditures required to settle the Company's obligations.

2) Decommissioning

The Company has the obligation for decommissioning at the end of the useful lives of offices. Pursuant to regulations, the Company estimates the decommissioning costs, which are discounted by applying the effective interest rate and recognized as the carrying amount. The decommissioning costs are capitalized and added to the carrying amount of property, plant and equipment.

The Company recognizes both the increased decommissioning provisions discounted on a time basis and interest expense. The Company regularly reviews the change of decommissioning obligation at each end of the reporting period and adjusts it to reflect the best estimates.

n. Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances. Allowance for sales returns and liability for returns are recognized at the time of sale based on the seller's reliable estimate of future returns and based on past experience and other relevant factors.

The Company identifies contracts with customers, allocates the transaction price to the performance obligations and recognizes revenue when performance obligations are satisfied.

1) Revenue from the sale of goods

Revenue from the sale of goods comes from sales of multimedia integrated circuits (ICs) and computer peripherals oriented ICs. Sales of multimedia ICs and computer peripherals oriented ICs are recognized as revenue when the ICs are delivered to the customer. Trade receivables are recognized concurrently because it is the time when the customer has full discretion to set the price, use, resell the goods to future customers and bears the risks of obsolescence.

The Company does not recognize revenue on materials delivered to subcontractors because this delivery does not involve a transfer of control.

2) Royalties revenue

Royalty revenue is recognized on an accrual basis in accordance with the substance of the relevant agreement and provided that it is probable that the economic benefits will flow to the Company and that the amount of revenue can be measured reliably. Royalties determined on a time basis are recognized on a straight-line basis over the period of the agreement. Royalty arrangements that are based on production, sales and other measures are recognized by reference to the underlying arrangements.

o. Leasing

At the inception of a contract, the Company assesses whether the contract is, or contains, a lease.

1) The Company as lessor

Leases are classified as finance leases whenever the terms of a lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

When the Company subleases a right-of-use asset, the sublease is classified by reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. However, if the head lease is a short-term lease that the Company, as a lessee, has accounted for applying recognition exemption, the sublease is classified as an operating lease.

2) The Company as lessee

The Company recognizes right-of-use assets and lease liabilities for all leases at the commencement date of a lease, except for short-term leases and low-value asset leases accounted for applying a recognition exemption where lease payments are recognized as expenses on a straight-line over the lease terms.

Right-of-use assets are initially measured at cost, which comprises the initial measurement of lease liabilities adjusted for lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs needed to restore the underlying assets, and less any lease incentives received. Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses and adjusted for any remeasurement of the lease liabilities. Right-of-use assets are presented on a separate line in the balance sheets.

Right-of-use assets are depreciated using the straight-line method from the commencement dates to the earlier of the end of the useful lives of the right-of-use assets or the end of the lease terms.

Lease liabilities are initially measured at the present value of the lease payments. The lease payments are discounted using the interest rate implicit in a lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses the lessee's incremental borrowing rate.

Subsequently, lease liabilities are measured at amortized cost using the effective interest method, with interest expense recognized over the lease terms. When there is a change in a lease term, the Company remeasures the lease liabilities with a corresponding adjustment to the right-of-use-assets. However, if the carrying amount of the right-of-use assets is reduced to zero, any remaining amount of the remeasurement is recognized in profit or loss. Lease liabilities are presented on a separate line in the balance sheets.

p. Employee benefits

1) Short-term employee benefits

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related services.

2) Retirement benefits

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered services entitling them to the contributions.

q. Restricted shares for employees

The fair value at the grant date of the restricted shares for employees is expensed on a straight-line basis over the vesting period, based on the Company's best estimates of the number of shares or options that are expected to ultimately vest, with a corresponding increase in other equity - unearned employee benefit. It is recognized as an expense in full at the grant date if vesting immediately.

When restricted shares for employees are issued, other equity - unearned employee benefits is recognized on the grant date, with a corresponding increase in capital surplus - restricted shares for employees. If restricted shares for employees are granted for consideration and should be returned, they are recognized as payables. Dividends paid to employees on restricted shares that do not need to be returned if employees resign in the vesting period are recognized as expenses when the dividends are declared with a corresponding adjustment in capital surplus - restricted shares for employees.

At the end of each reporting period, the Company revises its estimate of the number of restricted shares for employees expected to vest. The impact of the revision of the original estimates is recognized in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to capital surplus - restricted share option for employees.

r. Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

1) Current tax

According to the income tax law in the ROC, an additional tax on unappropriated earnings is provided for in the year the shareholders approve to retain earnings.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

2) Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities and the corresponding tax bases used in the computation of taxable profit.

If a temporary difference arises from the initial recognition of assets and liabilities in a transaction that (other than in the acquisition of a subsidiary) affects neither the taxable profit nor the accounting profit, the resulting deferred tax asset or liability is not recognized. In addition, a deferred tax liability is not recognized on any taxable temporary difference arising from the initial recognition of goodwill included in the investment in the subsidiary.

Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences, research and development expenditures and personnel training expenditures to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. A previously unrecognized deferred tax asset is also reviewed at the end of each reporting period and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the year which the liability is settled or the asset is realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

3) Current and deferred taxes

Current and deferred taxes are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred taxes are also recognized in other comprehensive income or directly in equity, respectively.

Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Company's accounting policies, management is required to make judgments, estimates and assumptions on the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered relevant. Actual results may differ from these estimates.

The Company considers the possible impact of the recent development of the COVID-19 and its economic environment implications when making its critical accounting estimates on cash flows, growth rates, discount rates, profitabilities, etc. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised if the revisions affect only that period or in the period of the revisions and future periods if the revisions affect both current and future periods.

Key Sources of Estimation Uncertainty

a. Write-down of Inventories

The net realizable value of inventories is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. The estimation of net realizable value is based on current market conditions and historical experience in the sale of product of a similar nature. Changes in market conditions may have a material impact on the estimation of the net realizable value.

b. Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The calculation of the value in use requires management to estimate the future cash flows expected to arise from the cash-generating units and a suitable discount rate in order to calculate the present value. Where the actual future cash flows are less than expected, a material impairment loss may arise.

6. CASH AND CASH EQUIVALENTS

	December 31	
	2022	2021
Cash on hand	\$ 101	\$ 101
Demand deposits	653,617	1,215,529
Cash equivalents (investments with original maturities of 3 months or less)		
Repurchase agreements collateralized by bonds	2,056,720	722,392
Time deposits	79,846	-
	<u>\$ 2,790,284</u>	<u>\$ 1,938,022</u>

The market rate intervals of cash in the bank at the end of the reporting period were as follows:

	December 31	
	2022	2021
Bank deposits	0.05%-4.88%	0.01%-0.20%
Repurchase agreements collateralized by bonds	3.55%-4.10%	0.30%

7. FINANCIAL INSTRUMENTS AT FAIR VALUE THROUGH PROFIT OR LOSS

	December 31	
	2022	2021
Financial assets mandatorily classified as at FVTPL-current		
Non-derivative financial assets		
Mutual funds	\$ 327,087	\$ 300,681
Domestic listed shares	199,980	218,893
Foreign shares	-	12,541
	<u>\$ 527,067</u>	<u>\$ 532,115</u>
Financial assets mandatorily classified as at FVTPL - non-current		
Non-derivative financial assets		
Foreign corporate bonds	<u>\$ 72,893</u>	<u>\$ 82,686</u>

8. TRADE RECEIVABLES

	December 31	
	2022	2021
<u>Trade receivables</u>		
Non-related parties	<u>\$ 979,726</u>	<u>\$ 828,723</u>
<u>Trade receivables</u>		
At amortized cost		
Gross carrying amount	\$ 979,726	\$ 828,723
Less: Allowance for impairment loss	-	-
	<u>\$ 979,726</u>	<u>\$ 828,723</u>

The average credit period of sale of goods was 30-60 days. The Company adopted a policy that is in order to minimize credit risk, the management of the Company regularly reviews credit limits and credit approvals and performs other monitoring procedures to ensure that follow-up action is taken to recover overdue debts.

Before trading with new customers, the Company assesses the potential customer's credit quality and defines credit limits based on the credit rating system. Credit rating information is obtained from independent rating agencies where available or, if not available, the Company uses other publicly available financial information or its own trading records to rate its major customers.

As for the trade receivables that are overdue at the end of the reporting date but not yet recognized as the allowance for bad debts, the credit quality has not changed significantly; thus, the management of the Company believes that the amount can still be recovered. The Company does not hold any collateral or other credit enhancements to those trade receivables.

The Company which permits the use of lifetime expected loss provision for all trade receivables. The expected credit losses on trade receivables are estimated using a provision matrix approach considering the past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of economic conditions at the reporting date. As the Company's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished according to the Company's different customer base.

The Company writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery. For trade receivables that have been written off, the Company continues to engage in enforcement activity to attempt to recover the receivables due. Where recoveries are made, these are recognized in profit or loss.

The following table details the loss allowance of trade receivables based on the Company's provision matrix.

December 31, 2022

	Gross Carrying Amount	Loss Allowance	Amortized Cost
Not past due	\$ 687,222	\$ -	\$ 687,222
Past due			
Within 30 days	255,608	-	255,608
31-60 days	22,062	-	22,062
61-90 days	10,461	-	10,461
91-180 days	<u>4,373</u>	<u>-</u>	<u>4,373</u>
	<u>\$ 979,726</u>	<u>\$ -</u>	<u>\$ 979,726</u>

December 31, 2021

	Gross Carrying Amount	Loss Allowance	Amortized Cost
Not past due	\$ 561,879	\$ -	\$ 561,879
Past due			
Within 30 days	249,288	-	249,288
31-60 days	17,418	-	17,418
61-90 days	138	-	138
91-180 days	<u>-</u>	<u>-</u>	<u>-</u>
	<u>\$ 828,723</u>	<u>\$ -</u>	<u>\$ 828,723</u>

9. INVENTORIES

	December 31	
	2022	2021
Finished goods	\$ 282,388	\$ 110,533
Work in progress	<u>118,004</u>	<u>46,980</u>
	<u>\$ 400,392</u>	<u>\$ 157,513</u>

The cost of inventories recognized as cost of goods sold for the years ended December 31, 2022 and 2021 was \$1,818,976 thousand and \$1,262,074 thousand, respectively. The cost of inventories recognized as operating cost were as follows:

	December 31	
	2022	2021
Inventory write-downs (reversal)	<u>\$ 24,231</u>	<u>\$ (4,067)</u>
Loss on disposal of inventories	<u>\$ 6,569</u>	<u>\$ 4,694</u>

10. INVESTMENT ACCOUNTED FOR USING EQUITY METHOD

a. Investments in subsidiaries

	December 31	
	2022	2021
ASPEED Technology (Samoa) Inc.	\$ 45,626	\$ 36,771
ASPEED Technology India Private Limited	74	75
Cupola360 Inc.	<u>4,472</u>	<u>6,662</u>
	<u>\$ 50,172</u>	<u>\$ 43,508</u>

Name of Subsidiaries	Proportion of Ownership and Voting Rights	
	December 31	
	2022	2021
ASPEED Technology (Samoa) Inc.	100%	100%
ASPEED Technology India Private Limited (Note)	1%	1%
Cupola360 Inc.	100%	100%

Note: The Company holds 99% shares of ASPEED Technology India Private Limited through ASPEED Technology (Samoa) Inc., as ASPEED Technology India Private Limited is a 100% owned subsidiary of the Company.

The investment accounted for using the equity method and the calculation of the share of profit or loss and other comprehensive income were recognized based on the financial statements of subsidiaries that have been audited.

11. PROPERTY, PLANT AND EQUIPMENT

	December 31	
	2022	2021
Assets used by the Company	\$ 217,496	\$ 188,523

a. Year 2022

	Year Ended December 31, 2022				Balance at End of the Year
	Balance at Beginning of the Year	Additions	Disposals	Reclassification Adjustment	
<u>Cost</u>					
Machinery equipment	\$ 23,525	\$ 10,306	\$ (1,430)	\$ -	\$ 32,401
Office equipment	14,716	3,069	(928)	-	16,857
Other equipment	259,159	94,168	(55)	-	353,272
	<u>297,400</u>	<u>\$ 107,543</u>	<u>\$ (2,413)</u>	<u>\$ -</u>	<u>402,530</u>
<u>Accumulated depreciation</u>					
Machinery equipment	14,972	\$ 5,712	\$ (1,430)	\$ -	19,254
Office equipment	6,210	3,474	(928)	-	8,756
Other equipment	87,695	69,384	(55)	-	157,024
	<u>108,877</u>	<u>\$ 78,570</u>	<u>\$ (2,413)</u>	<u>\$ -</u>	<u>185,034</u>
Carrying amount	<u>\$ 188,523</u>				<u>\$ 217,496</u>

b. Year 2021

	Year Ended December 31, 2021				
	Balance at Beginning of the Year	Additions	Disposals	Reclassification Adjustment	Balance at End of the Year
<u>Cost</u>					
Machinery equipment	\$ 26,826	\$ 2,326	\$ (5,627)	\$ -	\$ 23,525
Office equipment	12,879	3,783	(1,946)	-	14,716
Other equipment	193,979	105,423	(43,197)	2,954	259,159
	<u>233,684</u>	<u>\$ 111,532</u>	<u>\$ (50,770)</u>	<u>\$ 2,954</u>	<u>297,400</u>
<u>Accumulated depreciation</u>					
Machinery equipment	12,946	\$ 5,907	\$ (3,881)	\$ -	14,972
Office equipment	5,345	2,811	(1,946)	-	6,210
Other equipment	71,729	59,163	(43,197)	-	87,695
	<u>90,020</u>	<u>\$ 67,881</u>	<u>\$ (49,024)</u>	<u>\$ -</u>	<u>108,877</u>
Carrying amount	<u>\$ 143,664</u>				<u>\$ 188,523</u>

The above items of property, plant and equipment are depreciated on a straight-line basis over their following estimated useful lives as follows:

Machinery equipment	3-5 years
Office equipment	4-5 years
Other equipment	3-5 years

12. LEASE ARRANGEMENTS

a. Right-of-use assets

	December 31	
	2022	2021
<u>Carrying amount</u>		
Buildings	\$ 37,799	\$ 58,745
Transportation equipment	<u>1,624</u>	<u>-</u>
	<u>\$ 39,423</u>	<u>\$ 58,745</u>
	For the Year Ended December 31	
	2022	2021
Additions to right-of-use assets	<u>\$ 3,760</u>	<u>\$ 637</u>
Depreciation charge for right-of-use assets		
Buildings	\$ 21,901	\$ 22,218
Transportation equipment	<u>1,181</u>	<u>662</u>
	<u>\$ 23,082</u>	<u>\$ 22,880</u>

b. Lease liabilities

	December 31	
	2022	2021
<u>Carrying amount</u>		
Current	<u>\$ 22,716</u>	<u>\$ 20,534</u>
Non-current	<u>\$ 14,896</u>	<u>\$ 35,522</u>

Range of discount rate for lease liabilities was as follows:

	December 31	
	2022	2021
Buildings	2.00%	2.00%
Transportation equipment	2.50%	-

c. Material lease-in activities and terms

The Company leases certain buildings for the use of manufacturing and office with lease terms of 1 to 5 years. The Company doesn't have options to purchase the equipment for a nominal amount at the end of the lease terms. In addition, the Company is prohibited from subleasing or transferring all or any portion of the underlying assets without the lessor's consent.

d. Other lease information

	For the Year Ended December 31	
	2022	2021
Expenses relating to short-term leases	<u>\$ 963</u>	<u>\$ 229</u>
Expenses relating to low-value asset leases	<u>\$ 77</u>	<u>\$ 127</u>
Total cash outflow for leases	<u>\$ (24,219)</u>	<u>\$ (22,994)</u>

The Company's leases of certain office equipment qualify as short-term and low-value asset leases. The Company has elected to apply the recognition exemption and thus, did not recognize right-of-use assets and lease liabilities for these leases.

13. GOODWILL

	For the Year Ended December 31	
	2022	2021
<u>Cost</u>		
Balance at beginning and end of the year	<u>\$ 369,040</u>	<u>\$ 369,040</u>

On December 30, 2016, the Company acquired the pilot product line, which was mainly expected to create synergies and benefits to the company's existing products. When an impairment test is performed, the goodwill is related to the Company and deemed as a single cash-generating unit. Therefore, the impairment of goodwill is assessed by calculating the recoverable amount of the Company and the carrying amount of the net assets.

In addition, according to the asset impairment assessment analysis report issued by the Company, the financial forecast of the company from 2023 to 2027 is based on the financial analysis, according to the following: (a) management's reference to revenue growth rate of historical period, and (b) the difference between actual results and estimates of operating profit from 2019 to 2022, with conservative data as the basis for prediction.

The recoverable amount of the total cash-generating unit is still greater than the carrying amount, so no impairment loss is recognized.

The Company's recoverable amount is determined on the basis of the value in use, and the cash flow estimate of the financial budget for the next five years is approved by the management of the Company and is calculated using the annual discount rate of 16.10%.

14. OTHER INTANGIBLE ASSETS

For the Years Ended December 31, 2022				
	Balance at Beginning of the Year	Additions	Disposals	Balance at End of the Year

	Warranties	Decommissioning
Balance at January 1, 2022	\$ 39,686	\$ 6,447
Additional provisions recognized	<u>9,948</u>	<u>-</u>
Balance at December 31, 2022	<u>\$ 49,634</u>	<u>\$ 6,447</u>

- a. The provision for warranty claims represents the present value of management's best estimate of the future outflow of economic benefits. The estimate has been made on the basis of historical warranty trends and may vary as a result of new materials, altered manufacturing processes or other events affecting product quality.
- b. The provision for decommissioning represents the Company's obligation to decommission.(including the restoration of the office). The costs are estimated based on internal research, and the Company regularly reviews and adjusts it to reflect the best estimates.

19. RETIREMENT BENEFIT PLANS

The Company adopted a pension plan under the Labor Pension Act (LPA), which is deemed a defined contribution plan. Pursuant to the LPA, the Company makes monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages.

The total expenses recognized in the consolidated statement of comprehensive income were \$8,138 thousand and \$6,447 thousand, representing the contributions made and to be made to these plans by the Company at the rates specified in the plans for the years ended December 31, 2022 and 2021, respectively.

20. EQUITY

- a. Ordinary share capital

	December 31	
	2022	2021
Number of shares authorized (in thousands of shares)	<u>50,000</u>	<u>50,000</u>
Shares authorized par value \$10 (in thousands of NTD)	<u>\$ 500,000</u>	<u>\$ 500,000</u>
Number of shares issued and fully paid (in thousands of shares)	<u>37,821</u>	<u>34,369</u>
Shares issued and fully paid (in thousands of NTD)	<u>\$ 378,207</u>	<u>\$ 343,694</u>

Ordinary shares issued and fully paid have a par value of NT\$10. Each share has one voting right and the right to receive dividends.

On March 7, 2022, the board of directors of the Company resolved to take back 14,000 new shares of restricted employee rights from former employees without compensation in accordance with the law. The Company had capital reduction operation, and the base date for capital reduction was March 7, 2022. The registration of the change was completed on March 16, 2022.

On March 7, 2022, the board of directors of the Company made a resolution in accordance with the Company's Article, article 241 subparagraphs 1 and 2 of paragraph 1 which stipulate that capital reserves should be used for capital, and the total amount of the annual capital shall not exceed 10% of the paid-in capital. The proposed capital reserve of NT\$34,355 thousand was converted into capital for the issuance of new shares at NT\$10 per share, with 3,436 thousand shares allotted to 100 shares for every 1,000 shares, and were approved by the shareholders in their meeting on May 31, 2022. The board of directors were authorized to complete the record date in accordance with the relevant regulations on July 4, 2022, and the registration of the change was completed on July 13, 2022.

On March 7, 2022, the board of directors of the Company made a resolution to convert the employees' compensation into capital stock with NT\$141,518 thousand, NT\$10 per share. The above-mentioned capital increase was reported at the general meeting of the shareholders on May 31, 2022 and was approved by the competent authority to declare and take effect. The base date of the capital increase is also set on August 9, 2022 with 52 thousand shares, and the registration of the change was completed on August 29, 2022.

On August 8, 2022, the board of directors of the Company made a resolution in the new employee restricted stocks with 44 thousand shares at NT\$10 per share. The above-mentioned issuance of new shares was approved and declared to be effective by the competent authority, and the registration of the change was completed on August 29, 2022, refer to Note 25.

On November 7, 2022, the board of directors of the Company resolved to take back 6 thousand shares of restricted employee rights from former employees without compensation in accordance with the law. The capital reduction operation was planned, and the base date for capital reduction was November 7, 2022. The registration of the change was completed on November 18, 2022.

On December 16, 2022, the board of directors of the Company resolved to cancel the treasury shares in accordance with the law and eliminated a total of 60 thousand issued shares. The base date for capital reduction was December 16, 2022, and the registration of the change was completed on December 28, 2022.

b. Capital surplus

	December 31	
	2022	2021
May be used to offset a deficit, distributed as cash dividends, or transferred to share capital (a)		
Issuance of ordinary shares	\$ 756,385	\$ 793,019
Employee share bonus	608,492	467,500
From expired/vested employee restricted shares	69,599	54,483
From expired/exercised employee share options	2,156	2,156
<u>May not be used for any purpose</u>		
Employee restricted shares	<u>103,146</u>	<u>53,972</u>
	<u>\$ 1,539,778</u>	<u>\$ 1,371,130</u>

- a) The capital surplus may be used to offset a deficit; in addition, when the Company has no deficit, such capital surplus may be distributed as cash dividends or transferred to share capital (limited to a certain percentage of the Company's capital surplus and to once a year).

c. Retained earnings and dividend policy

The shareholders of the Company held their regular meeting on May 29, 2019 and in that meeting, resolved the amendments to the Company's Articles of Incorporation (the "Articles"). The amendments explicitly stipulate that the Company may allocate a portion or all of its reserves for distribution in accordance with relevant laws or regulations or the orders of the authorities in charge. When the reserves are to be distributed in cash, the distribution may be approved by the board of directors and reported to the shareholders in their meeting.

Under fixing the dividends policy as set forth in the amended Articles, where the Company made a profit in a fiscal year, the profit shall be first utilized for paying taxes, offsetting losses of previous years, setting aside as a legal reserve of 10% of the remaining profit, setting aside or reversing a special reserve in accordance with the laws and regulations, and then any remaining profit together with any undistributed retained earnings shall be used by the Company's board of directors as the basis for proposing a distribution plan, which should be resolved by the shareholders in their meeting when the reserves are to be distributed as bonuses to shareholders.

For the policies on the distribution of compensation of employees and remuneration of directors and supervisors after the amendment, refer to compensation of employees and remuneration of directors and supervisors in Note 22(g).

The Company's Articles stipulate the dividends policy based on present and future projects, investment environment, capital requirements, domestic and international competitive environment, and the interests of shareholders, whereby the Company distributes no less than 10% of the distributable earnings in the form of dividend bonus. If the accumulatively distributable earnings were less than 50% of the Company's paid-in capital, the dividend bonus would not be distributed. In principle, cash dividends are limited to no less than 10% of the total dividends distributed.

The appropriation of earnings to a legal reserve shall be made until the legal reserve equals the Company's paid-in capital. The legal reserve may be used to offset any deficit. If the Company has no deficit and the legal reserve has exceeded 25% of the Company's paid-in capital, the excess may be transferred to capital or distributed in cash.

The special reserve should be appropriated from the prior years' unappropriated earnings to the extent of the debit balance accumulated from prior years. Afterward, if there is any reversal of the decrease in other stockholders' equity, the Company is allowed to appropriate retained earnings from the reversal amount.

The appropriations of earnings for 2021 and 2020 were as follows:

	Appropriation of Earnings	
	For the Year Ended December 31	
	2021	2020
Legal reserve	\$ 131,292	\$ 100,470
(Reversal) recognition of special reserve	\$ (23,722)	\$ 11,299
Cash dividends	\$ 1,202,427	\$ 892,204
Cash dividends per share (NT\$)	\$ 35.00	\$ 26.00

The above appropriations for cash dividends were resolved by the Company's board of directors on March 7, 2022 and March 8, 2021. The other appropriation of earnings for 2021 and 2020 were proposed by shareholder in their meetings on May 31, 2022 and July 30, 2021, respectively.

The appropriation of earnings for 2022 which was approved in the board of directors' meeting on March 6, 2023 as follows:

	For the Year Ended December 31, 2022
Write-off of the retained earnings for cancellation of treasury shares	<u>\$ 122,271</u>
Legal reserve	<u>\$ 198,334</u>
Special reserve	<u>\$ 42,532</u>
Cash dividends	<u>\$ 1,701,931</u>
Cash dividends per share (NT\$)	<u>\$ 45.00</u>

The above cash dividends have been distributed by the Company's boards of directors and the rest are yet to be resolved at the shareholder's meetings expected to be held on May 30, 2023.

d. Special reserve

	For the Year Ended December 31 2022	2021
Balance at January 1	\$ 45,891	\$ 34,592
Appropriation :		
Debits to other equity items	-	11,299
Reversal:		
Reversal of debits to other equity items	<u>(23,722)</u>	<u>-</u>
Balance at December 31	<u>\$ 22,169</u>	<u>\$ 45,891</u>

e. Other equity items

1) Unearned employee benefits

For information about the restricted share plans for employees, refer to Note 25.

	For the Year Ended December 31 2022	2021
Balance at January 1	\$ (16,785)	\$ (41,675)

Balance at December 31	<u>\$ (62,683)</u>	<u>\$ (16,785)</u>

2) Exchange differences on translation of the financial statements of foreign operations

	For the Year Ended December 31 2022	2021
Balance at January 1	\$ (5,384)	\$ (4,217)
Exchange differences on translation of the financial statements of foreign operations	<u>3,366</u>	<u>(1,167)</u>
Balance at December 31	<u>\$ (2,018)</u>	<u>\$ (5,384)</u>

f. Treasury shares

The Company's board of directors approved a share buyback for employees' plan on November 7, 2022 to repurchase 60 thousand shares on the Taiwan Stock Exchange during the period from November 8, 2022 to January 7, 2023, with the buyback price ranging from \$1,418 to \$2,544. The reacquired 60 thousand treasury shares from November 9, 2022 to November 18, 2022, totaled NT\$125,150 thousand, and the average price was NT\$2,086 per share.

On December 16, 2022, the Company's board of directors resolved to cancel 60 thousand treasury shares, and the treasury shares held by the Company were NT\$0 as of December 31, 2022.

	Shares Cancelled (In Thousands of Shares)
Number of shares at January 1, 2022	-
Increase during the year	60
Cancelled during the year	<u>(60)</u>
Number of shares at December 31, 2022	<u>-</u>

21. REVENUE

a. Revenue from contracts with customers

	For the Year Ended December 31	
	2022	2021
Revenue from the sale of goods	\$ 5,209,152	\$ 3,636,161
Royalty income	<u>974</u>	<u>1,471</u>
	<u>\$ 5,210,126</u>	<u>\$ 3,637,632</u>

b. Contract balances

	December 31, 2022	December 31, 2021	January 1, 2021
Trade receivables (Note 8)	<u>\$ 979,726</u>	<u>\$ 828,723</u>	<u>\$ 515,341</u>
Contract liabilities (Note 17)			
Sale of goods	<u>\$ 33</u>	<u>\$ 71</u>	<u>\$ -</u>

The changes in the contract liability balances primarily result from the timing difference between the Company's performance and the customer's payment.

g. Compensation of employees and remuneration of directors

The Company accrued compensation of employees and remuneration of directors at rates of no less than 8% and no higher than 3%, respectively, of net profit before income tax, compensation of employees, and remuneration of directors. The compensation of employees and remuneration of directors for the years ended December 31, 2022 and 2021, which have been approved by the Company's board of directors on March 6, 2023 and March 7, 2022, respectively, were as follows:

Accrual rate

	For the Year Ended December 31	
	2022	2021
Compensation of employees	8%	8%
Remuneration of directors	1%	1%

Amount

	For the Year Ended December 31			
	2022		2021	
	Cash	Shares	Cash	Shares
Compensation of employees	\$ 229,900	\$ -	\$ -	\$ 141,518
Remuneration of directors	28,738	-	17,690	-

If there is a change in the amounts after the annual parent company only financial statements are authorized for issue, the differences are recorded as a change in the accounting estimate.

The number of shares of the compensation of employees, which was determined by dividing the amount of the compensation of employees resolved for 2021 by the closing price per share of NT\$2,695, respectively, which is determined on the day immediately preceding the meeting of the Company's board of directors, was 53 thousand shares for 2021.

There is no difference between the actual amounts of compensation of employees and remuneration of directors and supervisors paid and the amounts recognized in the parent company only financial statements for the years ended December 31, 2021 and 2020.

Information on the compensation of employees and remuneration of directors resolved by the Company's board of directors is available at the Market Observation Post System website of the Taiwan Stock Exchange.

h. Gains or losses on foreign currency exchange

	For the Year Ended December 31	
	2022	2021
Foreign exchange gains	\$ 270,116	\$ 10,303
Foreign exchange losses	<u>(73,272)</u>	<u>(63,634)</u>
	<u>\$ 196,844</u>	<u>\$ (53,331)</u>

23. INCOME TAXES RELATING TO CONTINUING OPERATIONS

a. Major components of income tax expense recognized in profit or loss

	For the Year Ended December 31	
	2022	2021
Current tax		
In respect of the current year	\$ 504,044	\$ 323,092
Adjustments for prior years	<u>-</u>	<u>(4,892)</u>
	504,044	318,200
Deferred tax		
In respect of the current year	<u>5,456</u>	<u>(21,358)</u>
Income tax expense recognized in profit or loss	<u>\$ 509,500</u>	<u>\$ 296,842</u>

A reconciliation of accounting loss and income tax expense was as follows:

	For the Year Ended December 31	
	2022	2021
Income before tax from continuing operations	<u>\$ 2,615,114</u>	<u>\$ 1,609,767</u>
Income tax expense calculated at the statutory rate	\$ 523,023	\$ 321,953
Non-deductible expenses in determining taxable income	6,614	(3,578)
Deductible temporary differences	(20)	3,336
Investment credits	(20,117)	(19,977)
Adjustments for prior years' tax	<u>-</u>	<u>(4,892)</u>
Income tax expense recognized in profit or loss	<u>\$ 509,500</u>	<u>\$ 296,842</u>

b. Current tax liabilities

	December 31	
	2022	2021
Current tax liabilities		
Income tax payable	<u>\$ 378,402</u>	<u>\$ 222,026</u>

c. Deferred tax assets and liabilities

The movements of deferred tax assets and deferred tax liabilities were as follows:

For the year ended December 31, 2022

	Opening Balance	Recognized in Profit or Loss	Closing Balance
<u>Deferred Tax Assets</u>			
Temporary differences			
Inventory write-down	\$ 1,000	\$ 4,846	\$ 5,846
Investments accounted for using the equity method	3,008	(660)	2,348
Provisions	7,937	1,990	9,927
Refund liabilities	27,853	(13,935)	13,918
Deferred depreciation expense for decommissioning of right-of-use assets	<u>516</u>	<u>257</u>	<u>773</u>
	<u>\$ 40,314</u>	<u>\$ (7,502)</u>	<u>\$ 32,812</u>
<u>Deferred Tax Liabilities</u>			
Temporary differences			
Unrealized net foreign exchange gains	\$ 3,711	\$ 11,851	\$ 15,562
Other intangible assets - acquisitions	<u>31,432</u>	<u>(13,897)</u>	<u>17,535</u>
	<u>\$ 35,143</u>	<u>\$ (2,046)</u>	<u>\$ 33,097</u>

For the year ended December 31, 2021

	Opening Balance	Recognized in Profit or Loss	Closing Balance
<u>Deferred Tax Assets</u>			
Temporary differences			
Inventory write-down	\$ 1,813	\$ (813)	\$ 1,000
Investments accounted for using the equity method	3,352	(344)	3,008
Provisions	6,562	1,375	7,937
Refund liabilities	21,037	6,816	27,853
Deferred depreciation expense for decommissioning of right-of-use assets	<u>258</u>	<u>258</u>	<u>516</u>
	<u>\$ 33,022</u>	<u>\$ 7,292</u>	<u>\$ 40,314</u>
<u>Deferred Tax Liabilities</u>			
Temporary differences			
Unrealized net foreign exchange gains	\$ 3,880	\$ (169)	\$ 3,711
Other intangible assets - acquisitions	<u>45,329</u>	<u>(13,897)</u>	<u>31,432</u>
	<u>\$ 49,209</u>	<u>\$ (14,066)</u>	<u>\$ 35,143</u>

d. Income tax assessments

The Company's tax returns through 2019 have been assessed by the tax authorities.

24. EARNINGS PER SHARE

Unit: NT\$ Per share

	For the Year Ended December 31	
	2022	2021
Basic earnings per share	<u>\$ 55.72</u>	<u>\$ 34.81</u>
Diluted earnings per share	<u>\$ 55.35</u>	<u>\$ 34.70</u>

The effect of the share dividends has been retroactively adjusted for the calculation of earnings per share, and the base date of the share dividends was set on July 4, 2022. The changes in basic and diluted earnings per share for 2021 due to retroactive adjustments are as follows:

Unit: NT\$ Per share

	Before Retrospective Adjustment	After Retrospective Adjustment
	For the Year Ended December 31 2021	For the Year Ended December 31 2021
Basic earnings per share	<u>\$ 38.30</u>	<u>\$ 34.81</u>
Diluted earnings per share	<u>\$ 38.17</u>	<u>\$ 34.70</u>

The earnings and weighted-average number of ordinary shares outstanding used in the calculation of earnings per share are as follows:

Net income for the year

	For the Year Ended December 31	
	2022	2021
Earnings used in the computation of basic and diluted earnings per share	<u>\$ 2,105,614</u>	<u>\$ 1,312,925</u>

Unit: Thousands of shares

	For the Year Ended December 31	
	2022	2021
Weighted average number of ordinary shares in computation of basic earnings per share	37,792	37,719
Effect of potentially dilutive ordinary shares:		
Compensation of employees	146	51
Restricted shares to employees	<u>102</u>	<u>64</u>
Weighted average number of ordinary shares in computation of diluted earnings per share	<u>38,040</u>	<u>37,834</u>

The Company may settle the compensation in cash or shares; therefore, the Company assumes that the entire amount of the compensation will be settled in shares, and the resulting potential shares are included in the

weighted average number of shares outstanding used in the computation of diluted earnings per share, as the effect is dilutive. Such dilutive effect of the potential shares is included in the computation of diluted earnings per share until the number of shares to be distributed to employees is resolved in the following year.

25. SHARE-BASED PAYMENT ARRANGEMENTS

Restricted share plan for employees

Information on restricted share plan for employees was as follows:

Approved Date	Grant Shares (Thousand)	Board of Directors Approved Issue Date	Issued Date	Issued Shares (Thousand)	Fair Value
2017/05/26	100	2017/11/03	2018/02/05	36	\$ 740
2018/05/30	40	2018/11/05	2018/11/12	21	481
2019/05/29	100	2019/08/02	2019/09/10	28	791
2019/05/29	100	2019/08/02	2020/02/05	31	952
2019/05/29	100	2019/08/02	2020/03/02	9	1,005
2022/05/31	60	2022/08/08	2022/08/08	44	1,795

On May 31, 2022, the shareholders held a meeting and resolved to issue a restricted share plan for employees with a total of 60 thousand shares. The Company shall set up the actual issuance date (s) in one tranche or by installments within one year from the effective date of the receipt of registration from the competent authority. The board of directors authorized the Company's chairman to determine the issue date. The main elements of the restricted share plan for employees were as follows:

- a. Issue price: the Company issued the gratuitous restricted shares for employees.
- b. Vesting conditions of restricted shares for employees are as follows:
 - a) Employees, who are still employed from the date when new employee restricted stocks are granted and the personal performance conditions signed by individual employees are set and the achievement rate of the Company's operating goals according to the time of giving, may satisfy the vesting conditions in the following proportions of shares respectively:

The maximum portions of the vesting shares of 2023 are 35%,

The cumulative maximum portions of vesting shares from 2023 to 2024 are 70%,

The cumulative maximum portions of vesting shares from 2023 to 2025 are 100%,
 - b) When the employees do not reach the vesting conditions, the Company will recover and cancel the shares.
 - c) During the vesting period, the dividends will distribute to employees gratuitously.
- c. In addition to the vesting conditions, the limitations are as follows:
 - a) The employees cannot sell, pledge, transfer, donate or, in any other way, dispose of these shares.
 - b) During the vesting period, the rights of attendants in the shareholders' meeting, proposal, speech, resolution and voting right, etc., will be enforced by trust institutions.

On May 29, 2019, the shareholders held a meeting and resolved to issue a restricted share plan for employees with a total of 100 thousand shares. The Company shall set up the actual issuance date (s) in one tranche or by installments within one year from the effective date of the receipt of registration from the competent authority. The board of directors authorized the Company's chairman to determine the issue date. The main elements of the restricted share plan for employees were as follows:

- a. Issue price: the Company issued the gratuitous restricted shares for employees.
- b. Vesting conditions of restricted shares for employees are as follows:
 - a) To meet the vesting conditions, an employee has to meet performance and other conditions over the vesting period, as follows:

Remain employed by the Company within 1 year - 10% of restricted shares will be vested;

Remain employed by the Company within 2 year - 10% of restricted shares will be vested;

Remain employed by the Company within 3 year - 40% of restricted shares will be vested;

Remain employed by the Company within 4 year - 40% of restricted shares will be vested;
 - b) When the employees do not reach the vesting conditions, the Company will recover and cancel the shares.
 - c) During the vesting period, the dividends will distribute to employees gratuitously.
- c. In addition to the vesting conditions, the limitations are as follows:
 - a) The employees cannot sell, pledge, transfer, donate or, in any other way, dispose of these shares.
 - b) During the vesting period, the rights of attendants in the shareholders' meeting, proposal, speech, resolution and voting right, etc., will be enforced by trust institutions.

Information on restricted share plan for employees was as follows:

	Number of Shares (In Thousands)	
	For the Year Ended December 31	
	2022	2021
Balance at January 1	67	100
Granted	44	-
Vested	(20)	(22)
Cancelled	<u>(20)</u>	<u>(11)</u>
Balance at December 31	<u><u>71</u></u>	<u><u>67</u></u>

For the years ended December 31, 2022 and 2021, the compensation costs recognized were NT\$18,625 thousand and NT\$14,609 thousand, respectively.

26. CAPITAL MANAGEMENT

The Company manages its capital to ensure that the Company will be able to operate under the premises of going concerns while maximizing the return to shareholders through the optimization of the debt and equity balance.

The capital structure of the Company consists of net debt (borrowings offset by cash and cash equivalents) and equity attributable to owners of the Company (comprising issued capital, reserves, retained earnings and other equity).

The Company is not subject to any externally imposed capital requirements.

Key management personnel of the Company review the capital structure on a regular basis. As part of this review, the key management personnel consider the cost of capital and the risks associated with each class of capital. Based on recommendations of the key management personnel, in order to balance the overall capital structure, the Company may adjust the amount of dividends paid to shareholders and the number of new shares issued.

27. FINANCIAL INSTRUMENTS

a. Fair value of financial instruments not measured at fair value

The management considers that the carrying amounts of financial assets and financial liabilities recognized in the financial statements approximate their fair values.

b. Fair value of financial instruments measured at fair value

1) Fair value hierarchy

December 31, 2022

	Level 1	Level 2	Level 3	Total
Financial assets at FVTPL- current				
Mutual funds	\$ 327,087	\$ -	\$ -	\$ 327,087
Domestic listed shares	199,980	-	-	199,980
Financial assets at FVTPL - non- current				
Foreign corporate bonds	-	72,893	-	72,893
	<u>\$ 527,067</u>	<u>\$ 72,893</u>	<u>\$ -</u>	<u>\$ 599,960</u>

December 31, 2021

	Level 1	Level 2	Level 3	Total
Financial assets at FVTPL- current				
Mutual funds	\$ 300,681	\$ -	\$ -	\$ 300,681
Foreign shares	12,541	-	-	12,541
Domestic listed shares	218,893	-	-	218,893
Financial assets at FVTPL - non- current				
Foreign corporate bonds	-	82,686	-	82,686
	<u>\$ 532,115</u>	<u>\$ 82,686</u>	<u>\$ -</u>	<u>\$ 614,801</u>

There were no transfers between Level 1 and Level 2 in the current and prior years.

2) Valuation techniques and inputs applied for Level 2 fair value measurement

Financial Instrument	Valuation Technique and Inputs
Foreign corporate bonds	It is based on the quoted market transaction price provided by a third-party institution as a measurement..

c. Categories of financial instruments

	December 31	
	2022	2021
<u>Financial assets</u>		
Financial assets at amortized cost (1)	\$ 3,781,798	\$ 2,777,296
Financial assets at FVTPL	599,960	614,801
<u>Financial liabilities</u>		
Measured at amortized cost (2)	551,695	303,006
1) The balances include financial assets at amortized cost, which comprise cash and cash equivalents, trade and other receivables and refundable deposits.		
2) The balances include financial liabilities measured at amortized cost, which comprise trade payables and other payables (including related parties).		

d. Financial risk management objectives and policies

The Company's major financial instruments include mutual investments, trade receivables and trade payables. The Company's Corporate Treasury function provides services to the business, coordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Company through internal risk reports which analyze exposures by degree and magnitude of risks. These risks include market risk (including foreign currency risk and interest rate risk), credit risk and liquidity risk.

1) Market risk

The Company's activities exposed it primarily to the financial risks of changes in foreign currency exchange rates (see (a) below), and interest rates (see (b) below).

a) Foreign currency risk

The Company had foreign currency sales and purchases, which exposed the Company to foreign currency risk. Approximately 100% of the Company's sales were denominated in currencies other than the functional currency, whilst almost 99% of costs were denominated in the Company's functional currency.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are set out in Note 30.

Sensitivity analysis

The Company was mainly exposed to the USD.

The following table details the Company's sensitivity to a 5% increase and decrease in the New Taiwan dollar (i.e., the functional currency) against the relevant foreign currencies. The sensitivity rate used when reporting foreign currency risk internally to key management personnel and representing management's assessment of the reasonably possible change in foreign exchange rates is 5%. The sensitivity analysis included only outstanding foreign currency denominated monetary items, and adjusts their translation at the end of the reporting period for a 5% change in foreign currency rates. A positive number below indicates an increase in pre-tax profit associated with the New Taiwan dollar strengthening 5% against the relevant currency. For a 5% weakening of the New Taiwan dollar against the relevant currency, there would be an equal and opposite impact on pre-tax profit, and the balances below would be negative.

	USD Impact	
	For the Year Ended December 31	
	2022	2021
Pre-tax profit	\$ 97,377	\$ 80,963

This was mainly attributable to the exposure on outstanding receivables and payables in USD which were not hedged at the end of the reporting period.

The Company's sensitivity to USD currency increased during the current period mainly due to the increase in the net assets of the USD which was due to the increase in bank deposits, cash equivalents and accounts receivable denominated in USD.

The management believes that the sensitivity analysis cannot represent the inherent risk of the exchange rate, because the foreign currency risk at the end of the reporting period cannot reflect the mid-year risk situation.

b) Interest rate risk

Hedging activities are evaluated regularly to align with interest rate views and defined risk appetite, ensuring that the most cost-effective hedging strategies are applied.

The carrying amount of the Company's financial assets and financial liabilities with exposure to interest rates at the end of the reporting period were as follows:

	December 31	
	2022	2021
Fair value interest rate risk		
Financial assets	\$ 2,209,459	\$ 805,078
Cash flow interest rate risk		
Financial assets	653,617	1,215,529

Sensitivity analysis

The sensitivity analysis below was determined based on the Company's exposure to interest rates for both derivative and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis was prepared assuming the amount of each liability outstanding at the end of the reporting period was outstanding for the whole year.

A 0.1 basis point increase or decrease was used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

The Company had no floating rate liabilities for the years ended December 31, 2022 and 2021.

2) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company.

The Company adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Company only transacts with entities that are rated the equivalent of investment grade and above. This information is supplied by independent rating agencies where available and, if not available, the Company uses other publicly available financial information and its own trading records to rate its major customers. The Company's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the risk management committee annually.

Ongoing credit evaluation is performed on the financial condition of trade receivables and, where appropriate, credit guarantee insurance cover is purchased.

3) Liquidity risk

The Company manages liquidity risk by monitoring and maintaining a level of cash and cash equivalents deemed adequate to finance the Company's operations and mitigate the effects of fluctuations in cash flows. In addition, management monitors the utilization of bank borrowings and ensures compliance with loan covenants.

The Company relies on bank borrowings as a significant source of liquidity. As of December 31, 2022 and 2021, the information of the company's available unutilized short-term bank loan facilities could refer to (2) financing facilities below.

a) Liquidity and interest risk rate table for non-derivative financial liabilities

The Company's remaining contractual maturity for its non-derivative financial liabilities were drawn up based on the undiscounted cash flows (included principal and interest) of financial liabilities from the earliest date on which the Company can be required to pay.

December 31, 2022

	On Demand or Less than 1 Month	1-3 Months	3 Months - 1 Year	1-5 Years	5+ Years	Total
<u>Non-derivative financial liabilities</u>						
Lease liabilities	\$ 1,948	\$ 3,897	\$ 17,418	\$ 15,010	\$ -	\$ 38,273
Non-interest bearing						
Trade payables	154,296	163,028	-	-	-	317,324
Other payables	<u>227,468</u>	<u>1,213</u>	<u>5,690</u>	<u>-</u>	<u>-</u>	<u>234,371</u>
	<u>\$ 383,712</u>	<u>\$ 168,138</u>	<u>\$ 29,413</u>	<u>\$ 15,010</u>	<u>\$ -</u>	<u>\$ 589,968</u>

Further information on the maturity analysis of the above financial liabilities was as follows:

	Less than 1 Year	1-5 Years	5-10 Years	10-15 Years	15-20 Years	20+ Years
Lease liabilities	\$ 23,263	\$ 15,010	\$ -	\$ -	\$ -	\$ -

December 31, 2021

	On Demand or Less than 1 Month	1-3 Months	3 Months - 1 Year	1-5 Years	5+ Years	Total
Non-derivative financial liabilities						
Lease liabilities	\$ 1,789	\$ 3,578	\$ 16,100	\$ 36,153	\$ -	\$ 57,620
Non-interest bearing						
Trade payables	134,509	129,610	-	-	-	264,119
Other payables	22,255	11,618	5,014	-	-	38,887
	<u>\$ 158,553</u>	<u>\$ 144,806</u>	<u>\$ 21,114</u>	<u>\$ 36,153</u>	<u>\$ -</u>	<u>\$ 360,626</u>

Further information on the maturity analysis of the above financial liabilities was as follows:

	Less than 1 Year	1-5 Years	5-10 Years	10-15 Years	15-20 Years	20+ Years
Lease liabilities	\$ 21,467	\$ 36,153	\$ -	\$ -	\$ -	\$ -

b) Financing facilities:

	<u>December 31</u>	
	2022	2021
<u>Unsecured borrowings facilities</u>		
Amount unused	<u>\$ 1,650,000</u>	<u>\$ 1,050,000</u>

28. TRANSACTIONS WITH RELATED PARTIES

In addition to those disclosed in other notes, detail of transactions between the Company and related parties are disclosed below.

a. Related parties and their relationships associated with the Company:

Related Parties	Relationship with the Company
Avago Technologies International Sales PTE. Limited	Investor with significant influence over the Company (non-related parties since February 26, 2021)
ASPEED Technology (U.S.A.) Inc.	Subsidiary
ASPEED Technology India Private Limited	Subsidiary
Cupola360 Inc.	Subsidiary

b. Purchases

Related Party Name	For the Year Ended December 31	
	2022	2021
Avago Technologies International Sales PTE. Limited	\$ <u> -</u>	\$ <u>3,612</u>

The purchase of the related party is determined according to the agreed terms of the two parties, and there is no other suitable trading object to compare.

c. Operating expenses - Technology services expense

Related Party Name	December 31	
	2022	2021
ASPEED Technology (U.S.A.) Inc.	\$ <u>72,094</u>	\$ <u>79,807</u>

d. Payables to related parties

Line Items	Related Party Name	December 31	
		2022	2021
Other payables to related parties	ASPEED Technology (U.S.A.) Inc.	\$ <u>3,805</u>	\$ <u>7,427</u>

The outstanding trade payables to related parties are unsecured. The transaction price was based on the market price and is determined by both parties.

e. Lease arrangements - Company is lessor arrangements

Lease arrangements - Company is lessor under operating leases

The Company leases out its equipment to its subsidiary - Cupola360 Inc. under operating leases with lease terms of 1 year.

Future lease payment receivables are as follows:

Related Party Category/Name	December 31	
	2022	2021
Cupola360 Inc.	\$ <u> 36</u>	\$ <u> 36</u>

Lease income was as follows:

Related Party Category/Name	For the Year Ended December 31	
	2022	2021
Cupola360 Inc.	\$ <u> 36</u>	\$ <u> 36</u>

f. Compensation of key management personnel

The total amount of payroll to directors and supervisors and other key executives in 2022 and 2021 were as follows:

	For the Year Ended December 31	
	2022	2021
Short-term benefits	\$ 73,699	\$ 39,415
Post-employment benefits	312	324
Share-based payments	<u>10,284</u>	<u>3,125</u>
	<u>\$ 84,295</u>	<u>\$ 42,864</u>

The remuneration of key executives was determined by the remuneration committee based on the performance of individuals and market trends.

29. SIGNIFICANT CONTINGENT LIABILITIES AND UNRECOGNIZED COMMITMENTS

In addition to those disclosed in other notes, significant commitments and contingencies of the Company as of December 31, 2022 and 2021 were as follows:

Under the agreement, the Company shall pay royalties at a percentage of the sales volume of certain products. For the years ended December 31, 2022 and 2021, royalty expenses amounted to \$32,431 thousand and \$14,149 thousand, respectively.

30. SIGNIFICANT ASSETS AND LIABILITIES DENOMINATED IN FOREIGN CURRENCIES

The Company's significant financial assets and liabilities denominated in foreign currencies aggregated by the foreign currencies other than functional currencies and the related exchange rates between foreign currencies and respective functional currencies were as follows:

December 31, 2022

	Foreign Currency	Exchange Rate	Carrying Amount
<u>Financial assets</u>			
Monetary items			
USD	\$ 83,206	30.71	\$ 2,555,256
Non-monetary items			
Investments accounted for using the equity method			
USD	1,488	30.71	45,696
<u>Financial liabilities</u>			
Monetary items			
USD	19,789	30.71	607,720

December 31, 2021

	Foreign Currency	Exchange Rate	Carrying Amount
<u>Financial assets</u>			
Monetary items			
USD	\$	74,697	27.68
Non-monetary items			\$ 2,067,623
Investments accounted for using the equity method			
USD		1,331	27.68
			36,846

Financial liabilities

Monetary items			
USD		16,198	27.68
			448,361

The significant unrealized foreign exchange gains (losses) were as follows:

Foreign Currency	Exchange Rate	2022	Exchange Rate	2021
		Net Foreign Exchange Gain (Loss)		Net Foreign Exchange Gain (Loss)
USD	30.71 (USD:NTD)	<u>\$ 77,808</u>	27.68 (USD:NTD)	<u>\$ 18,555</u>

31. SEPARATELY DISCLOSED ITEMS

a. Information on significant transactions and information on investees:

- 1) Financing provided to others: None
- 2) Endorsements/guarantees provided: None
- 3) Marketable securities held (excluding investments in subsidiaries, associates and interests in joint ventures):

3. Cash Flow Analysis

(1) Consolidated Report

a. Analysis of the Change in Cash Flow in 2022

Unit: NT\$1,000

Cash Balance Dec. 31, 2021	Net Cash Provided by Operating Activities in 2022	Net Cash Outflows from Investing and Financing Activities in 2022	Impact of Foreign Exchange ratio	Cash Balance Dec. 31,2022	Remedy for Cash Shortfall (Investment & Financing Plan)
\$1,977,448	\$2,309,634	(\$1,528,253)	\$70,129	\$2,828,958	—
Analysis of cash flow changes in the current year: a. Operating activities: Net cash inflow of NT\$2,309,634 thousand, mainly from operating profits. b. Financing activities: Net cash outflow of NT\$1,528,253 thousand, mainly due to the distribution of cash dividend.					

b. Remedial Actions for Cash Shortfall: The Company has ample cash on-hand; remedial actions are not required.

c. Cash Flow Projection for Next Year: The Company, on the premise of maintaining stable cash liquidity, will carefully plan and manage cash expenditures related to investments and operations while taking, cash balances on accounts, cash flows from operating activities and investing activities and the status of financial markets into consideration.

(2) Parent Company

a. Analysis of the Change in Cash Flow in 2022

Unit: NT\$1,000

Cash Balance Dec. 31, 2021	Net Cash Provided by Operating Activities in 2022	Net Cash Outflows from Investing and Financing Activities in 2022	Impact of Foreign Exchange ratio	Cash Balance Dec. 31,2022	Remedy for Cash Shortfall (Investment & Financing Plan)
\$1,938,022	\$2,309,269	(\$1,524,821)	\$67,814	\$2,790,284	—
Analysis of cash flow changes in the current year: a. Operating activities: Net cash inflow of NT\$2,309,269 thousand, mainly from operating profits. b. Financing activities: Net cash outflow of NT\$1,524,821 thousand, mainly due to the distribution of cash dividend.					

b. Remedial Actions for Cash Shortfall: The Company has ample cash on-hand; remedial actions are not required.

c. Cash Flow Projection for Next Year: The Company, on the premise of maintaining stable cash liquidity, will carefully plan and manage cash expenditures related to investments and operations while taking, cash balances on accounts, cash flows

from operating activities and investing activities and the status of financial markets into consideration.

4. Major Capital Expenditure: None.

5. Investment Policies

The Company's investments are long-term strategic investments. Investment gain from equity method investment in 2022 was NT\$3,298 thousand. The Company will keep its long-term strategic investment policy and evaluate investment plans prudently.

6. Risk Management

(1) Risks Associated with Interest Rate Fluctuation, Foreign Exchange Volatility, and Inflation

Unit: NT\$1,000

Item	2021		2022	
	Amount	% of net income before tax	Amount	% of net income before tax
Net Interest income	10,141	1%	31,572	1%
Net Interest expense	3,266	—	3,841	—
Net exchange (loss) gains	(53,403)	(3)%	192,311	7%

Sources: financial reports certified by CPA.

a. Risks associated with interest rate:

The Company mainly operates on its own funds and only has a low amount of bank loans, so interest expenses are limited. Furthermore, the Company is conservative in principle when using its funds, and mainly uses short-term time deposits, so its interest revenue is not high. In the future, the Company will continue to monitor changes in the economic environment of Taiwan and overseas, and take necessary measures in a timely manner to avoid the risk of rising interest rates.

b. Risks associated with foreign currency:

The Company's exchange gains (losses) accounted for (1.47%) and 3.69% of its net operating income in 2021 and 2022, respectively. Hence, changes in exchange rates do not have a material effect on the Company's profit and loss. The Company's transactions are mainly calculated in USD, so changes in the NTD/USD exchange rate have certain impact on the Company's profit and loss, and response measures are as follows:

(I) The Company's Finance Department utilizes the natural hedging effect from procurements and sales both denominated in foreign currency.

(II) Dedicated personnel closely follow exchange rate fluctuations, collect information on international exchange rate trends and exchange rate fluctuations, are fully aware of future trends in exchange rates, and keep in touch with the foreign exchange department of banks. After considering the professional advice provided by the departments and the Company's cash requirements, the personnel reduce risks by exchanging currency at appropriate times.

(III) Depending on the position of foreign currency, hedging is carried out in accordance with the Operating Procedures for Asset Acquisition or Disposal Handling Procedure when necessary.

c. Risks associated with inflation:

Inflation is currently not severe in Taiwan and has not had a material impact on the Company, but the Company will continue to appropriately monitor inflation.

(2) Risks Associated with High-Risk/High-Leveraged Investment; Lending, Endorsements, and Guarantees for Other Parties; and Financial Derivative Transactions

Risks	Implementation status	Policy and response measures
High risk, highly leveraged investments	The Company has not engaged in any high risk, highly leveraged investments as of the print date of this report respectively	The Company is focused on its main business and does not use its capital for high risk, highly leveraged investments.
loans to third parties	The Company has not lent any funds to others as of the print date of this report respectively.	If the Company lends funds to others in the future, it will carry out procedures in accordance with its Procedures for Regulations Governing Management of Loaning of Funds, and make a public announcement and report the lending of funds to others in accordance with the law.
Endorsements and guarantees	The Company has not provided endorsements or guarantees for others as of the print date of this report respectively.	If the Company provides endorsements or guarantees for others in the future, it will carry out procedures in accordance with its Endorsement and Guarantee Operation Procedure, and make a public announcement and report the endorsements or guarantees for others in accordance with the law.
Derivative transactions	The Company has not engaged in any	If the Company needs to engage in derivative transactions in the future,

Risks	Implementation status	Policy and response measures
	derivative transactions as of the print date of this report respectively.	it will do so in accordance with its Procedures for Handling Derivative Transactions, and make a public announcement and report the derivative transactions in accordance with the law.

(3) Future R&D Plans and Expected R&D Spending

The popularization of mobile devices and broadband networks has led to the prevalence of online communities and enriched content on the Internet. As enterprises continue to pursue energy conservation, carbon reduction, and lower costs, centralized management of usage and sharing of resources has become a trend and led to the rise of cloud computing. The Company has the ability to independently design and develop ICs, and strives to use 2D VGA, BMC, and KVM over IP technologies to become a SoC solutions provider for the centralized management of (cloud) computing. Future R&D projects and product development strategies include:

a. Future R&D Plan

✧ Multimedia IC

- 8th generation BMC
- Platform firmware resilience (PFR) controller
- DC-SCM 2.0 expansion board
- Post-quantum security
- IO expender

✧ Computer peripherals IC

- PC & 8K Audio/Video Extension controller

✧ High-end consumer electronics IC

- 2nd generation spherical image processing chip AST1230
- Smart factory image system

b. Expected R&D Spending

The Company plans to sequentially allocate its R&D budget based on the progress of new product and new technology development. R&D expenditure will maintain a certain level of growth based on the Company's operations to ensure its competitive advantages. Actual R&D expenses in 2021 and 2022 were NT\$506,283 thousand and NT\$627,743 thousand, and accounted for 14% and 12% of revenue, respectively. The Company will be ready to adjust its R&D expenditure based on future changes in the market and demand anytime. The Company's R&D expenditure in 2023 is estimated at NT\$907,827 thousand and will enhance the Company's R&D ability and competitiveness.

(4) Risk Associated with Changes in the Political and Regulatory Environment

The Company aims to comply with laws and regulations of the competent authority in all of its operations, and constantly monitors changes in important policies and laws in Taiwan and overseas to obtain all external information possible. The Company's recent business and finances have not been impacted by any changes to important policies and laws in Taiwan and overseas.

(5) Impact of New Technology and Industry Changes

The Company constantly monitors technology changes and developments relevant to its industry, and rapidly gains information on industry changes. Moreover, the Company is constantly strengthening its R&D ability and applies for patents to further protect its innovative concepts and designs, as it actively expands future markets and applications. This enables the Company to respond to the impact of technology and industry changes. Hence, no major technology changes have had a material impact on the Company's financial condition.

(6) Changes in Corporate Image and Impact on Company's Crisis Management

The Company has always upheld the principles of integrity and professionalism, and operates its business with a sure-footed and steadfast approach. Ever since the Company was established, it has actively strengthened its internal management and improved its quality and efficiency. Up to the date of report, no material events have affected the Company's corporate image.

(7) Risks Associated with Mergers and Acquisitions

The Company's Finance Division and business units are responsible for management and execution of these risks.

The Company currently does not have any mergers or acquisition plans during 2022 and this year up to the date of report.

(8) Risks Associated with Facility Expansion

The Company does not have any plans for factory expansions in the most recent year and up to the date of report.

(9) Risks Associated with Purchase Concentration and Sales Concentration

a. Risks of purchasing concentration:

The Company is a fabless IC design company without any back-end personnel. Hence, all products are produced through a turnkey service provider. When deciding on the turnkey service provider, besides considering the completeness of its silicon IP and APR (Auto Place & Route) technical capabilities, which foundry, assembly house and testing house it is in a strategic alliance with is even more important, because the foundry's process technologies, quality and yield are key factors to whether or not a product is successful. Therefore, the R&D Department selects the turnkey service provider during initial stages of product development.

In the semiconductor industry's value chain, IC design companies are all inclined to maintain long-term relationships with specific foundries, assembly

houses, and testing houses to obtain reliable and stable capacity. This is due to considerations of process technology, quality and yield, sufficient capacity, and on-time delivery.

This situation is common among IC design companies. The Company has worked well with the current wafer supplier (turnkey service provider) for many years, and there is no risk of supply shortage. At present, the Company mainly makes procurements from 2-3 turnkey service providers, but it will continue to search for suitable turnkey service providers in coordination with the development and mass production of new products, so as to reduce the risk of concentrated procurements.

b. Risks of sales concentration:

The Company's main product is BMC, which accounts for over 90% of its revenue, and customers are mainly server brands. Since server brands mainly rely on an ODM or EMS for manufacturing, the Company directly sells its product to the ODM or EMS designated by the brand customer. Analysis of customers in 2021 and 2022 show that the Company's sales are not overly concentrated. Furthermore, besides maintaining relationships with current customers, the Company will actively develop new products and new customers to expand its product portfolio and increase its purchase orders, thereby avoiding the risk of sales being overly concentrated.

(10) Risks Associated with Sales of Significant Numbers of Shares by the Company's Directors and Major Shareholders Who Own 10% or more of the Company's Total Outstanding Shares

Share transfer by directors, supervisors, managers and shareholders holding more than 10% of the Company's shares due to personal financial planning or in coordination with strategic partners brought in by the Company have been reasonable in the past year and up to the date of report. There have been no mass transfers of shares and there has been no impact on the Company's operations.

(11) Risks Associated with Change in Management

No change in management team in the Company occurred in the most recent year to the date of printing of this annual report

(12) Risks Associated with Litigations

- a. If the results of concluded or pending litigious, non-litigious, or administrative litigation events involving the Company in the past two years and up to the date of report can have a material impact on shareholders' equity or stock prices, the facts in contention, amount of the subject matter, starting date of the litigation, main parties involved, and current status shall be disclosed: None.
- b. Concluded or pending litigious, non-litigious, or administrative litigation events in the most recent two years and up to the date of report involving

directors, supervisors, the president, de facto responsible person, major shareholders holding more than 10% of the Company's shares, or subsidiaries of the Company with an outcome that can have a material impact on shareholder equity or stock prices: None.

(13) Other Material Risk: None.

7. If the company or its affiliates have experienced financial difficulties, the annual report shall explain how said difficulties will affect the company's financial situation: None

8. Other Material Events:

(1) Risks Associated with Cyber Attacks

Even though ASPEED has established a comprehensive internet and computing security network, it cannot guarantee that the Company's computing systems which control or maintain vital corporate functions, such as its manufacturing operations and enterprise accounting, would be completely immune to crippling cyber attacks by any third party to gain unauthorized access to its internal network systems, to sabotage its operations and goodwill or otherwise. In the event of a serious cyber attack, ASPEED's systems has may lose important corporate data, therefore, ASPEED has executed backup data procedure of such attack. While ASPEED also seeks to periodically review and assess its cybersecurity architecture to ensure their adequacy and effectiveness, it cannot guarantee that the Company will not be susceptible to new and emerging risks and attacks in the evolving landscape of cybersecurity threats. These cyber attacks may also attempt to steal ASPEED's trade secrets and other intellectual properties and other sensitive information, such as proprietary information of the Company's customers and other stakeholders and personal information of the Company's employees. Malicious hackers may also try to introduce computer viruses, corrupted software or ransomware into the Company's network systems to disrupt its operations, blackmail it for regaining control of its computing systems or spy for sensitive information. These attacks may result in ASPEED having to pay damages for its delayed or disrupted orders or incur significant expenses in implementing remedial and improvement measures to enhance the Company's cybersecurity network, and may also expose the Company to significant legal liabilities arising from or related to legal proceedings or regulatory investigations associated with, among other things, leakage of customer or third party information which ASPEED has an obligation to keep confidential.

During 2021 and as of the date of this Annual Report, the Company had not been aware of any material cyber attacks or incidents that had or would expected to have a material adverse effect on its business and operations, nor had it been involved in any legal proceedings or regulatory investigations related thereof.

(2) Other Material Risks

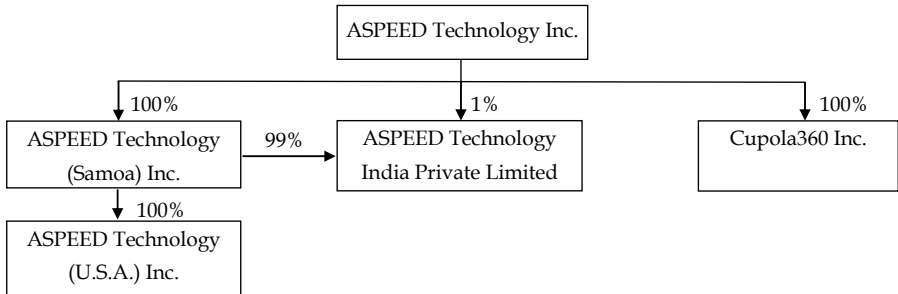

During 2021 as of the date of this annual report, ASPEED's management is not aware of any other risk event that could impart a potentially material impact on the financial status of the Company.

IX. Special Disclosures
